Run River:

Run, River, Run Ann Zwinger, 2022-03-08 The Green River runs wild free and vigorous from southern Wyoming to northeastern Utah Edward Abbey wrote in these pages in 1975 that Anne Zwinger's account of the Green River and its subtle forms of life and nonlife may be taken as authoritative Run River Run should serve as a standard reference work on this part of the American West for many years to come New York Times Book Review *Running Dry* Jonathan Waterman, 2010-05-18 In 1869 John Wesley Powell led a small party down the Green and Colorado Rivers in a bold attempt to explore the Grand Canyon for the first time After their monumental expedition they told of raging rapids constant danger and breathtaking natural beauty of the American landscape at its most pristine Jon Waterman combines sheer adventure and environmental calamity in this trailblazing cautionary account of his 2008 trip down the overtaxed drying Colorado Dammed and tunneled forced into countless canals trapped in reservoirs and harnessed for electricity what once was untamed and free is now humbled parched and so yoked to human purposes that in most years it trickles away 100 miles from its oceanic destination Waterman writes with informal immediacy in this eye witness account of the many demands on the Colorado from irrigating 3.5 million acres of farmland to watering the lawns of Los Angeles He shows how our profligacy and inexorable climate change spark political conflict and how we can avert this onrushing ecological crisis As he follows Powell afloat and afoot Waterman reaches out both to adventure travelers and to scientists conservationists environmentalists and anyone interested in the fragile interplay between nature and humans Running the River Wes Ferguson, 2014-03-05 Growing up near the Sabine journalist Wes Ferguson like most East Texans steered clear of its murky debris filled waters where alligators lived in the backwater sloughs and an occasional body was pulled from some out of the way crossing The Sabine held a reputation as a haunt for a handful of hunters and loggers more than a few water moccasins swarms of mosquitoes and the occasional black bear lumbering through swamp oak and cypress knees But when Ferguson set out to do a series of newspaper stories on the upper portion of the river he and photographer Jacob Croft Botter were entranced by the river's subtle beauty and the solitude they found there They came to admire the self-described river rats who hunted fished and swapped stories along the muddy water plain folk who love the Sabine as much as Hill Country vacationers love the clear waters of the Guadalupe Determined to travel the rest of the river Ferguson and Botter loaded their gear and launched into the stretch of river that charts the line between the states and ends at the Gulf of Mexico To learn more about The Meadows Center for Water and the Environment sponsors of this book's series please click here *The River Runs Black* Elizabeth C. Economy, 2011-01-15 China's spectacular economic growth over the past two decades has dramatically depleted the country's natural resources and produced skyrocketing rates of pollution Environmental degradation in China has also contributed to significant public health problems mass migration economic loss and social unrest In *The River Runs Black* Elizabeth C. Economy examines China's growing environmental crisis and its implications for the country's future development Drawing on historical

research case studies and interviews with officials scholars and activists in China the author traces the economic and political roots of China's environmental challenge and the evolution of the leadership's response She argues that China's current approach to environmental protection mirrors the one embraced for economic development devolving authority to local officials opening the door to private actors and inviting participation from the international community while retaining only weak central control The result has been a patchwork of environmental protection in which a few wealthy regions with strong leaders and international ties improve their local environments while most of the country continues to deteriorate sometimes suffering irrevocable damage Economy compares China's response with the experience of other societies and sketches out several possible futures for the country This second edition is updated with information about events during the past five years covering China's tumultuous transformation of its economy and its landscape as it deals with the political implications of this behavior as viewed by an international community ever more concerned about climate change and dwindling energy resources

The Blood Runs Like a River Through My Dreams . Nasdijj,2001-09-17 THE BLOOD RUNS LIKE A RIVER THROUGH MY DREAMS transports readers to the majestic landscapes and hard Native American lives of the desert Southwest and into the embrace of a way of looking at the world that seems almost like revelation Born to a storytelling Native mother and a roughneck song singing cowboy father Nasdijj has lived on the jagged edged margins of American society yet hardship and isolation have only brought him greater clarity and a gift for language that is nothing short of breathtaking Nasdijj tells of his adopted son Tommy Nothing Fancy of the young boy's struggle with fetal alcohol syndrome and of their last fishing trip together It is a heartbreaking story written with great power and a diamondlike poetry But whether Nasdijj is telling us about his son about the chaotic alternately harrowing and comical life he led with his own parents or about the vitality and beauty of Native American culture his voice is always one of searching honesty wry humor and a nearly cosmic compassion While Nasdijj struggles with his impossible status as someone of two separate cultures he also remains a contradiction in a larger sense he cares for those who often shun him he teaches hope though he often has none for himself and he comes home to the land he then must leave THE BLOOD RUNS LIKE A RIVER THROUGH MY DREAMS is the memoir of a man who has survived a hard life with grace who has taken the past experience of pain and transformed it into a determination to care for the most vulnerable among us and who has found an almost unspeakable beauty where others would find only sadness This is a book that will touch your soul

The Emerald Mile Kevin Fedarko,2013-05-07 From one of Outside magazine's Literary All Stars comes the thrilling true tale of the fastest boat ride ever through the Grand Canyon atop the legendary Colorado River flood of 1983 In the spring of 1983 massive flooding along the length of the Colorado River confronted a team of engineers at the Glen Canyon Dam with an unprecedented emergency that may have resulted in the most catastrophic dam failure in history In the midst of this crisis the decision to launch a small wooden dory named The Emerald Mile at the head of the Grand Canyon just fifteen miles downstream from the Glen Canyon Dam seemed not just odd but downright suicidal The Emerald Mile at one time slated to be destroyed was rescued and brought back to life by Kenton Gruba the man at the oars who intended to use this flood as a kind of hydraulic sling shot The goal was to nail the all time record for the fastest boat ever propelled by oar by motor or by the grace of God himself through the heart of the Grand Canyon atop the Colorado River from Lee's Ferry to Lake Mead Did he survive Just barely Now this remarkable epic feat unfolds here in The Emerald Mile

Montana's Big Blackfoot River and its near magical blend of fly fishing with the troubling affections of the heart. The paperback edition is now available with an evocative new cover by acclaimed Montana painter Russell Chatham. A masterpiece. This is more than stunning fiction. It is a lyric record of a time and a life shining with Maclean's special gift for calling the reader's attention to arts of all kinds: the arts that work in nature, in personality, in social intercourse, in fly fishing.

Kenneth M. Pierce, *Village Voice*. Norman Maclean, 1902-90, woodsman, scholar, teacher, and storyteller, grew up in the Western Rocky Mountains of Montana and worked for many years in logging camps and for the United States Forestry Service before beginning his academic career. He retired from the University of Chicago in 1973. *Rivers Run Through Us* Eric B. Taylor, 2021-10. An engaging, informative, and personal exploration of some of the great rivers of North America. The physical nature of rivers has influenced the course of human history and development, whether it be in the prosecution of major conflicts, US Civil War patterns of development and social change, dams on the Columbia River, the economy, gold rushes, agricultural development, or international relations, US and Mexico, and the Colorado River. The centrality of human river interactions has had great impacts on the biodiversity of rivers, salmon, and other threatened species that have been the focus of historical and current intense conflicts of values, e.g., water in the Sacramento-San Joaquin system and California water wars, in general. Of the thousands of rivers in North America, 10 are profiled in *Rivers Run Through Us*: Mackenzie River, Yukon River, Fraser River, Columbia River, Sacramento-San Joaquin River, Colorado River, Rio Grande, Rio Bravo River, Mississippi River, Hudson River, St. Lawrence River. In this engaging new work, Eric Taylor takes readers on a grand tour of 10 of North America's more important river systems, exploring one fundamental issue for each that illustrates the critical role each particular stream has had and will have in the human development of North America. **Run, River, Run** Ann Zwinger, 1984-11. The Green River runs wild, free, and vigorous from southern Wyoming to northeastern Utah. Edward Abbey wrote in these pages in 1975 that Anne Zwinger's account of the Green River and its subtle forms of life and nonlife may be taken as authoritative. *Run, River, Run* should serve as a standard reference work on this part of the American West for many years to come. *New York Times Book Review*. [Let the River Run Silver Again!](#) Sandy Burk, 2005. *Let the River Run Silver Again* is an environmental conservation success story for students ages 10 to 15 and the teachers, parents, and others who mentor them. It is a source of information and insight for those who want to learn about and benefit from the success of others, as well as those who are interested in developing environmental restoration programs in their own watershed. The full color format presents engaging, action-packed photographs along with maps, graphs, and original art that extends the information presented in multiple directions and dimensions. The greater part of the book follows students from one elementary school in Maryland as they take part over a period of nine years in a major regional conservation initiative to restore populations of an important fish, the American shad, to the Chesapeake Bay watershed and to allow the shad to breach numerous dams while migrating to many of their former spawning areas. Numerous private organizations and local state and

federal agencies contributed to the program which was indeed successful but the emphasis in this book is upon the students their teachers and their community as they collectively committed to the project followed through with this commitment and benefited in myriad ways from the success of the project The narrative of the students projects is presented in an energetic style and at a level that will both engage and inform other readers of the same age A short section at the end of the book draws upon the insights offered by the students story while identifying pathways for students and their mentors to the development and implementation of water wetland and watershed restoration projects that could be implemented in other locations and circumstances The students experience thus serves as a model and inspiration for student or youth group conservation projects anywhere
