Union Catalog of the Graduate Theological Union Graduate Theological Union. Library, 1972 *The Code of Honor in Western Culture* Thomas J. Steele, 1998 **Myth and Mentality** Anna-Leena Siikala, 2002-05-15 The recent fascination in Finnish folklore studies with popular thought and the values and emotions encoded in oral tradition began with the realisation that the vast collections of the Finnish folklore archives still have much to offer the modern day researcher These archive materials were not only collected by scholars but also by the ordinary rural populace interested in their own traditions by performers and their audiences With its myriad voices this body of source material thus provides new avenues for the researcher seeking to penetrate popular thought What does oral tradition tell us about the way its performers think and feel What sorts of beliefs and ideas are transmitted in traditional songs and narratives Perspectives from the study of mentalities and cultural cognition research provide a framework for investigating these issues This collection of articles works from the premise that the cultural models which shape mentalities give rise to manifest expressions of culture including folklore These models also become embedded in the representations appearing in folklore and are handed down from one generation to the next The topics of the book cover age old myths and world views concepts of witchcraft and the Devil stretching back to the Middle Ages and the values and collective emotions of Finnish and Hungarian agrarian communities **Man and His Symbols** Carl G. Jung, 2012-02-01 The landmark text about the inner workings of the unconscious mind from the symbolism that unlocks the meaning of our dreams to their effect on our waking lives and artistic impulses featuring more than a hundred updated images that break down Carl G Jung s revolutionary ideas What emerges with great clarity from the book is that Jung has done immense service both to psychology as a science and to our general understanding of man in society The Guardian Our psyche is part of nature and its enigma is limitless Since our inception

humanity has looked to dreams for guidance But what are they How can we understand them And how can we use them to shape our lives There is perhaps no one more equipped to answer these questions than the legendary psychologist Carl G Jung It is in his life s work that the unconscious mind comes to be understood as an expansive rich world just as vital and true a part of the mind as the conscious and it is in our dreams those personal integral expressions of our deepest selves that it communicates itself to us A seminal text written explicitly for the general reader *Man and His Symbols* is a guide to understanding our dreams and interrogating the many facets of identity our egos and our shadows the dark side of our natures Full of fascinating case studies and examples pulled from philosophy history myth fairy tales and more this groundbreaking work profusely illustrated with hundreds of visual examples offers invaluable insight into the symbols we dream that demand understanding why we seek meaning at all and how these very symbols affect our lives Armed with the knowledge of the self and our shadow we may build fuller more receptive lives By illuminating the means to examine our prejudices interpret psychological meanings break free of our influences and recenter our individuality *Man and His Symbols* proves to be decades after its conception a revelatory absorbing and relevant experience

The World Republic of Letters Pascale Casanova, 2004 The world of letters has always seemed a matter more of metaphor than of global reality In this book Pascale Casanova shows us the state of world literature behind the stylistic refinements a world of letters relatively independent from economic and political realms and in which language systems aesthetic orders and genres struggle for dominance Rejecting facile talk of globalization with its suggestion of a happy literary melting pot Casanova exposes an emerging regime of inequality in the world of letters where minor languages and literatures are subject to the invisible but implacable violence of their dominant counterparts Inspired by the writings of Fernand Braudel and Pierre Bourdieu this ambitious book develops the first systematic model for understanding the production circulation and valuing of literature worldwide Casanova proposes a baseline from which we might measure the newness and modernity of the world of letters the literary equivalent of the meridian at Greenwich She argues for the importance of literary capital and its role in giving value and legitimacy to nations in their incessant struggle for international power Within her overarching theory Casanova locates three main periods in the genesis of world literature Latin French and German and closely examines three towering figures in the world republic of letters Kafka Joyce and Faulkner Her work provides a rich and surprising view of the political struggles of our modern world one framed by sites of publication circulation translation and efforts at literary annexation

Marie-Laure Ryan,1991 In this important contribution to narrative theory Marie Laure Ryan applies insights from artificial intelligence and the theory of possible worlds to the study of narrative and fiction For Ryan the theory of possible worlds provides a more nuanced way of discussing the commonplace notion of a fictional world while artificial intelligence contributes to narratology and the theory of fiction directly via its researches into the cognitive processes of texts and automatic story generation Although Ryan applies exotic theories to the study of narrative and to fiction her book maintains a solid basis in literary theory and makes the formal models developed by AI researchers accessible to the student of literature By combining the philosophical background of possible world theory with models inspired by AI the book fulfills a pressing need in narratology for new paradigms and an interdisciplinary perspective
