Hot Spot: North America and Europe Joseph R. Rudolph Jr.,2008-06-30 Even in the relatively serene world of North America and Western Europe numerous conflicts with the propensity for sustained political violence are carried out by domestic groups with alarming regularity This in depth volume explores conflicts and potential hot spot areas in these regions from anti globalization protests to immigration politics to the Basque provinces and the ETA Coverage is divided into three regions the established democracies of the U S Canada and Western Europe the democratizing countries of post communist Europe and the more volatile region encompassing Russia the Balkans the Causasus and Post Soviet Eastern Europe for a greater understanding of geographic interrelationships This comprehensive volume is a first stop reference source for the most significant political cultural and economic conflicts in North America and Europe today *Words on Cassette* ,2000

**Conflict Hot Spots** Alex Braithwaite,2016-05-23 Militarized conflicts between states appear to occur repeatedly in the same geographic regions Both World Wars and a series of interstate disputes in the post Cold War system had their origins in the Balkans region of Eastern Europe This study introduces the concept of a conflict hot spot to the broader empirical literature on conflict processes It devotes considerable time to identifying the common causes and consequences of conflict hot spots across many regions globally offering a theoretical and empirical contribution to the emerging literature on the spatiality of conflict processes Rather than merely controlling for spatial dependence between episodes of conflict the book incorporates this spatial dependence within a series of models of conflict behaviours and is therefore able to directly model the process of conflict diffusion *The Concertation Impulse in World Politics* Andrew F. Cooper,2023-11-30 This book unravels the centrality of contestation over international institutions under the shadow of crisis Breaking with the widely accepted image in the mainstream US centric literature of an advance of global governance supported by pillars of institutionalized formality Andrew Cooper points to the retention of a habitual impulse towards concertation related to informal institutionalism Rather than endorsing the view that world politics is moving inexorably towards a multilateral rules based order he places the onus on the resilience of a hierarchical self selected concert model that combines a stigmatized legacy with the ability to reproduce in an array of associational formats Relying for conceptual guidance on the recovery of a valuable component in the intellectual contribution of Hedley Bull a compelling case is made that concertation represents a fundamental institution as a peer competitor to multilateralism In effect the debate over institutional design is recast away from an emphasis on utilitarian maximization towards a wider set of cardinal and highly contested questions the nature of rules at the global level the salience of institutional clubs and the meaning and impact of in equality and cooperation coordination among states across the incumbent West non incumbent Global South divide
