Rural Women Workers In Nineteenth Century England:

Rural Women Workers in Nineteenth-century England Nicola Verdon, 2002 The range of women's work and its contribution to the family economy studied here for the first time Despite the growth of women's history and rural social history in the past thirty years the work performed by women who lived in the nineteenth century English countryside is still an under researched issue Verdon directly addresses this gap in the historiography placing the rural female labourer centre stage for the first time The involvement of women in the rural labour market as farm servants as day labourers in agriculture and as domestic workers are all examined using a wide range of printed and unpublished sources from across England The roles village women performed in the informal rural economy household labour gathering resources and exploiting systems of barter and exchange are also assessed Changes in women's economic opportunities are explored alongside the implications of region age marital status number of children in the family and local custom women's economic contribution to the rural labouring household is established as a critical part of family subsistence despite criticism of such work and the rise in male wages after 1850 NICOLA VERDON is a Research Fellow in the Rural History Centre University of Reading *Women and Work in Britain since 1840* Gerry Holloway, 2007-05-07 The first book of its kind to study this period Gerry Holloway's essential student resource works chronologically from the early 1840s to the end of the twentieth century and examines over 150 years of women's employment history With suggestions for research topics an annotated bibliography to aid further research and a chronology of important events which places the subject in a broader historical context Gerry Holloway considers how factors such as class age marital status race and locality along with wider economic and political issues have affected women's job opportunities and status Key themes and issues that run through the book include continuity and change the sexual division of labour women as a cheap labour force women's perceived primary role of motherhood women and trade unions equality and difference education and training Students of women's studies gender studies and history will find this a fascinating and invaluable addition to their reading material *Rural England's* Barry Reay, 2004-06-08 Rural England's is the first general history of nineteenth century English rural workers Barry Reay provides a fresh perspective on England's rural past reintroducing those often excluded from more traditional historical approaches and stressing the diversity of working communities and the dynamism of rural life Reay challenges stereotypes of country living arguing that the extent of localization is so compelling that instead of thinking of a unitary notion of rural England we must think in terms of rural England's Incorporating a wide range of source material Reay examines and explores both representations and experiences of rural labour including Varieties of settlement and landscape Types of work carried out by men women and children Household survival strategies Experiences of life and death Leisure patterns Repertoires of protest Visual imagery Literary representations **Women at Work, 1860-1939** Valerie G. Hall, 2013 A major contribution to women's history labour history and economic and social history This book examines three different groups of women in coal mining

communities in inshore fishing communities and in agricultural labour It demonstrates how the work these groups undertook was fundamental in shaping their experiences as women in different ways and shows that women s experiences varied within class as well as between classes The book illustrates how mining women despite being restricted to domestic roles created through meticulous housekeeping a power base in their homes and rendered their husbands dependent on them while a minority took so active a role in politics that they were said to be the backbone of the Labour Party how fisher women engaging in a household economy reminiscent of pre modern times exercised great influence on financial decision making through their roles in baiting lines and selling fish and how some single female agricultural labourers exercised considerable autonomy whereas those who were tied in a family economy had little independence Overall the book makes a very significant contribution to women s history to labour history and to economic and social history This is a tremendously useful and relevant book for historians of women as well as social and labor historians Professor Joan Scott Institute of Advanced Studies Princeton University VALERIE HALL is Professor Emerita of History at William Peace University North Carolina

The Farmer in England, 1650-1980 Richard W. Hoyle, 2016-03-03 Farmers held a pivotal role in the capitalist agriculture that emerged in England in the eighteenth century yet they have attracted little attention from rural historians Farmers made agriculture happen They brought together the capital and the technical and management skills which allowed food to be produced It was they and not landowners who employed and supervised labour They accepted the risk inherent in agriculture paying largely fixed rents out of fluctuating and uncertain incomes They are the rural equivalent of the small businessman with his own firm employing people and producing for markets sometimes distant ones Our ignorance of the farmer might be justified by the claim that they are ill documented but in fact farmers were normally literate and kept records day books journals accounts This volume goes some way to counter the claim that a history of the farmer cannot be written by showing the range of materials available and the diversity of approaches which can be employed to study the activities and actions of individual farmers from the sixteenth century onwards Farm records offer invaluable insights into the farming economy which are available nowhere else In this volume accounts are used in a variety of ways as the means to access single farms but also in gross as a national sample of accounts to reveal regional variation over time For the later nineteenth and twentieth centuries the range of sources available increases enormously and farmers indeed farmer s wives too emerge as articulate commentators on their own position using correspondence to outline their difficulties in the First World War Some even developed second careers as newspaper columnists and journalists This book focuses attention back on the farmer and it is hoped will help to restore farmers to their rightful position in history as rural entrepreneurs

Child Workers and Industrial Health in Britain, 1780-1850 Peter Kirby, 2013 A comprehensive study of the occupational health of employed children within the broader context of social industrial and environmental change between 1780 and 1850

Patient voices in Britain, 1840-1948 Anne Hanley, Jessica Meyer, 2021-09-07 Historians have long engaged with Roy

Porter's call for histories that incorporate patients' voices and experiences. But despite concerted methodological efforts, there has simply not been the degree and breadth of innovation that Porter envisaged. Patients' voices still often remain obscured. This has resulted in part from assumptions about the limitations of archives, many of which are formed of institutional records written from the perspective of health professionals. Patient voices in Britain reposition patient experiences at the centre of healthcare history using new types of sources and reading familiar sources in new ways. Focusing on military medicine, Poor Law medicine, disability, psychiatry and sexual health, this collection encourages historians to tackle the ethical challenges of using archival material and to think more carefully about how their work might speak to persistent health inequalities and challenges in health service delivery.

The Non-Representation of the Agricultural Labourers in 18th and 19th Century English Paintings Penelope McElwee, 2016-02-08

The life of the poor rural worker appears to have been one of unmitigated toil within an unequal society, a reality seldom endorsed in paintings of the eighteenth and early nineteenth centuries. The contemporary viewer, who constituted less than three per cent of the population, wished to see visions of the idyllic golden landscapes of Merrie England, peopled by happy, contented workers, or alternatively images of the Big House, a feature and phenomenon now marching over the countryside, fed by a new building frenzy. This particular element would soon evolve into an all-consuming preoccupation for the wealthy throughout the period. Members of the upper echelons of society, with their families all attired in fine silks and satins, look out at their audience from ornately framed canvases as individuals. Yet the rural poor, the rabble at the gates, the unseen workforce who toiled at the behest of the Master, are virtually unknown. They have left few records. Enclosure came at a price. The Poorhouse beckoned. And still the agricultural labourer did virtually nothing for most of the eighteenth century to protest or rebel against the inequalities of his downtrodden existence. Only the dreaded behemoth of the nineteenth century, the threshing machine, would stir him into action. How would it end?

Transforming Women's Work Thomas L. Dublin, 2018-07-05

I am not living upon my friends or doing housework for my board but am a factory girl, asserted Anna Mason in the early 1850s. Although many young women who worked in the textile mills found that the industrial revolution brought greater independence to their lives, most working women in nineteenth-century New England did not, according to Thomas Dublin. Sketching engaging portraits of women's experience in cottage industries, factories, domestic service and village schools, Dublin demonstrates that the autonomy of working women actually diminished as growing numbers lived with their families and contributed their earnings to the household. From diaries, letters, account books and censuses, Dublin reconstructs employment patterns across the century as he shows how wage work increasingly came to serve the needs of families rather than of individual women. He first examines the case of rural women engaged in the cottage industries of weaving and palm leaf hatmaking between 1820 and 1850. Next, he compares the employment experiences of women in the textile mills of Lowell and the shoe factories of Lynn. Following a discussion of Boston working women in the middle decades of the century, particularly domestic servants and garment workers, Dublin

clear argument lively language and a fresh set of organising themes this short history revisits one of the most central events in British history in a novel and accessible way This is an ideal text for undergraduate students studying the Industrial Revolution or 19th Century Britain **Infant Mortality and Working-Class Child Care, 1850-1899** Melanie Reynolds,2016-05-21 Infant Mortality and Working Class Child Care 1850 1899 unlocks the hidden history of working class child care during the second half of the nineteenth century seeking to challenge those historians who have cast working class women as feckless and maternally ignorant By plotting the lives of northern women whilst they grappled with industrial waged work in the factory in agriculture in nail making and in brick and salt works this book reveals a different picture of northern childcare one which points to innovative and enterprising child care models Attention is also given to day carers as they acted in loco parentis and the workhouse nurse who worked in conjunction with medical paediatrics to provide nineteenth century welfare to pauper infants Through the use of a new and wide range of source material which includes medical and poor law history Melanie Reynolds allows a fresh and new perspective of working class child care to arise

Representations of British Emigration, Colonisation and Settlement Robert D. Grant,2005-11-08 This volume explores the complex relationships between early Nineteenth Century representations of emigration colonization and settlement and the social economic and cultural conditions within which they were produced It stresses the role of writers illustrators and artists in making colonial settler landscapes within the metropolitan imaginary paying particularly close attention to the complex interdependencies between metropolis and colony which have too often been reduced to simplistic binaries of centre and periphery metropolitan core and colonial outpost Focusing on material dealing with Canada the Cape Australia and New Zealand its interdisciplinarity and global reach consequently adds considerably to the field of colonial studies **People, Places and Passions** Russell Davies,2015-06-15 It takes a different view of the history of Wales examining a panorama of different emotions and experiences laughter happiness fear anger adventure lust loneliness anxiety to give an entertaining and exciting new history to Wales a wide range of sources are used to present the ambitions and anxieties which drove and destroyed Welsh people The book's literary style and the fact that it follows earlier successful studies by the author should ensure an audience Women's Worlds in Seventeenth-Century England Patricia Crawford,Laura Gowing,1999-11-04 Womens Worlds in England presents a unique collection of source materials on womens lives in sixteenth and seventeenth century England The book introduces a wonderfully diverse group of women and a series of voices that have rarely been heard in history Drawing on unpublished archival materials the book explores women's experiences of work sex marriage and motherhood beliefs and spirituality political activities relationships mental worlds In a time when few women could write this book reveals the multitude of ways in which their voices have left traces in the written record and deepens our understanding of womens lives in the past **Agrarian Reform and Resistance in an Age of Globalisation** Joe Regan,Cathal Smith,2018-12-07 This book investigates the causes and effects of modernisation in rural

regions of Britain and Ireland continental Europe the Americas and Australasia between 1780 and 1914 In this period the transformation of the world economy associated with the Industrial Revolution fuelled dramatic changes in the international countryside as landowning elites agricultural workers and states adapted to the consequences of globalisation in a variety of ways The chapters in this volume illustrate similarities differences and connections between the resulting manifestations of agrarian reform and resistance that spread throughout the Euro American world and beyond during the long nineteenth century

Childhood and Child Labour in the British Industrial Revolution Jane Humphries, 2010-06-24 This is a unique account of working class childhood during the British industrial revolution first published in 2010 Using more than 600 autobiographies written by working men of the eighteenth and nineteenth centuries Jane Humphries illuminates working class childhood in contexts untouched by conventional sources and facilitates estimates of age at starting work social mobility the extent of apprenticeship and the duration of schooling The classic era of industrialisation 1790 1850 apparently saw an upsurge in child labour While the memoirs implicate mechanisation and the division of labour in this increase they also show that fatherlessness and large subsets common in these turbulent high mortality and high fertility times often cast children as partners and supports for mothers struggling to hold families together The book offers unprecedented insights into child labour family life careers and schooling Its images of suffering stoicism and occasional childish pleasures put the humanity back into economic history and the trauma back into the industrial revolution

Cultivating Victory Cecilia Gowdy-Wygant, 2013-04-25 A compelling study of the sea change brought about in politics society and gender roles during World Wars I and II by campaigns to recruit Women s Land Armies in Great Britain and the United States to cultivate victory gardens Cecilia Gowdy Wygant compares and contrasts the outcomes of war in both nations as seen through women s ties to labor agriculture the home and the environment She sheds new light on the cultural legacies left by the Women s Land Armies and their major role in shaping national and personal identities

The Birth of Modern Europe , 2010-12-07 It seems undeniable that Jan de Vries has cast an indelible impression upon the field of early modern economic history With his rejection of traditional models that left pre industrial Europe with little to no role to play in modern development de Vries work has laid claim to the rich significance of the early modern period as the birth of the contemporary West Culminating in *The Industrious Revolution Consumer Behavior and the Household Economy 1650 to the Present* 2008 his work has changed the way scholars conceptualize and study this dynamic period as the contributors in this volume attest Utilizing the methods and concepts pioneered by de Vries these authors display the depth and breadth of his influence with applications ranging from trade to architecture from the Netherlands to China and from the 1400s to the present day
