Ruralurban Migration And Its Impact On Economic Development In China:

Rural-urban Migration and Its Impact on Economic Development in China Wenbao Qian,1996 **Rural-Urban Migration and Agro-Technological Change in Post-Reform China** Lena Kaufmann,2021-02-19 How do rural Chinese households deal with the conflicting pressures of migrating into cities to work as well as staying at home to preserve their fields This is particularly challenging for rice farmers because paddy fields have to be cultivated continuously to retain their soil quality and value Drawing on ethnographic fieldwork and written sources this book describes farming households strategic solutions to this predicament It shows how in light of rural urban migration and agro technological change they manage to sustain both migration and farming It innovatively conceives rural households as part of a larger farming community of practice that spans both staying and migrating household members and their material world Focusing on one exemplary resource paddy fields it argues that socio technical resources are key factors in understanding migration flows and migrant home relations Overall this book provides rare insights into the rural side of migration and farmers knowledge and agency **Rural Urban Migration and Policy Intervention in China** Li Sun,2018-06-26 This book examines rural urban migration policies in China and considers how Chinese workers cope with migration events in the context of these policies It explores the contribution of migrant workers to the Chinese economy the impact of changes within the hukou system household registration and the impact of recent migration policies promoting rural urban migration and targeting key events during migrant workers migration trajectories job seeking wage exploitation work injuries and illness namely the corresponding Skills Training Program for Migrant Workers the Circular on Managing Wage Payment to Migrant Workers the Circular on Migrant Workers Participating in Work Related Injury Insurance and the New Rural Medical Cooperative Scheme Health Insurance Through in depth interviews it examines how when facing such challenges migrant workers choose to either make a claim under existing policies or use other coping strategies The book notably proposes a typology of coping which includes a variety of administrative coping political coping and social coping and considers how workers in China harness the power of civil groups and social networks Rural-urban Migration in Developing Countries Somik V. Lall,Harris Selod,2006 The migration of labor from rural to urban areas is an important part of the urbanization process in developing countries Even though it has been the focus of abundant research over the past five decades some key policy questions have not found clear answers yet To what extent is internal migration a desirable phenomenon and under what circumstances Should governments intervene and if so with what types of interventions What should be their policy objectives To shed light on these important issues the authors survey the existing theoretical models and their conflicting policy implications and discuss the policies that may be justified based on recent relevant empirical studies A key limitation is that much of the empirical literature does not provide structural tests of the theoretical models but only provides partial findings that can support or invalidate intuitions and in that sense support or invalidate the policy implications of the models

The authors broad assessment of the literature is that migration can be beneficial or at least be turned into a beneficial phenomenon so that in general migration restrictions are not desirable They also identify some data issues and research topics which merit further investigation World Bank web site *The Great Urbanization of China* Ding Lu,2012 As China rises to become the world s largest economy it is expected to alleviate half a billion people from being rural villagers to urban residents in the coming decades The great urbanization of the world s most populated country is sure to be one of the most remarkable social economic events in the 21st century This book aims to give the reader a clear and comprehensive review of this unfolding event It not only presents a historical review of the evolution of public policies and institutional reforms regarding urban development but also an up to date survey and in depth analysis of various social economic forces that define and contribute to the process of urbanization The target audiences include students of modern China and professionals interested in China s urban development The general public as well as scholars may also find the book informative and fascinating **Understanding China's Urbanization** Li Zhang,Richard LeGates,Min Zhao,2016-03-25 China s urbanization is one of the great earth changing phenomena of recent times The way in which China continues to urbanize will have a critical impact on the world economy global climate change international relations and a host of other critical issues Understanding and responding to China s urbanization is of paramount importance to everyone This book represents a unique exploration of the demographic spatial economic and social aspects of China s urban transformation Based on years of fieldwork and data analysis from different types of cities and towns in every region of China the authors present a detailed description of how China has urbanized since 1978 and an original theory about the way in which top down and bottom up policies have impacted urbanization They describe China s on going urbanization process as a double dual transformation from a planned economy to a more market oriented one and from a concern with the quantity to the quality of urbanization In doing so the authors provide the most comprehensive and up to date book on Chinese urbanization to date This scholarly study will appeal to academics and practitioners including professors and postgraduate students of urban studies planning geography Asian studies and other social science disciplines and professional fields concerned with cities and urban development Professionals involved in international development particularly in China and elsewhere in Asia will be particularly interested in the book **Migration and Urbanization in China** Lincoln H. Day,Ma Xia,2019-07-25 Based upon an analysis of a national survey of migration conducted in late 1986 by the Chinese Academy of Social Sciences this book provides analyses of the volume and direction of movement the characteristics and motivation of those who move and the consequences of their moving *Rural Urban Migration and Its Impact on Economic Development* Wenbao Qian,1994 *Rural-urban Migration in China* Gordon McGranahan,Cecilia Tacoli,2006 **The Great Migration** Xin Meng,Chris Manning,Li Shi,Tadjuddin Noer Effendi,2010 In the next two decades approximately two thirds of the rural labour force will migrate to urban areas in China and Indonesia While both countries face similar challenges the policies

implemented and the consequences of these policies are very different This book examines and compares this large population movement

Urban China World Bank, 2014-07-29 In the last 30 years China's record economic growth lifted half a billion people out of poverty with rapid urbanization providing abundant labor cheap land and good infrastructure While China has avoided some of the common ills of urbanization strains are showing as inefficient land development leads to urban sprawl and ghost towns pollution threatens people's health and farmland and water resources are becoming scarce With China's urban population projected to rise to about one billion or close to 70 percent of the country's population by 2030 China's leaders are seeking a more coordinated urbanization process Urban China is a joint research report by a team from the World Bank and the Development Research Center of China's State Council which was established to address the challenges and opportunities of urbanization in China and to help China forge a new model of urbanization The report takes as its point of departure the conviction that China's urbanization can become more efficient inclusive and sustainable However it stresses that achieving this vision will require strong support from both government and the markets for policy reforms in a number of areas The report proposes six main areas for reform first amending land management institutions to foster more efficient land use denser cities modernized agriculture and more equitable wealth distribution second adjusting the hukou household registration system to increase labor mobility and provide urban migrant workers equal access to a common standard of public services third placing urban finances on a more sustainable footing while fostering financial discipline among local governments fourth improving urban planning to enhance connectivity and encourage scale and agglomeration economies fifth reducing environmental pressures through more efficient resource management and sixth improving governance at the local level

From Farm to Firm, 2011 The process of rural urban transformation presents both opportunities and challenges for development If managed effectively it can result in growth that benefits everyone if managed poorly it can lead to stark welfare disparities and entire regions cut off from the advantages of agglomeration economies The importance of rural urban transition has been confirmed by two consecutive World Development Reports WDR 2008 Agriculture for Development and WDR 2009 Reshaping Economic Geography Focusing on Sub-Saharan Africa and South Asia this book picks up where the WDRs left off investigating the influence of country conditions and policies on the pace pattern and consequences of rural urban transition and suggesting strategies to ensure that its benefits result in shared improvements in well-being The book uncovers vast inequalities whether between two regions of one country between rural and urban areas or within cities themselves The authors find little evidence to suggest that these inequalities will automatically diminish as countries develop empirical and qualitative analysis suggests that spatial divides are mainly a function of country conditions policies and institutions By implication policymakers must take active steps to ensure that rural urban transition results in shared growth Spatially unbiased provision of health and education services is crucial to ensuring that the benefits of transition are shared by all But connective infrastructure and targeted interventions also

emerge as important considerations even in countries with severely constrained fiscal and administrative capacity The authors suggest steps for navigating the tricky political economy of land reforms And they alert readers to potential spillover effects that mean that policies designed for one space can have unintended consequences on another Policymakers and development experts as well as anyone concerned with the impact of rural urban transition on growth and equity will find this book a thought provoking and informative read Urban China Xuefei Ren,2013-04-23 Currently there are more than 125 Chinese cities with a population exceeding one million The unprecedented urban growth in China presents a crucial development for studies on globalization and urban transformation This concise and engaging book examines the past trajectories present conditions and future prospects of Chinese urbanization by investigating five key themes governance migration landscape inequality and cultural economy Based on a comprehensive evaluation of the literature and original research materials Ren offers a critical account of the Chinese urban condition after the first decade of the twenty first century She argues that the urban rural dichotomy that was artificially constructed under socialism is no longer a meaningful lens for analyses and that Chinese cities have become strategic sites for reassembling citizenship rights for both urban residents and rural migrants The book is essential reading for students and scholars of urban and development studies with a focus on China and all interested in understanding the relationship between state capitalism and urbanization in the global context **Migration, Development and Poverty Reduction in Asia** Iom International Organization For Migration,2008

Contemporary Developments and Issues in China's Economic Transition C. Harvie,2000-04-18 As a prospective economic giant in the next century developments in the Chinese economy are of significance to the global economy This book consists of contributions concerned with analysing contemporary developments and issues facing the country after two decades of economic reform and key policies which will exert a profound influence upon the country s prospective growth and development momentum into the next millennium This well researched book although comprehensive in its coverage is succinct and very readable and will be of interest to scholars and students of developing and transitional economies business practitioners and policy makers *Urbanization and Social Welfare in China* Gordon G. Liu,2018-01-18 China s urban population growth rate has doubled in the past 20 years and the Chinese government has made further urbanization a developmental priority How Chinese cities cope with such rapid population increases has become a question of critical concern This book provides an analysis of the welfare implications of China s urbanization the development of the labour market including migration between rural and urban sectors and natural and social environmental issues arising from urbanization The book covers both academic and policy perspectives and together with its sister volume *Urban Transformation in China* brings together a comprehensive and multi disciplinary overview of China s urbanization

Northeast Migrants in Delhi Duncan McDuie-Ra,2012 The Northeast border region of India is a crossroads of Southeast Asia where India meets China and the Himalayas and home to many ethnic minorities from across the continent The area is

also the birthplace of a number of secessionist and insurgent movements and a hotbed of political fervor and violent instability In this trailblazing new study Duncan McDuie Ra observes the everyday lives of the thousands of men and women who leave the region every year to work study and find refuge in Delhi He examines how new migrants navigate the rampant racism harassment and even violence they face upon their arrival in Delhi But McDuie Ra does not paint them simply as victims of the city but also as contributors to Delhi s vibrant community and increasing cosmopolitanism India s embrace of globalization has created employment opportunities for Northeast migrants in many capitalistic enterprises shopping malls restaurants and call centers They have been able to create their own map of Delhi and their own communities within the larger and often unfriendly one of the metropolis
