The Legal Order Santi Romano, 2017-07-14 First published in 1917 Part 1 and 1918 Part 2 with a second edition in 1946 this is the first English translation of Santi Romano's classic work *L ordinamento giuridico* The Legal Order The main focus of The Legal Order is the notion of institution which Romano considers to be both the core and distinguishing feature of law After criticising accounts of the nature of law centred on notions of rule coercion or authority he offers a compelling conception not merely of law as an institution but of the institution as the first original and essential manifestation of law Romano advances a definition of a legal institution as any group who share rules within a bounded context for example a family a firm a factory a prison an association a church an illegal organisation a state the community of states and so on Therefore this understanding of legal institutionalism at the same time provides a ground breaking theory of legal pluralism whereby there are as many legal orders as institutions The acme of a jurisprudential current long overlooked in the Anglophone environment Romano's work is highly regarded in France Germany Spain and South America as well as in Italy The Legal Order not only proposes what Carl Schmitt described as a very significant theory More importantly it offers precious insights for a thorough rethinking of the relationship between law and society in today's world

The Sunken Billions Revisited World Bank, 2017-02-10 This report updates previous studies that measured in economic terms the extent of biological losses attributable to overfishing globally The new estimates assess these sunken billions at 83 billion annually The report further shows that a clear path can lead to the recovery of these considerable losses including through significant reduction in global fishing overcapacity A breakdown between regions is also included showing that the effort needed to achieve this reform will not be felt equally throughout the world While the cost of such reform will likely be high the expected benefits include an increase in biomass by a factor of 2.7 increase in annual harvests by 13 percent and a 30 fold increase in annual net benefits accrued to the fisheries sector from 3 billion to 86 billion annually This urgent call for action is reinforced by the impacts of climate change on fish stocks and fisheries worldwide
