O'Connell, Scott J. Peters, 2021-07-13 A call to action in an ongoing battle against industrial agriculture From the early twentieth century and across generations to the present In the Struggle brings together the stories of eight politically engaged scholars documenting their opposition to industrial scale agribusiness in California As the narrative unfolds their previously censored and suppressed research together with personal accounts of intimidation and subterfuge is introduced into the public arena for the first time In the Struggle lays out historic subterranean confrontations over water rights labor organizing and the corruption of democratic principles and public institutions As California's rural economy increasingly consolidates into the hands of land barons and corporations the scholars work shifts from analyzing problems and formulating research methods to organizing resistance and building community power Throughout their engagement they face intense political blowback as powerful economic interests work to pollute and undermine scientific inquiry and the civic purposes of public universities The findings and the pressure put upon the work of these scholars Paul Taylor Ernesto Galarza and Isao Fujimoto among them are a damning indictment of the greed and corruption that flourish under industrial scale agriculture After almost a century of empirical evidence and published research a definitive finding becomes clear land consolidation and economic monopoly are fundamentally detrimental to democracy and the well being of rural societies **Challenges for Rural America in the Twenty-First Century** David L. Figley, 2014-06-17 First published in 1983 This is Volume 1 of two in a collection of on stress and the family The books view the family as both producing and reacting to stress and attempt to identify the sources of stress from either inside or outside the family microsystem Further the volumes distinguish between sudden unpredictable and overwhelming catastrophic stress

and the more normal gradual and cumulative life stressors encountered over the life span Moreover the series brings into focus several rich perspectives which effectively integrate the hundreds of generalizations about the functional and dysfunctional methods family members use to cope with stress *Locality and Inequality* Linda M. Lobao,1990-10-02 This book explores how the recent restructuring of farming and industry has affected economic and social equality in the United States The author explains how the farm sector has undergone a dramatic restructuring with profound effects Moderate size family farms the mainstay of American agriculture have declined during the postwar period and are now under severe financial stress Large scale industrialized farms the factories in the field often run by corporations continue to expand their share of agricultural sales while small farms operated on a part time basis appear to be replacing traditional family farming Lobao shows that public concern about farm restructuring is indeed warranted and that the nation now appears to be losing its most beneficial farms as well as industries While local and regional social and economic forces and state policy can be brought to bear on these trends Lobao particularly focuses on how community empowerment and broad based political coalitions offer the most promise for fundamental change *Quick Bibliography Series* ,1976 **Proceedings** ,1987

Part-time Farming Jayne T. MacLean,1990 The Agricultural Scientific Enterprise Lawrence M Busch,William B Lacy,2019-07-11 The State Agricultural Experiment Stations have played a fundamental role in the development of science and agriculture in the United States From their inception in 1887 the experiment stations have attempted to wed basic research with practical application and have helped institutionalize a utilitarian approach to agricultural science Agricultural research and the new technology it helped to generate were major factors in the transformation of U S agriculture into a high technology mechanized science based industry Moreover the experiment stations as the first large scale publicly supported scientific research institutions in the United States have also long been models for scientific institutions both here and abroad Compiled for the 1987 centennial of the State Agricultural Experiment Stations this volume critically examines past performance current issues and future directions for public agricultural research in the United States Each of the authors drawn from disciplines as diverse as philosophy and agronomy focuses on a central concern for the scientific enterprise Issues include priority setting maintaining and promoting disciplinary and interdisciplinary effectiveness supporting higher education for agriculture and efficacious dissemination of research findings By setting these issues in their historical and philosophical context the volume suggests new approaches for meeting the continuing challenge to achieve equity efficiency sustainability flexibility conservation and consistency with other objectives of U S society Annual Report Woodrow Wilson International Center for Scholars,1980 *Towards A New Political Economy Of Agriculture* William H Friedland,2021-11-28 The emergence of a truly global economy in the 1970s and the need to understand the subsequent changes in economic structure provided the impetus for this synthesis of the sociology of agriculture The book offers the first formulations of a political economy theory that explains the transnational social and production relations of food and agriculture Drawing upon

studies of labour technology the state and gender the contributors put forward a basis for reassessing and restating the intellectual framework of agriculture *The Changing American Countryside* Emery N. Castle, 1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers *The Changing American Countryside* a volume that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life *Housing in the Third World* Leslie Kilmartin, Harjinder Singh, 1992
