Rural Poverty In Latin America:

Rural Poverty in Latin America R. López, A. Valdés, 2000-09-28 This book provides fresh insight into rural poverty in Latin America. It draws on six case studies of recent rural household surveys for Chile, Colombia, El Salvador, Honduras, Paraguay, and Peru, and several thematic studies examining land, labour, rural financial markets, the environments, and disadvantaged groups. Recognizing the heterogeneity within the rural economy, the studies characterize three important groups: small farmers, landless farm workers, and rural non-farm workers, and provide quantitative and qualitative analyses of the determinants of household income. *Overview of rural poverty in Latin America and the Caribbean* Food and Agriculture Organization of the United Nations, 2019-09-12 *Panorama of Rural Poverty in Latin America and the Caribbean 2018* published by the Food and Agriculture Organization of the United Nations. FAO addresses the important challenges faced by the region in developing its rural territories to achieve the targets of the Sustainable Development Goals by 2030, particularly SDG 1 to end poverty in all its forms everywhere. After many years of progress, poverty and extreme rural poverty in the region have started to increase again. This is worrying news for countries of the region and the international community because if they do not return to the path of rural poverty reduction, millions of people will be excluded from the opportunity to contribute to the development of their families, communities, and countries. The 33 Member States of the United Nations in the region have pledged their commitment to eradicating rural poverty by 2030, and despite the recent trend, it is still possible to achieve this goal. This report also highlights the persistence of significant gaps between rural and urban areas, which is incompatible with sustainable and equitable development. Of the 169 targets of the Sustainable Development Goals, 132 require actions that must be carried out in rural territories. **Left Behind** Renos Vakis, Jamele Rigolini, Leonardo Lucchetti, 2016-07-26 One out of every five Latin Americans, or around 130 million people, have never known anything but poverty, subsisting on less than US\$4 a day throughout their lives. These are the region's chronically poor, who have remained so despite unprecedented inroads against poverty in Latin America and the Caribbean since the turn of the century. *Left Behind: Chronic Poverty in Latin America and the Caribbean* takes a closer look at the region's entrenched poor, who and where they are, and how existing policies need to change in order to effectively assist them. The book shows significant variations of rates of chronic poverty both across and within countries. Within a single country, some regions show incidence rates up to eight times higher than the lowest. Despite the higher rates of chronic poverty in rural areas, chronic poverty is as much an urban as a rural issue. In fact, considering absolute numbers, urban areas in many countries, including Chile, Brazil, Mexico, Colombia, and the Dominican Republic, have more chronic poor than rural areas. Undoubtedly, the region has come a long way during the decade in terms of poverty reduction, guided by a mix of sustained growth and increased levels in amounts and quality of public spending, and programs targeted directly or indirectly to the chronic poor. While improving endowments and the context where the chronic poor live is a necessary condition, going forward, the decade's

experience suggests that it may not be enough to reach the chronic poor The book posits that refinements to the existing policy toolkit as opposed to more programs may come a long way in helping the remaining poor These refinements include intensifying efforts to improve coordination between different social and economic programs which can boost the income generation process and deal with the intergenerational transmission of chronic poverty by investing in early childhood development Equally important though there is an urgent need to adapt programs to directly address the psychological toll of chronic poverty on people s mindset and aspirations which currently undermines the effectiveness of the existing policy efforts

Population Aging Daniel Cotlear,2010-12-13 Latin America and the Caribbean will soon face the challenges of an aging population This process which took over a century in the rich world will occur in two or three decades in the developing world seven of the 25 countries that will age more rapidly are in LAC Population aging will pose challenges and offer opportunities This book explores three sets of issues First is a group of issues related to the support of the aging and poverty in the life cycle This covers questions of work and retirement income and wealth and living arrangements and intergenerational transfers It also explores the relation between the life cycle and poverty Second is the question of the health transition How does the demographic transition impact the health status of the population and the demand for health care And how advanced is the health transition in LAC Third is an understanding of the fiscal pressures that are likely to accompany population aging and to disentangle the role of demography from the role of policy in that process This book provides an introduction to the concepts and techniques at the intersection of demography and economics It summarizes the policy debate about potential reforms needed to make population aging an opportunity for development *Local*

Governments and Rural Development Krister Andersson, Gustavo Gordillo, Frank van Laerhoven, Priorities and Strategies in Rural Poverty Reduction Diana Alarcón González, 2004 Cooperatives, Grassroots Development, and Social Change Marcela Vásquez-Léon, Brian J. Burke, Timothy J. Finan, 2017-03-14 Provides a cross country comparison of smallholder agricultural cooperatives in Paraguay Brazil and Colombia revealing immense opportunities and challenges for community development empowerment and social change Provided by publisher New Markets, New Opportunities? Nancy Birdsall, Carol L. Graham, 2001-09-19 A Brookings Institution Press and Carnegie Endowment for International Peace publication Many of the countries that have recently converted to a market based economic system have also experienced an alarming increase in income inequality a widening gap between the haves and have nots But to what extent is the increase in inequality also increasing the opportunities for economic advancement particularly for those at the bottom of the economic ladder Does the creation of greater opportunities make a region s move to the market politically acceptable And if opportunities don t increase along with inequality will it eventually cause a political backlash against a country s market policies This book highlights the importance of finding the answers to those questions by examining the issues of social mobility and opportunity as an essential part of the income inequality puzzle It provides a summary of the latest research on the economics and politics of social mobility in both developed and emerging market economies including the conceptual issues involved and the challenges of accurately documenting trends The book concludes with a discussion of the economics of opportunity and mobility in Latin America and Eastern Europe and the politics and perceptions of mobility in the two regions Rural Poverty in Latin America Keith B. Griffin, 1998 *A Decade of Social Development in Latin America, 1990-1999* José Antonio Ocampo, 2004 The final decade of twentieth century was momentous for Latin America as it witnessed sweeping changes with regard to previous trends in the region Most important were the revival of economic growth and the reduction of poverty Another significant phenomenon was impact of international crises on Latin American countries This book analyzes what happened between 1990 and 1999 and revisits issues of interest to ECLAC using the same approach that has characterized the Social Panorama of Latin America Analysis begins with a look at poverty income distribution employment occupational stratification the role of education the intergenerational transmission of opportunities for achieving well being and the contribution of social spending to the improvement of the population s standard of living and at interrelationships between these dimensions and economic growth It also uses opinion polls carried out in many of the countries to describe the Latin American population s subjective reactions changes in the 1990s Publisher s description
