**A User's Guide to the Meade LXD55 and LXD75 Telescopes** Martin Peston,2010-04-28 I have owned telescopes for over 25 years since I was a young lad I purchased an LXD55 AR 6 Refractor in 2002 and was one of the first to own one in the UK I am also a proud owner of an LXD75 SC 8 Armed with these two very different telescopes I have spent many hours searching the skies for interesting objects using Meade s Autostar Goto facility My motivation to write a book about the LXD Goto telescope series first came from comments about an LXD55 AR 6 Refractor review that was published on the LXD55 com website From then on I have had regular emails from people asking technical questions about the telescope and which model is best suited for them Whilst attending Star parties in the UK I found that many LXD owners would struggle to use them even at a basic level especially if they have never owned or used an equatorially mounted Goto telescope before Since the first LXD55 models came out in early 2002 owners have struggled to find useful information to help them use the telescopes to the best advantage There have been mixed reactions about its quality and performance Hence this book is directed towards those who are new to Goto and the LXD telescope

**Magic** ,1908 **English Mechanic and Mirror of Science** ,1866 **Imagine Childhood** Sarah Olmsted,2012 **Popular Mechanics** ,1911 **Telescopes: A Very Short Introduction** Geoff Cottrell,2016-12-01 From the first telescopes have made dramatic revelations about the Universe and our place in it Galileo s observations of the Moon s cratered surface and discovery of Jupiter s four big satellites profoundly altered the perception of the heavens overturning a two thousand year cosmology that held the Earth to be the centre of the Universe Over the past century the rapid

development of computer technology and sophisticated materials allowed enormous strides in the construction of telescopes. Modern telescopes range from large Earth based optical telescopes and radio arrays linking up across continents to space based telescopes capturing the Universe in infrared, ultraviolet, X rays and gamma rays. In combination they have enabled us to look deep into the Universe and far back in time capturing phenomena from galactic collisions to the formation of stars and planetary systems and mapping the faint glow remaining from the Big Bang. In this Very Short Introduction Dr Geoff Cottrell describes the basic physics of telescopes, the challenges of overcoming turbulence and distortion from the Earth's atmosphere and the special techniques used to capture X rays and gamma rays in space telescopes. He explains the crucial developments in detectors and spectrographs that have enabled the high resolution achieved by modern telescopes and the hopes for the new generation of telescopes currently being built across the world.

**Will Goldston's Annual of Magic** Will Goldston, 1910 Popular Mechanics, 1984 **The Wreck of the San Francisco** John Stewart, 2018-04-15 On December 22, 1853 a new steamship left New York on its maiden voyage. The San Francisco, perhaps the finest ocean going vessel of its time, had been chartered by the U.S. Government to transport the U.S. Army's Third Artillery Regiment to the Pacific Coast. Two days out the ship ran into one of the great hurricanes of maritime history. Sails and stacks were blown away, the engine was wrecked, and scores of people were washed overboard as the men frantically worked the pumps to keep afloat. A few days later cholera broke out. After two weeks adrift the survivors were rescued by three ships. The nightmare was not over. Two of the vessels damaged by the storm were in no position to take on passengers. Provisions ran out. Fighting thirst, starvation, disease, and mutiny, survivors barely made it back. Then came the aftermath: accusations, denials, revelations of government ineptitude and negligence, and a cover up.
