Ruskin himself or by his profoundly important ideas What if anything do they know about him How is what they do or think linked to the vivid difficult but often prophetic pronouncements he made about the way our modern world should look live work and think As important where and why have his ideas been swept away or displaced sometimes by buildings developments and practices that Ruskin himself would have abhorred Part travelog part quest part unconventional biography this book will attempt to map Ruskinland a place where two centuries after John Ruskin's birth more of us live than we know

D. Anthony, 1983 John Ruskin was one of the great Victorians established while still young as an arbiter of taste in painting and architecture and as one of the greatest of all writers of English prose When he was forty he decided to abandon the field in which his reputation had been secured in order to awaken the world to the peril of devastation which he believed would follow its preoccupation with profit and its subservience to a false economic doctrine He regarded his social criticism as a duty reluctantly accepted to a society which had abandoned the traditional and religious values that had been the foundation of its civilization Ruskin's labour to which he devoted the rest of his life was to bring a searching intelligence considerable learning and a moral concern to providing a ruthless criticism of the values of Victorian England      The Lamp of Beauty John Ruskin, 1959      *The Architectural Novel* Nicola Minott-Ahl, 2021-09-22 Scholars in disciplines from architecture and the fine arts to the various branches of history and social studies will find this study timely given contemporary European controversies over what constitutes national identity and what parts are played by race philosophy and religion economics immigration and invasion Many major European national identities barely predate the nineteenth century and were shaped not just by wars philosophies industrial change and governmental policies but also by artistic manipulation of how people perceived public spaces landscapes cityscapes religious and cultural structures museums and monuments commemorating conflict Among the most masterful manipulators of the day were popular nineteenth century French and British novelists who gave famous buildings a special prominence in their writing Some like Victor Hugo are still read and respected by scholars Others like Alexandre Dumas though still widely read are undervalued by contemporary critics Still others like William Harrison Ainsworth a prolific English writer are all but forgotten These three writers authored architectural novels which gave major ancient Gothic buildings a new and portable cultural presence well beyond their physical location During these revolutionary times when national symbolism was being questioned and challenged the threatened rupture with the past was admirably addressed through their art      **Building Ruskin's Italy** Stephen Kite, 2017-07-05 Based on extensive fieldwork and research into John Ruskin's still little interpreted archival material notebooks and drawings in the Ruskin Library Lancaster University UK and elsewhere Stephen Kite offers an unprecedented account of the evolution of Ruskin's architectural thinking and observation

in the context of Italy where his watching of building achieved its greatest intensity Venice naturally figures large in a work that also examines other key sites including Verona Lucca Pisa Florence Milan and Monza here the fabrics are vividly read in their contexts against the rich evidence of Ruskin's diaries his pocket book sketches architectural worksheets drawings and daguerrotypes the early form of photography and the drafts and published editions of the texts Kite presents the complex story of Ruskin's visual thinking in architecture as a narrative of deepening interpretation and representation focusing on the humbler monuments of Italy He shows how Ruskin's early picturesque naturalism was transformed by the realisation that to understand the built realities confronting him in Italy demanded a closer engagement with the substance of the stones themselves reflecting Ruskin's sense of his task as a near archaeological gleaning and gathering of remains hidden in many a grass grown court and silent pathway and lightless canal
