Holland,1982 **John Ruskin and the Fabric of Architecture** Anuradha Chatterjee,2017-10-02 Through the theoretical lenses of dress studies gender science and visual studies this volume analyses the impact John Ruskin has had on architecture throughout the nineteenth and twentieth centuries It explores Ruskin s different ideologies such as the adorned wall veil which were instrumental in bringing focus to structures that were previously unconsidered John Ruskin and the Fabric of Architecture examines the ways in which Ruskin perceives the evolution of architecture through the idea that architecture is surface The creative act in architecture analogous to the divine act of creation was viewed as a form of dressing By adding highly aesthetic features to designs taking inspiration from the veil of women s clothing Ruskin believed that buildings could be transformed into meaningful architecture This volume discusses the importance of Ruskin s surface theory and the myth of feminine architecture and additionally presents a competing theory of textile analogy in architecture based on morality and gender to counter Gottfried Semper s historicist perspective This book would be beneficial to students and academics of architectural history and theory gender studies and visual studies who wish to delve into Ruskin s theories and to further understand his capacity for thinking beyond the historical methods The book will also be of interest to architectural practitioners particularly Ruskin s theory of surface architecture **Louis H. Sullivan and a 19th-Century Poetics of Naturalized Architecture** LaurenS. Weingarden,2017-07-05 For most of the twentieth century modernist viewers dismissed the architectural ornament of Louis H Sullivan 1856 1924 and the majority of his theoretical writings as emotional outbursts of an outmoded romanticism In this study Lauren Weingarden reveals Sullivan s eloquent articulation of nineteenth century romantic practices literary linguistic aesthetic spiritual and nationalistic and thus rescues Sullivan and his legacy from the narrow role imposed on him as a pioneer of twentieth century modernism Using three interpretive models discourse theory poststructural semiotic analysis and a pragmatic concept of sign functions she restores the integrity of Sullivan s artistic choices and his historical position as a culminating figure within nineteenth century romanticism By giving equal weight to Louis Sullivan s writings and designs Weingarden shows how he translated both Ruskin s tenets of Gothic naturalism and Whitman s poetry of the American landscape into elemental structural forms and organic ornamentation Viewed as a site where various romantic discourses converged Sullivan s oeuvre demands a cross disciplinary exploration of each discursive practice and its rules of accumulation exclusion reactivation The overarching theme of this study is the interrogation and restitution of those Foucauldian rules that enabled Sullivan to articulate architecture as a pictorial mode of landscape art which he considered co equal with the spiritual and didactic functions of landscape poetry **Architecture** Henry-Russell Hitchcock,1987-01-01 This book examines a period which is far more than a prelude to the age of steel and concrete The first half century culminated in the bold iron and glass of the Crystal Palace There follows the creation of the

Ruskin & Architecture Rebecca Daniels, Geoffrey K. Brandwood, 2003 John Ruskin exerted a powerful and pervading influence on architects and architecture in the nineteenth century and his legacy can still be felt today His highly individual and idiosyncratic prose encouraged the lay person to look and think about architecture and he covered strands as diverse as the choice of style the use of polychromy the relations between the workman and his work and even between politics and the arts In this book leading experts in Ruskin and architectural history re-examine these and numerous other issues often providing wholly new insights into the man his writings and his influence upon architecture and the cultural landscape of his day and since The essays that make up this substantial and richly illustrated book shed new and revealing light on the wide ranging and profound influence of this great writer and thinker on architecture

Charles Eliot Norton Linda C. Dowling, 2007 Author translator social critic and Harvard professor of art Charles Eliot Norton was widely regarded in his own day as the most cultivated man in America In modern times by contrast he has been condemned as the supercilious representative of an embattled patrician caste This revisionary study argues that Norton's genuine significance for American culture and politics today can only be grasped by recovering the vanished contexts in which his life and work took shape In a wide ranging analysis Linda Dowling demonstrates the effects upon Norton's thought of the great transatlantic humanitarian reform movement of the 1840s the Pre Raphaelite and Ruskinian revolution in art and architecture of the 1850s and the surging liberal optimism that emerged

from the Civil War Drawing on numerous deleted passages from Norton's manuscript journals Dowling probes beneath the imperturbable mask of the public Norton bringing to light the elusive private man Returning from Europe in 1873 bereft of his wife and stripped of his religious belief Norton was compelled to confront the painful contradictions within his own liberal political faith In a land given to celebrating freedom of speech Norton would become a speaker subjected to physical threats for opposing the Spanish American War Among a people given to glorying in its superiority to other civilizations he would become a social critic reviled for arguing that the nation was failing to live up to its own most cherished ideals It would be Norton's misfortune shared with others of his generation to watch the golden promise of a victorious war for the Union fade into the unrepentant cynicism of the Gilded Age Yet Norton's militant idealism and heroic citizenship Dowling argues survive now as a vital parable for American civic liberalism in the present day *The Shop* Richard Joseph Wheeler Selleck, 2003 Telling as much a social educational and cultural story as institutional history this detailed account chronicles the ideological patterns internal and countrywide conflicts and student experiences at the University of Melbourne from 1850 to 1939 The daily life of staff professors and students are recounted during times of turmoil and peace in Australia including the depression of the 1890s and World War I The account offers a window into the pedagogical conflicts and research achievements of one of Australia's oldest continuing educational institutions **Marble Palaces, Temples of Art** Ingrid A. Steffensen-Bruce, 1998 The era from 1890 to 1930 constituted a building boom for American art museums designed in a monumental classical style both the proliferation of the buildings and the ubiquity of the style seem to indicate an architectural as well as a sociocultural phenomenon The present work is an attempt to place the American art museum building of this period into its historical milieu and employs over one hundred illustrations and sociocultural analysis to explain the significance of both the institutions and the structures housing them to those who came into regular contact with them including architects patrons journalists and museum personnel Lady Trevelyan and the Pre-Raphaelite Brotherhood John Batchelor, 2011-12-31 An entertaining account of an extraordinary cultural and historical event the establishment by one highly intelligent woman of a salon of the arts in a beautiful country house in Northumberland Wallington Hall was remote from the major centres of artistic activity such as London and Edinburgh Yet Pauline Trevelyan single handedly made it the focus of High Victorian cultural life Among those she attracted into her orbit were Ruskin Swinburne the Brownings the Rossettis Dante Gabriel Christina and William Michael Carlyle and Millais and other members of the Pre Raphaelite Brotherhood The penniless but clever daughter of a clergyman Pauline Jermyn married an older man whom she met through a shared passion for geology Sir Walter Trevelyan was a philanthropist teetotal vegetarian pacifist and very rich With his encouragement she collected works of art and decorated Wallington Hall with a cycle of vast paintings on the history of Northumberland She was a patron of the arts who provided a fostering environment for many of the geniuses of her day After her death Swinburne wept every time her name was mentioned **John Phillips and the Business of Victorian Science**

Jack Morrell, 2017-11-28 John Phillips was one of the most remarkable and important scientists of the Victorian period. Orphaned at the age of seven and brought up by his uncle, he rose to hold a number of highly prestigious posts within the British academic and scientific community despite lacking a university education. By the time of his death in 1874, he was widely regarded as one of the pioneers and champions of the science of geology. Yet until now there has been no full-length biography of Phillips. In rectifying this lacuna, Jack Morrell has produced a meticulous and magisterial piece of scholarship that does justice to the achievements and legacy of John Phillips. Adopting a broadly chronological approach, the book not only traces the development of Phillips's career but clarifies and highlights his role within Victorian culture, shedding light on many wider themes. It explores how Phillips' love of science was inseparable from his need to earn a living and develop a career which could sustain him. Hence questions of power, authority, reputation, and patronage were central to Phillips's career and scientific work. Drawing on a wealth of primary sources and a rich body of recent writings on Victorian science, this biography provides a fascinating and compelling account of John Phillips and his legacy. Pulling together his personal story with the scientific theories and developments of the day and fixing them firmly within the context of wider society, this biography will be vital reading for anyone with an interest in the history of British and nineteenth-century science.

Science and Visual Culture in Great Britain in the Long Nineteenth Century Diana Donald, 2024-10-07 This volume consists of a collection of primary sources throwing light on the various aspects of interplay between zoology and visual culture in nineteenth-century Britain. Scientific illustration, both in specialist studies and in works intended for a broader lay readership, are included. These sources throw light on the difficulties of both authors and illustrators in conceptualising their subjects in visual forms given the great extension of knowledge of the natural world and the technical complexities of image making in the pre-photographic era. The study examines the impact of zoological knowledge and theories on imaginative art and explores the aestheticisation and appropriation of nature, especially in relation to bird imagery in painting, illustration, and the decorative arts. Finally, the collection examines the presentation of zoology and palaeozoology to the general public for both education and entertainment purposes. This title will be of great interest to students of the History of Science and Art History.
