Blinnikov, 2011-06-13 This book has been replaced by *A Geography of Russia and Its Neighbors* Second Edition ISBN 978 1 4625 4459 2 *Nations as Neighbors* Leonard Oscar Packard, Charles Peter Sinnott, 1925 **Europe and Russia** Heidi Hayes Jacobs, Michal L. LeVasseur, Brenda Randolph, Prentice Hall Direct Education Staff, Yvonne S. Gentzler, 2000-10 *Grasslands of the World* Victor R. Squires, Jürgen Dengler, Limin Hua, Haiying Feng, 2018-09-05 This book begins with a brief account of the extraordinary sequence of events that led to the emergence of grasslands as major vegetation formations that now occupy some of the driest and hottest and the highest and coldest on earth as well as vast steppes and prairies in more temperate climates. It is the story of grasses successfully competing with forests and woodlands aided and abetted by grazing herbivores and by humans and their use of fire as a tool. It is a story of adaptation to changing climates and the changing biophysical environments. A major focus of the book is the Palaearctic biogeographic realm that extends over some 45 million km² and thus more than 1/3 of the terrestrial ice-free surface on Earth. It comprises extensive grasslands of different types and origin which can be subdivided into 1 natural grasslands with 1a steppes climatogenic in dry climates 1b arctic alpine grasslands climatogenic in cold climates and 1c azonal and extrazonal grasslands pedogenic and topogenic as well as 2 secondary grasslands created and sustained by human activities such as livestock grazing mowing or burning. Grasslands of the Palaearctic do not only form a major basis for the agriculture of the region and thus its food supply but are also crucial for other ecosystem services and host a supra-proportional part of the realm's plant and animal diversity. To reflect that suitability of grasslands for biodiversity strongly depends on their state we apply the term High Nature Value grassland to those natural grasslands that are not degraded in good state and those secondary grasslands that are not intensified semi-natural. The situation in a variety of countries where grasslands are evolving under the influence of global climate change is also considered. Case studies are presented on Southern Africa Eastern Africa India China South America North America and Australia. The concluding chapter examines a set of themes arising from the chapters that make up the bulk of this book. The following provide a focus: recent history of grassland biomes brief recap of current thinking and recent trends with special reference to dry grasslands in the Palaearctic regions the current status of grasslands and germplasm resources biodiversity an overview management systems that ensure sustainability how to recover degraded grasslands socio-economic issues and

considerations in grassland management the impacts of environmental problems in grasslands such as future climate change and intensification and the problems prospects facing pastoralists and other grassland based livestock producers

Russia's Carnival Christoph Neidhart,2003 This colorfully drawn and acutely observed book explores Russia by engaging all our senses Today s Russia smells different from the Soviet Union The country looks and sounds different its touch is different and its food tastes different Thus Christoph Neidhart argues Russia is truly a changed country from the Soviet Union it was little more than a decade ago Russian society is rapidly urbanizing and modernizing as can be perceived

by all senses including the awareness of space and the conception of time After almost a century space can be privately owned and freely traded time too has become commodified New role models and new ways to express social status are emerging Russia has become a monetized economy as the old Soviet practice of provision by networking has grown obsolete Russia thus readies itself gradually to grow into a Western style middle class society with a free market and democratic polity The author assesses these rapid changes using the evocative metaphor of the carnival to understand the chaotic inversion of the Communist structure of society He explores the transition s traps and shortcomings such as the privatization of politics and the looting of the state s assets and compares this process to the modernization Western society underwent a century earlier
