Farm Buildings Neil Southorn,1996 Most rural properties have a large number of buildings which should contribute to the smooth and efficient running of the farm but buildings which are poorly located inadequately maintained or badly designed do not help on this score For example a badly designed shearing shed will require extra labour during shearing and reduce the quality of the job that is done resulting in a downgrading of the wool that is being harvested The various parts that make up a building are described From a structural viewpoint each part has an important role to play in ensuring the integrity of the structure that it serves the purpose it was designed for and stands up against the elements Some of the more important buildings on farms both general agricultural and horticultural are singled out for specific discussion as are their maintenance requirements *Construction Practice in Rural Areas* Johannes Jähne,1964 **The Book of Farm-buildings, Their Arrangement and Construction** Henry Stephens,Robert Scott Burn,1859 Farm Building Construction Maurice Barnes,Clive Mander,1986-01-01 **Three Bedroom Farmhouse - Masonry Construction (Cooperative Farm Building Plan No. 7170)**.
