Long Run to Glory Stephen Lane,2023-09-05 On the morning of August 5 1984 four of the greatest marathoners of all time lined up for one of the most important and long awaited races in history By then they had dominated their competition for at least five years upending a century s worth of preconceived notions of what marathoners could do By decade s end they had lowered the world record a total of 13 minutes won 27 major marathon titles and swept every Olympic and World Championship held in the 1980s And in their careers only once did all four American Joan Benoit Norwegians Grete Waitz and Ingrid Kristiansen and Portugal s Rosa Mota square off in the same race at the 1984 Los Angeles Olympics in the first ever Women s Olympic Marathon Such was their talent that Benoit the world record holder entered the race as the underdog She d had knee surgery in April and no one least of all Benoit herself was certain she could hold up for 26 miles against her three rivals Waitz the former world record holder was the favorite she had destroyed the field at the 1983 World Championships and had never lost a marathon she had finished Kristiansen who had beaten Waitz twice in the summer of 1984 albeit at shorter distances was considered the fastest woman in the race she held world records at 5 000m and 10 000m

and would break Benoit's marathon record in 1985. Mota had beaten Kristiansen at the 1982 European marathon championships and was already earning a reputation for raising her level in the biggest races. This is their story and the story of the first women's Olympic Marathon.

Running Smart Mariska van Sprundel, 2021-09-14 A science writer and recreational runner explores the science behind popularly held beliefs about shoes, injuries, nutrition, runner's high, and more. Conventional wisdom about running is passed down like folklore and sometimes contradicts itself: the right kind of shoe prevents injury or running barefoot like our prehistoric ancestors is best; eat a high fat diet and also carbo load before a race; running cures depression but it might be addictive; running can save your life although it can also destroy your knee cartilage. Often it's hard to know what to believe. In *Running Smart*, Mariska van Sprundel, a science journalist and recreational runner who has had her fair share of injuries, sets out to explore the science behind such claims. In her quest, van Sprundel reviews the latest developments in sports science, consults with a variety of experts, and visits a sports lab to have her running technique analyzed. She learns among other things that according to evolutionary biology, humans are perfectly adapted to running long distances even if our hunter-gatherer forebears suffered plenty of injuries; that running sets off a shockwave that spreads from foot to head which may or may not be absorbed by cushioned shoes; and that a good sports bra controls the ping-pong like movements of a female runner's breasts. She explains how the body burns fuel, the best foods to eat before and after running, and what might cause runner's high. More than fifty million Americans are runners, and a slight majority of them are women. This engaging and enlightening book will help both novice and seasoned runners run their smartest.

Dr. Nicholas Romanov's Pose Method of Running Nicholas S. Romanov, 2002 Dr. Romanov's Pose Method Of Running brings his revolutionary ideas that changed the world of running to the professional athlete and amateur alike. In a very succinct and enjoyable manner, it teaches one to perform to the very best of his ability using the Pose running technique. In ballet or martial arts, one requires practice of technique. The same is true of running. Unless you are one of the lucky ones like Haile Gebrselassie, Steve Prefontaine, or Michael Johnson who were born with the perfect technique, you have to learn it. Until Dr. Romanov's discovery, there was no coherent theory on the subject. Running was practiced but not taught as a skill. The Pose Method proposes to teach running as a skill with its own theory, concepts, and exercises.
