governance is highlighted with regard to the transformation of Soviet and Russian society over the last decades The empirical material presented here documents a number of processes within urban identity formation spatial representations and local politics The resulting findings add both empirically and theoretically to the knowledge of urban cultural geography in Russia a field of research that until recently was closed to Western researchers and seems currently to be closing again The book will be of interest to researchers with an interest in social semiotic and geographic theory as well as to students and researchers of cultural and urban studies urban life and Russian affairs The study could be also helpful to professionals working in fields related to post Soviet urban identity spatial representations and local politics **Human Geography** Erin H. and rural spatial development since the late nineteenth century The comparisons at the national level are then filled in with consideration of a number of Russian provinces oblasti and regions raiony Their research reveals the substantial negative impact of rural depopulation on the Russian agrarian economy Seventy original maps richly complement and support the narrative
