Rural Land Degradation:

Rural Land Degradation Donald MacDonald, Morven Archer, 1993 The third in the Aspects of Applied Geography series this book looks in detail at the causes and effect of land degradation and ways of managing and conserving the land Up to date case studies in desertification in the Sahel and land degradation in North America provide a basis for a thorough examination of the concepts and issues involved Other features include short and extended response exam type questions and concepts and summaries are highlighted Donald MacDonald is the author of Farming and the Countryside Social Geography Morven Archer is the author of Development and Health

Rural Poverty and Degradation of Natural Resources in Ghana Alex Obeng Somuah, Edward Debrah Wiafe, 2016 The origin of rural poverty is complex and multidimensional Some aspects of this origin include culture climate gender markets and public policy Similarly the rural poor population is quite diverse both in the problems they face and the possible solutions to those problems This book examines nature and characteristics of rural poverty and how it develops its persistence and how it has caused destruction to environmental resources The quest for global stability and peace has placed poverty issues at the centre of deliberation In the year 2000 the eight Millennium Development Goals MDGs directly addressed the problem of poverty and its alleviation Natural resources degradation is usually understood in terms of over use of scarce non renewable and potentially renewable resources It entails damage or destruction of key natural resources such as soils and forests and the subsequent production of wastes Low income rural dwellers have much lower levels of consumption than middle and upper income groups but occupy much more land per person than middle and upper income groups Yet low income groups consume less food and generally have diets that are less energy and land intensive than higher income groups However low income populations deplete natural resources for settlements farming and extraction of resources for many urban dwellers This book has created the linkages between poverty in rural areas and environmental resources degradation It draws conclusions from examples from all over the world and emphasises on a case study in rural Ghana This book is recommended for academicians rural development professionals environmentalists and the general public

Economics of Land Degradation and Improvement - A Global Assessment for Sustainable Development Ephraim Nkonya, Alisher Mirzabaev, Joachim von Braun, 2016-08-23 This volume deals with land degradation which is occurring in almost all terrestrial biomes and agro ecologies in both low and high income countries and is stretching to about 30% of the total global land area About three billion people reside in these degraded lands However the impact of land degradation is especially severe on livelihoods of the poor who heavily depend on natural resources The annual global cost of land degradation due to land use and cover change LUCC and lower cropland and rangeland productivity is estimated to be about 300 billion USD Sub Saharan Africa SSA accounts for the largest share 22% of the total global cost of land

degradation Only about 38% of the cost of land degradation due to LUCC which accounts for 78% of the US 300 billion loss is borne by land users and the remaining share 62% is borne by consumers of ecosystem services off the farm The results in this volume indicate that reversing land degradation trends makes both economic sense and has multiple social and environmental benefits On average one US dollar investment into restoration of degraded land returns five US dollars The findings of the country case studies call for increased investments into the rehabilitation and restoration of degraded lands including through such institutional and policy measures as strengthening community participation for sustainable land management enhancing government effectiveness and rule of law improving access to markets and rural services and securing land tenure The assessment in this volume has been conducted at a time when there is an elevated interest in private land investments and when global efforts to achieve sustainable development objectives have intensified In this regard the results of this volume can contribute significantly to the ongoing policy debate and efforts to design strategies for achieving sustainable development goals and related efforts to address land degradation and halt biodiversity loss

Environmental Protection Through Rural Land Laws Mitike Worku, 2020-02-18 Thesis M A from the year 2018 in the subject Politics Environmental Policy University of Gondar course law language English abstract Using qualitative method this study tries to find out whether the ANRS rural land laws normative and institutional frameworks and their enforcement mechanisms are adequate or not in protecting environmental degradation in rural areas of South Wollo Zone Ethiopia Legal provisions of the ANRS rural land laws which deal with unlimited land use right limited land distribution land right registration and certification obligations to conserve and protect the land expropriation for environmental purpose incentive and the existence of legal remedy will encourage the zone s rural environmental protection However this does not mean that such laws are comprehensive rather such laws fails to comprise all possible obligations of land users lacks clarity and provided in general terms with weak remedies There is also no cooperation mechanism or forum among stockholders in the areas of rural land administration and environmental protection Much attention is given to land administration issues than environmental protection Environmental degradation related to rural land in Ethiopia in general and in ANRS in particular is reflected in the form of land degradation loss and degradation of water resources deforestation as well as decline and or loss of biodiversity Ethiopia has designed a number of environmental laws But such laws suffer from various defects which affect their ability to promote environmental protection So efforts to use laws to protect the rural environment should look beyond just environmental statutes Therefore seeking a solutions and studying rural land administration laws will be helpful to defy land degradation in rural areas The rural land and environmental protection institution also lack financial material and manpower capacities which hold back to carry out its duties Due to these reasons the rural land administration and environmental protection institutional setup of the Zone remains inadequate to properly protect the rural environment In relation to rural land environmental protection the ANRS rural land laws are practically not enforced in the zone due to the

legal gap and unclear less insufficient and political will to enforce the rural land laws So the rural land environment of the South Wollo Zone remains in peril so long as there is no effective and enforced rural land law government commitment and well designed empowered and coordinated institutions

Marginality Joachim von Braun, Franz W. Gatzweiler, 2013-08-19 This book takes a new approach on understanding causes of extreme poverty and promising actions to address it Its focus is on marginality being a root cause of poverty and deprivation Marginality is the position of people on the edge preventing their access to resources freedom of choices and the development of capabilities The book is research based with original empirical analyses at local national and local scales book contributors are leaders in their fields and have backgrounds in different disciplines An important message of the book is that economic and ecological approaches and institutional innovations need to be integrated to overcome marginality The book will be a valuable source for development scholars and students actors that design public policies and for social innovators in the private sector and non governmental organizations

Rural Land Degradation in Australia A. J. Conacher, Jeanette Conacher, 1995 Rural Land Degradation in Australia examines the degradation of Australia s ecosystems the problems associated with the increasing use of synthetic chemicals and the direct and underlying causes of land degradation It also looks at broader social and economic implications and places the nature of the overall problem in its global context The final chapter evaluates some solutions to the range of problems identified Students of geography agriculture environmental science and rural planning along with anyone interested in an objective appraisal of land degradation will find this an engaging accessible and informative book

Linkages Between Land Management, Land Degradation, and Poverty in Sub-Saharan Africa Nkonya, Ephraim, Pender, John, Kaizzi, Kayuki C., Kato, Edward, Mugarura, Samuel, Ssali, Henry, Muwonge, James, 2008-01-01 Most African countries strive for both poverty reduction and sustainable land management yet information on the exact relationship between these goals is limited This report seeks to fill the gap by demonstrating a strong linkage between poverty and land management Using Uganda as a case study the authors show that certain policies such as investments in soil and water conservation and agroforestry may simultaneously increase productivity and reduce poverty and land degradation Other strategies including development of rural roads non farm activities and rural finance may reduce poverty without significantly affecting productivity or land management Some policies however will likely involve trade offs among different goals and will need to have their negative impacts minimized Those in government NGOs the private sector or academia who are concerned about sustainably reducing poverty in Sub Saharan Africa will benefit from this analysis of how to pursue these key development goals

Halting Degradation of Natural Resources Jean-Marie Baland, Jean-Philippe Platteau, 1996 Stress is then laid on the global context within which user groups operate including the nature and the forms of state intervention and the effects of increasing market integration To date this context has generally been uncongenial to community based resource management therefore the authors recommend that whenever a co management approach is feasible the concrete institutional form adopted is

tailored to the specific features of local cultures *International Development* Bruce Currie-Alder, Ravi Kanbur, David M. Malone, Rohinton Medhora, 2014 A central premise is that an objective and universally accepted measure of success in development and paths to it does not exist *Rural Land Degradation in Australia*, 1996 **Environment, Climate, Plant and Vegetation Growth** Shah Fahad, Shah Saud, Taufiq Nawaz, Liping Gu, Mushtaq Ahmad, Ruanbao Zhou, 2024-10-26 The book provides currently available information on the changing climate and its impact on functional and adaptive features of plants The book also cover cutting edge research on key determinants of plant growth that provides a direction towards execution of programs and practices that will assist resilience of crop production systems to the changing climate This book will represent the updated scientific information regarding soil and plant productivity under changing climate which will be beneficial to academics and researchers working on climate change agronomy stress physiology biotechnology It provides an in depth discussion on the latest techniques to enhance plant responses to new environmental conditions that can be directly applied on field Rural and Regional Futures Anthony Hogan, Michelle Young, 2014-09-19 Agriculture mining and related rural industries have been central to the development of Australia s economy This book details the role that the Australian Government has played in the making of rural and regional Australia particularly since World War II The book reviews these policies and evaluates them with regards the commitments undertaken by the Government to contribute towards vibrant rural communities Policy areas addressed include agriculture water education welfare and population natural resource management resource extraction Indigenous and affairs localism rural research and regional innovation Youth Affairs and the devolution of regional governance Overall two distinct policy strategies can be observed one wherein the government saw its role as part of the entrepreneurial state and a sector wherein government has increasingly taken itself out of industry development leaving this role to the market Having considered these strategies and their impacts the book concludes that policy over the past 40 years has not in fact contributed to a more vibrant prosperous rural and regional Australia Rural and Regional Futures concludes with several chapters looking to the future One chapter explores what the role of the state can be within a social market economy while the final chapter gives consideration to the initial steps rural communities will need to take to begin the process of revitalisation While these materials present as a case study of developments in Australia the policy shift from the Government as entrepreneur to a focus on markets is an international one and as such the insights offered by this book will have wide appeal **Multifunctional Rural Land Management** Floor Brouwer, C. Martijn van der Heide, 2012-05-16 The increasing demand for rural land and its natural resources is creating competition and conflicts Many interested parties including farmers nature conservationists rural residents and tourists compete for the same space Especially in densely populated areas agriculture recreation urban and suburban growth and infrastructure development exert a constant pressure on rural areas Because land is a finite resource spatial policies which are formulated and implemented to increase the area allocated to one use imply a decrease in land available for other uses As a result at many

locations multi purpose land use is becoming increasingly important This notion of multi purpose land use is reflected in the term multifunctionality This volume provides insights into viable strategies of sustainable management practices allowing multiple functions sustained by agriculture and natural resources in rural areas It shows how the rural economy and policies can balance and cope with these competing demands and includes numerous case studies from Europe North America and developing countries

Land Degradation and Desertification Abiud Kaswamila, 2016-10-26 Land degradation which is caused by multiple forces extreme weather conditions and anthropogenic activities that pollute or degrade the quality of soils and land utility negatively affects food production livelihoods and the provision of other ecosystem goods and services Land degradation can also lead to climate change and affect human health The problem is more pronounced in least developing countries due to overdependence of natural resources for survival Sustainable ways to reduce land degradation and desertification demand research and advocacy of sustainable land management practices This book is organized into two sections The first section covers three major aspects viz an understanding of patterns of land degradation and desertification for developing mitigation strategies land atmosphere interaction from response of land cover to climate change effects of Karst rocky desertification and the effect of unprecedented human activity into land degradation and desertification processes using natural and human induced landscape research The last section dwells on the relationship between soil degradation and crop production and an examination on how land degradation impacts the quality of soil in communal rangelands Environmentalists land use planners ecologists pedologists researchers and graduate students will find this book to be an essential resource

The Rural Richard Munton, 2017-05-15 The rural has long been regarded as an important site of geographical inquiry even if our understanding of it has not always been treated as conceptually different from the urban That said rural research has pursued a number of distinct empirical agendas ranging from the operation and impacts of agribusiness to local resistance to global food supply chains to differing representations of the rural In doing so rural geographers have critically examined the relevance and significance of ideas drawn from numerous traditions including political economy ecological modernization and cultural theory amending them as appropriate in their search to understand the nature and trajectory of rural areas Up until the 1980s attention remained largely focused upon agriculture as the primary land use but increasingly new forms of rural consumption housing recreation nature conservation have taken centre stage as the primacy of local agricultures has been undermined by reduced state protection and new rural populations which have migrated out from the city More recently research has been dominated by the cultural turn with particular emphases upon society nature relations interpretations of landscape marginalised others and analyses of the relations between representation and practice In the last decade a more holistic view of the rural bringing together different aspects of the two previous themes has emerged through more politically oriented studies of rural governance concerned with the functioning of interest groups participation protest and the allocation and management of resources The volume is thus structured into

three sections concerned with agriculture and food the rural and rural governance The great majority of the selected papers combine both empirical material often highly informative case studies and important conceptual arguments about change in the rural condition that can be linked to ideas being employed elsewhere in Geography and the Social Sciences more generally These critical reflections have been drawn very largely from research conducted in advanced economies which at least provide some commonality of experience allowing the transfer of ideas between what otherwise might be seen as very differing geographical contexts Rural Land Change and the Capacity for Ecosystem Conservation and Sustainable Production in North America Alisa W. Coffin, Mark A. Drummond, David R. Huggins, Fardausi Akhter, 2022-04-26

Response to Land Degradation E M Bridges, 2019-04-24 This work is intended for advanced readers interested in methods of sustainable land management the prevention and control of land degradation It offers a coherent view of the situation concerning land degradation and the human response to the problem It is generally recognized that technological solutions alone cannot solve the problems of land degradation This book discusses the role of land use and land management policies programmes institutional innovations and economic incentives for the control and prevention of land degradation Special attention is given to legal issues at the international level and in individual countries **Microbial Endophytes**

Encyclopedia of Natural Hazards Peter T. Bobrowsky, 2013-04-03 Few subjects have caught the attention of the entire world as much as those dealing with natural hazards The first decade of this new millennium provides a litany of tragic examples of various hazards that turned into disasters affecting millions of individuals around the globe The human losses some 225 000 people associated with the 2004 Indian Ocean earthquake and tsunami the economic costs approximately 200 billion USD of the 2011 Tohoku Japan earthquake tsunami and reactor event and the collective social impacts of human tragedies experienced during Hurricane Katrina in 2005 all provide repetitive reminders that we humans are temporary guests occupying a very active and angry planet Any examples may have been cited here to stress the point that natural events on Earth may and often do lead to disasters and catastrophes when humans place themselves into

situations of high risk Few subjects share the true interdisciplinary dependency that characterizes the field of natural hazards From geology and geophysics to engineering and emergency response to social psychology and economics the study of natural hazards draws input from an impressive suite of unique and previously independent specializations Natural hazards provide a common platform to reduce disciplinary boundaries and facilitate a beneficial synergy in the provision of timely and useful information and action on this critical subject matter As social norms change regarding the concept of acceptable risk and human migration leads to an explosion in the number of megacities coastal over crowding and unmanaged habitation in precarious environments such as mountainous slopes the vulnerability of people and their susceptibility to natural hazards increases dramatically Coupled with the concerns of changing climates escalating recovery costs a growing divergence between more developed and less developed countries the subject of natural hazards remains on the forefront of issues that affect all people nations and environments all the time This treatise provides a compendium of critical timely and very detailed information and essential facts regarding the basic attributes of natural hazards and concomitant disasters The Encyclopedia of Natural Hazards effectively captures and integrates contributions from an international portfolio of almost 300 specialists whose range of expertise addresses over 330 topics pertinent to the field of natural hazards Disciplinary barriers are overcome in this comprehensive treatment of the subject matter Clear illustrations and numerous color images enhance the primary aim to communicate and educate The inclusion of a series of unique classic case study events interspersed throughout the volume provides tangible examples linking concepts issues outcomes and solutions These case studies illustrate different but notable recent historic and prehistoric events that have shaped the world as we now know it They provide excellent focal points linking the remaining terms in the volume to the primary field of study This Encyclopedia of Natural Hazards will remain a standard reference of choice for many years
