*Land, Water and Development* Malcolm Newson, 2002-09-11 This is a fully revised and expanded second edition of Malcolm Newson's acclaimed book Exploring in greater depth the meaning of sustainability in river basin development this new edition highlights the rapid evolution of practical concepts since the Rio Earth Summit features new illustrations and case studies from Australia South Africa and Israel makes the ecosystem model more explicit throughout strengthens coverage of the linkages between land and water management

*Not on My Watch* Alexandra Morton, 2022-09-06 NATIONAL BESTSELLER Alexandra Morton has been called the Jane Goodall of Canada because of her passionate thirty year fight to save British Columbia's wild salmon Her account of that fight is both inspiring in its own right

and a roadmap of resistance Alexandra Morton came north from California in the early 1980s following her first love the northern resident orca Then in 1989 industrial aquaculture moved into the region chasing the whales away Soon Alex had shifted her scientific focus to documenting the infectious diseases and parasites that pour from the ocean farm pens of Atlantic salmon into the migration routes of wild Pacific salmon and then to proving their disastrous impact on wild salmon and the entire ecosystem of the coast Alex stood against the farms first representing her community then alone and at last as part of an uprising in which ancient Indigenous governance resisted a province and a country that wouldn't obey their own court rulings She has used her science many acts of protest and the legal system in her unrelenting efforts to save wild salmon and ultimately the whales a story that reveals her own perseverance and bravery but also shines a bright light on the ways other humans doggedly resist the truth Here she brilliantly calls those humans to account for the sake of us all

**Global Perspectives on River Conservation** P. J. Boon, B. R. Davies, Geoffrey E. Petts, 2000-10-03 Throughout the world river conservation is becoming an increasingly important concern In arid regions for instance rivers often form the only water resource for human sustenance indeed the World Bank has predicted that future wars will be about water In many parts of the developing world rivers are used as repositories for waste and river ecosystems consequently reflect the worst excesses of human exploitation In the industrialised nations the focus of attention is beginning to move from chemical clean up to restoring the structural damage to rivers caused by decades of river engineering Recognition is growing that river management needs a catchment wide perspective if the needs of human populations river habitats and wildlife are to reach a sustainable balance The development of river conservation strategies has become a global imperative **Global Perspectives on River Conservation** is the first book that provides a truly global synthesis of knowledge on river conservation with the aim of encouraging strategic river planning It does this in two ways First it sets out a worldwide region by region overview of the science policy and practice of river conservation Second it provides a topical review of different river settings such as tropical temperate temporary perennial large small and contemporary issues in river conservation such as classification and evaluation environmental legislation the role of public participation **Global Perspectives on River Conservation** is an invaluable reference for river managers planners and developers conservationists statutory water agencies government departments academics researchers postgraduates and final year under graduates working in the field of environmental management of inland waters Canadian Book Review Annual ,1992 **BC Studies** ,1993 *Quill & Quire* ,1992
