Money, Magic, and How to Dismantle a Financial Bomb David Orrell,2023-03-02 Money has many apparently magical properties It can be created out of the void and vanish without so much as a puff of smoke It can flash through space It can grow without limit And it can blow up without warning David Orrell argues that the emerging discipline of quantum economics of which he is at the forefront is the key to shattering the illusions that prevent us from understanding money s true nature In this colourful tour of the history philosophy and mathematics of money Orrell demonstrates how everything makes much more sense when we replace our classical economic models with ones based on quantum probability and reveals the explosive reality of what is left once the illusions are stripped away

Money Mellor, Mary,2019-07-03 What does money mean Where does it come from and how does it work In this highly topical book Mary Mellor an expert on money examines money s social political and commercial histories to debunk longstanding myths such as money being in short supply and needing to come from somewhere Arguing that money s immense social value means that its creation and circulation should be a matter of democratic choice she sets out a new finance system based on green and feminist concerns to bring radical change for social good

The Problem of Money Bernhard Bierlich,2007-12-01 Based on long term medical anthropological research in northern Ghana the author analyses issues of health and healing of gender and of the control and use of money in a changing rural African setting He describes the culture of medical pluralism so typical for neo colonial states and people s choices of traditional local medicine plants and

sacrifices Islamic medicine charms and various written solutions and modern therapy biomedicine in particular western pharmaceuticals He concludes that the rural urban divide is a fiction that demarcations between these areas are frequently blurred linked by a postcolonial capitalist discourse of local markets regional economies and national structures which frequently emerge in local African settings but often originate in global and multinational markets
