**Fantasy of Flight** Kelly St.Clare,2017-03-14 My veil is gone and I need it back Stuck in the lethal Outer Rings of Glacium I must fight to survive while keeping my true identity the gravest of secrets Only then can I continue the search for Prince Kedrick s murderer and navigate my way back to King Jovan s castle No one can discover I m the Tatuma of Osolis the princess of their enemy world especially now I know why I was veiled at birth Has my mother refused Jovan s peace offers and declared war Do my brothers and Aquin know I m alive Who are my enemies and who are my friends Nothing is certain Though if I think about it nothing has been certain in a long time Buy now and join Olina in this coming of age fantasy which focuses on the values of friendship and self esteem

**Screen Consciousness** Robert Pepperell,Michael Punt,2006 This collection of essays is driven by the question of how we know what we know and in particular how we can be certain about something even when we know it is an illusion The contention of the book is that this age old question has acquired a new urgency as certain trends in science technology and ideas have taken the discussion of consciousness out of the philosophy department and deposited it in the world at large As a consequence a body of literature from many fields has produced its own sets of concerns and methods under the rubric of Consciousness Studies Each contribution in this collection deals with issues and questions that lots of people have been thinking about for many years in many different contexts things such as the nature of film cinema world mind and so on Those of us fascinated by these diverse yet related issues may have often felt we were working in a disciplinary no man s land Now suddenly it seems with Consciousness Studies we have a coherent intellectual home albeit one that is self consciously eclectic The essays included in Screen Consciousness Cinema Mind and World are from a range of disciplines art philosophy film theory anthropology and technology studies each represented by significant international figures and each concerned with how their field is being transformed by the new discipline of Consciousness Studies Together they attempt to reconcile the oncoming rush of new data from science and technology about how we know what we know with the insights gained from the long view of history philosophy and art Each of the contributions seeks to interpose Consciousness Studies between film and mind where for cultural theorists psychoanalysis had traditionally stood This is more than simply updating Film Studies or nodding in the direction of cognitive film theory Film with all its sentient sensuous and social qualities is a common reference point between all these forces and Consciousness Studies provides the intellectual impetus for this book to revisit familiar problems with fresh insight
