**Labors of Division** Navyug Gill, 2024-01-16 One of the most durable figures in modern history the peasant has long been a site of intense intellectual and political debate Yet underlying much of this literature is the assumption that peasants simply existed everywhere a general if not generic group traced backward from modernity to antiquity Focused on the transformation of Panjab during the nineteenth and early twentieth centuries this book accounts for the colonial origins of global capitalism through a radical history of the concept of the peasant demonstrating how seemingly fixed hierarchies were in fact produced legitimized and challenged within the preeminent agricultural region of South Asia Navyug Gill uncovers how and why British officials and ascendant Panjabis disrupted existing forms of identity and occupation to generate a new agrarian order in the countryside The notion of the

hereditary caste peasant engaged in timeless cultivation thus emerged paradoxically as a result of a dramatic series of conceptual juridical and monetary divisions Far from archaic relics this book ultimately reveals both the landowning peasant and landless laborer to be novel political subjects forged through the encounter between colonialism and struggles over culture and capital within Panjabi society Questions of progress exploitation and knowledge come to animate the vernacular operations of power With this history Gill brings difference and contingency to understandings of the global past in order to re think the itinerary of comparative political economy as well as alternative possibilities for emancipatory futures Global Transformations in the Use of Biodiversity for Research and Development Evanson Chege Kamau, 2022-02-15 Enough laws have been enacted since the adoption of the Nagoya Protocol on access and benefit sharing to permit a study which is capable of accurately portraying the status quo of national implementation of the Protocol and the ensuing practice emerging challenges and how countries are coping with them This book one of the first to present such a study uniquely combines an examination of the new laws and practice and how they comply with the Nagoya Protocol of issues not yet resolved by the Protocol and which solutions are being explored and of how research and development is responding to the new situation In addition it proposes solutions to selected questions on ABS based on real world and hypothetical cases which could instigate litigation Written by a team of expert academics and practitioners in the field this book makes a valuable contribution to academic and policy debates and to academic literature on international environmental law international biodiversity law international property law climate law and the law of indigenous populations It also offers a reference guide for practicing lawyers in the area of ABS Proceedings RMRS, 1998 Mining, Mobility, and Social Change in the Global South Gerardo Castillo Guzmán, Matthew Himley, David Brereton, 2023-12-22 This volume focuses on how why under what conditions and with what effects people move across space in relation to mining asking how a focus on spatial mobility can aid scholars and policymakers in understanding the complex relation between mining and social change This collection centers the concept of mobility to address the diversity of mining related population movements as well as the agency of people engaged in these movements This volume opens by introducing both the historical context and conceptual tools for analyzing the mining mobility nexus followed by case study chapters focusing on three regions with significant histories of mineral extraction and where mining currently plays an important role in socio economic life the Andes Central and West Africa and Melanesia Written by authors with expertise in diverse fields including anthropology development studies geography and history case study chapters address areas of both large and smallscale mining They explore the historical geographical factors shaping mining related mobilities the meanings people attach to these movements and the relations between people s mobility practices and the flows of other things put in motion by mining including capital ideas technologies and toxic contamination The result is an important volume that provides fresh insights into the social geographies and spatial politics of extraction This book will be of great interest to students and scholars of mining and the

Asymmetric Demography and the Global Economy J. Fanelli,2015-03-05 The global demographic transition presents marked asymmetries as poor emerging and advanced countries are undergoing different stages of transition Emerging countries are demographically younger than advanced economies This youth is favorable to growth and generates a demographic dividend However the future of emerging economies will bring a decline in the working age share and a rise in the older population as is the case in today s developed world Hence developing countries must get rich before getting old while advanced economies must try not to become poorer as they age Asymmetric Demography and the Global Economy contributes to our understanding of why this demographic transition matters to the domestic macroeconomics and global capital movements affect the asset accumulation growth potential current account and the economy s international investment position This collaborative collection approaches these questions from the perspective of systemically important emerging countries i e members of the G20 but considers both the national and the global sides of the problem

*Climate Change Adaptation in the Built Environment* Chamindi Malalgoda,Dilanthi Amaratunga,Richard Haigh,Shavindree Nissanka,Nishara Fernando,Ruben Paul Borg,Mo Hamza,2025-05-02 Global climate change is one of the greatest environmental threats facing humanity and it is affecting every country on every continent Recent evidence confirms a close liaison between climate change induced hazards and the built environment as the built environment demonstrates a high fragility and vulnerability to hazardous situations The impact of climate change is particularly pertinent to the built environment given the life expectancy of buildings and the fact that it is essential to adapt the existing built environment to deal with a climate that may be significantly different from that in which it evolved Coastal regions are highly vulnerable to climate change because in addition to changes in temperature precipitation and more frequent flooding they will be affected by rising sea levels wave heights and accelerated coastal erosion The built environment exerts considerable influence over coastal communities local climate and environment Coastal areas also tend to be highly populated with many vulnerable urban centres located near the coastal belt In addressing such challenges it is important to better understand the impacts of climate change on the built environment and to develop tangible climate adaptation measures for the built environment
