Comprising 41 chapters and divided into four sections, the handbook includes a comprehensive introduction to homelessness referring to history, culture, causation and definitions. Long a borrower of ideas from other disciplines, geography has become a contributor in its own right and a spatial turn is evident in disciplines as diverse as Sociology, Anthropology and Literary Criticism. With more than 300 entries written by an international team of leading authorities in the field, the Encyclopedia of Human Geography offers a comprehensive overview of the major ideas, concepts, terms and approaches that characterize a notoriously diverse field. This multidisciplinary volume provides cross-cultural coverage of human geography as it is understood in the contemporary world and takes into account the enormous conceptual changes that have evolved since the 1970s, including a variety of social constructivist approaches. Key Features: Examines a range of themes characterizing different schools of thought and addresses long-standing topics such as urban, economic and medical geography as well as contemporary topics including feminism, the social dimensions of GIS and the social construction of nature. Explores many of the dualities that long characterized social science: nature versus society, the individual versus the social, the historical versus the geographical, consumption versus production and breaks them down using postmodern and poststructuralist approaches. Illustrates how social and spatial structures draw upon people's daily lives, which in turn structures their actions. Looks at how globalization has manifested differently from place to place by discussing topics such as transnational capital, international trade, global commodity chains, global cities, international financial and telecommunications systems and how the global economy is reshaping geopolitics and governance. Key Themes: Cartography, Geographical Information Systems, Economic Geography, Geographic Theory and History, Political Geography, Social Cultural Geography, Urban Geography. **Plug&Play Places** Robert Nadler, 2014-10-08 In post-industrial societies, more and more people earn an income in creative knowledge work, a

highly flexible labour market segment that demands a geographically mobile workforce Creative knowledge work is based on an understanding of language culture and symbolic meanings This can best be obtained through local and national embeddedness Yet this necessity for embeddedness stands in contrast to the demand in geographical mobility How is this contradiction solved by individuals What new forms of place attachment does this bring about This book introduces a showcase of 25 multilocal creative knowledge workers who live in different countries at the same time It investigates how continuous mobility becomes part of their lifeworld and how it changes their feelings of belonging and practices of place attachment Applying an innovative methodological mix of social phenomenology hermeneutics and mental mapping this book takes a detailed look at biographies and the role of places in mobile lifeworlds Plug Play Places brings forth the idea that places have to be understood as individual items which are configured and then plugged into the system of the own lifeworld They can be played without great effort once an individual needs to make use of them This new type of place attachment is a form of subjective standardization of place which complements the well known models of objective standardization of places Plug Play Places is relevant for scientists who deal with mobility and its impact on individual lifeworlds with transnational multilocality and with flexibilized labour markets Furthermore the book provides a detailed qualitative perspective which can enrich the explanations of quantitative research in the same field It is an interesting reading also for practitioners engaged in urban planning housing and real estate development Robert Nadler holds a doctoral degree in Urban and Local European Studies from the University of Milan Bicocca He is a researcher at the Leibniz Institute for Regional Geography and published on creative industries multilocality and labour mobility

continue to ignore northern perspectives and root causes which lie deep in the region's colonial past Christensen interweaves analysis of the region's unique history with the personal stories of people living homeless in two cities Yellowknife and Inuvik These individual and collective narratives tell a larger story of displacement and exclusion residential schools and family breakdown addiction and poor mental health poverty and unemployment and urbanization and institutionalization But they also tell a story of hope and renewal Understanding what it means to be homeless in the North and how Indigenous people think about home and homemaking is the first step Christensen argues on the path to decolonizing existing approaches and practices
