**Literary Spinoffs** Birgit Spengler, 2015-03-05 *Literary Spinoffs Rewriting the Canon Re Imagining the Community* explores the literary strategies theoretical dimensions and cultural implications of contemporary rewritings of nineteenth century classics By hooking on to powerful literary and cultural narratives literary spinoffs seek to interfere with the cultural imaginary and revise the ways in which the cultural community constructs itself via formative narratives Spengler offers in depth case studies of prominent contemporary rewritings and the cultural work they undertake while also examining the genre s particular aesthetics and effects Through their intensely intertextual form spinoffs raise urgent questions about the possibilities for participation in processes of cultural meaning making and invigorate contemporary debates about intellectual property cultural capital as well as high and popular culture **Antipodes**, 1990 Shakespeare Quarterly, 1991 *Synthesizing Systems* Anna Darden Copeland, 2007-02-22 The purpose of this dissertation is to introduce a general reading audience to the major themes found in the fiction of Richard Powers with an emphasis on his use of science For Powers science is something more than the accumulation of technical data and the proliferation of theories developed to explain physical phenomena It is an evolving body of knowledge which has important insights to contribute into the conditions which ground human experience The close and often detailed discussions of contemporary issues in science which Powers incorporates into his fiction indicate the extent to which he sees science as an inseparable component in any attempt to understand the complexities of human experience The common ground Powers uses to link the interests of science and those of fiction into a balanced if not always harmonious pursuit of truth is wonder The limitations placed on science during this century do not undermine the ability of science to influence what we can know Nor do these limitations diminish the ability of science to inspire wonder Quite the opposite For Powers the true wonder of the human intellect rests in our remarkable ability to balance observation and interpretation What he discovers again and again in his fiction is that science

like literature is a product of the human imagination a way to mediate between the world and our perceptions of it The recognition that science is a cultural practice a body of knowledge thoroughly imbued with the practices and prejudices of its historical surroundings is a necessary first step in mending the rift separating science and literature head and heart The greatest insight of twentieth century science may just be the recognition that there are other ways to access the truth Richard Powers skillful weaving of science and art is a testament that literature offers a unique vantage point from which we might learn something of value about ourselves and the world we inhabit Saul Bellow Mark Connelly,2016-03-29 A three time National Book Award for Fiction winner Saul Bellow 1915 2005 is one of the most highly regarded American authors to emerge since World War II His 60 year career produced 14 novels and novellas two volumes of nonfiction short story collections plays and a book of collected letters His 1953 breakthrough novel The Adventures of Augie March was followed by Seize the Day 1956 Herzog 1964 and Mr Sammler s Planet 1970 His Humboldt s Gift won a Pulitzer Prize in 1976 and contributed to his receiving the Nobel Prize for Literature that year This literary companion provides more than 200 entries about his works literary characters events and persons in his life Also included are an introduction and overview of Bellow s life statements made by him during interviews suggestions for writing and further study and an extensive bibliography
