Dark Side of the Moon Gerard Degroot, 2006-11-01 A selection of the History Scientific American and Quality Paperback Book Clubs For a very brief moment during the 1960s America was moonstruck Boys dreamt of being an astronaut girls dreamed of marrying one Americans drank Tang bought space pens that wrote upside down wore clothes made of space age Mylar and took imaginary rockets to the moon from theme parks scattered around the country But despite the best efforts of a generation of scientists the almost foolhardy heroics of the astronauts and 35 billion dollars the moon turned out to be a place of magnificent desolation to use Buzz Aldrin s words a sterile rock of no purpose to anyone In *Dark Side of the Moon* Gerard J DeGroot reveals how NASA cashed in on the Americans thirst for heroes in an age of discontent and became obsessed with putting men in space The moon mission was sold as a race which America could not afford to lose Landing on the moon it was argued would be good for the economy for politics and for the soul It could even win the Cold War The great tragedy is that so much effort and expense was devoted to a small step that did virtually nothing for mankind Drawing on meticulous archival research DeGroot cuts through the myths constructed by the Eisenhower Kennedy and Johnson administrations and sustained by NASA ever since He finds a gang of cynics demagogues

scheming politicians and corporations who amassed enormous power and profits by exploiting the fear of what the Russians might do in space Exposing the truth behind one of the most revered fictions of American history Dark Side of the Moon explains why the American space program has been caught in a state of purposeless wandering ever since Neil Armstrong descended from Apollo 11 and stepped onto the moon The effort devoted to the space program was indeed magnificent and its cultural impact was profound but the purpose of the program was as desolate and dry as lunar dust **Magnificent Desolation** Buzz Aldrin,Ken Abraham,2009-06-23 Forty years ago Buzz Aldrin became the second human minutes after Neil Armstrong to set foot on a celestial body other than the Earth The event remains one of mankind s greatest achievements and was witnessed by the largest worldwide television audience in history In the years since millions more have had their Earth centric perspective unalterably changed by the iconic photograph of Aldrin standing on the surface of the moon the blackness of space behind him and his fellow explorer and the Eagle reflected in his visor Describing the alien world he was walking upon he uttered the words magnificent desolation And as the astronauts later sat in the Eagle waiting to begin their journey back home knowing that they were doomed unless every system and part on board worked flawlessly it was Aldrin who responded to Mission Control s clearance to take off with the quip Roger Understand We re number one on the runway The flight of Apollo 11 made Aldrin one of the most famous persons on our planet yet few people know the rest of this true American hero s story In Magnificent Desolation Aldrin not only gives us a harrowing first person account of the lunar landing that came within seconds of failure and the ultimate insider s view of life as one of the superstars of America s space program he also opens up with remarkable candor about his more personal trials and eventual triumphs back on Earth From the glory of being part of the mission that fulfilled President Kennedy s challenge to reach the moon before the decade was out Aldrin returned home to an Air Force career stripped of purpose or direction other than as a public relations tool that NASA put to relentless use in a seemingly nonstop world tour The twin demons of depression and alcoholism emerged the first of which Aldrin confronted early and publicly and the second of which he met with denial until it nearly killed him He burned through two marriages his Air Force career came to an inglorious end and he found himself selling cars for a living when he wasn t drunkenly wrecking them Redemption came when he finally embraced sobriety gained the love of a woman Lois who would become the great joy of his life and dedicated himself to being a tireless advocate for the future of space exploration not only as a scientific endeavor but also as a thriving commercial enterprise These days Buzz Aldrin is enjoying life with an enthusiasm that reminds us how far it is possible for a person to travel literally and figuratively As an adventure story a searing memoir of self destruction and self renewal and as a visionary rallying cry to once again set our course for Mars and beyond Magnificent Desolation is the thoroughly human story of a genuine hero **Reaching for the Moon** Buzz Aldrin,2005-05-24 I walked on the moon This is my journey But it didn t begin when I stepped on board Apollo 11 on July 1 1969 It began the day I was born Becoming an astronaut took more than education discipline and physical strength It took

years of determination and believing that any goal is possible from riding a bike alone across the George Washington Bridge at age ten to making a footprint on the Moon I always knew the Moon was within my reach and that I was ready to be on the team that would achieve the first landing But it was still hard to believe when I took my first step onto the Moon's surface We all have our own dreams This is the story of how mine came true *Return to Earth* Buzz Aldrin, Wayne Warga, 2015-12-15

With a wide cast of characters and an exciting pace that mimics the speed of our modern, all too connected lives, *All This Life* examines the dangerous intersection of reality and the imaginary where coding and technology seek to highlight and augment our already flawed human connections. Morning rush hour on the Golden Gate Bridge. Amidst the river of metal and glass, a shocking event occurs leaving those who witnessed it desperately looking for answers, most notably one man and his son Jake who captured the event and uploaded it to the internet for all the world to experience. As the media swarms over the story, Jake will face the ramifications of his actions as he learns the perils of our modern disconnect between the real world and the world we create online. In landlocked Arizona, as the entire country learns of the event, Sara views Jake's video just before witnessing a horrible event of her own: her boyfriend's posting of their intimate sex tape. As word of the tape leaks out, making her an instant pariah, Sara needs to escape the small town's persecution of her careless action. Along with Rodney, an old boyfriend injured long ago in a freak accident that destroyed his parents' marriage, she must run faster than the internet trolls seeking to punish her for her indiscretions. Sara and Rodney will reunite with his estranged mother, Kat, now in danger from a new man in her life who may not be who he or his online profiles claim to be: a dangerous avatar in human form. Using his trademark talent for creating memorable characters with a deep insight into language and how it can be twisted to alter reality, Joshua Mohr returns with his most contemporary and insightful novel yet. John Houbolt William F. Causey, 2020-03-15. In May 1961, President Kennedy announced that the United States would attempt to land a man on the moon and return him safely to the earth before the end of that decade. Yet NASA did not have a specific plan for how to accomplish that goal. Over the next fourteen months, NASA vigorously debated several options. At first, the consensus was to send one big rocket with several astronauts to the moon, land and explore, and then take off and return the astronauts to earth in the same vehicle. Another idea involved launching several smaller Saturn V rockets into the earth orbit where a lander would be assembled and fueled before sending the crew to the moon. But it was a small group of engineers led by John C. Houbolt who came up with the plan that propelled human beings to the moon and back, not only safely but faster, cheaper, and more reliably. Houbolt and his colleagues called it lunar orbit rendezvous or LOR. At first, the LOR idea was ignored, then it was criticized, and then finally dismissed by many senior NASA officials. Nevertheless, the group under Houbolt's leadership continued to press the LOR idea, arguing that it was the only way to get men to the moon and back by President Kennedy's deadline. Houbolt persisted, risking his career in the face of overwhelming opposition. This is the story of how John Houbolt convinced NASA to adopt the plan that made history.

Earth Room Rachel Mannheimer, 2022-04-05. Selected by Nobel Laureate Louise Glück as Winner of the inaugural

Bergman Prize Rachel Mannheimer's debut *Earth Room* is a dazzling book-length narrative poem that explores with tenderness how art and love intersect to make one's life. Transporting the reader across decades and from the Moon to Mars by way of Alaska, Berlin, and the Hudson Valley, *Earth Room* considers a lineage of sculpture, performance, and land art from Robert Smithson to Pina Bausch, with observations shaped by gender and environment, history and portents of apocalypse. With an urgent, direct, and unmistakably powerful voice, Mannheimer tests the line between nature and culture, ordinary life and performance. A work of sly wit and bracing sincerity, *Earth Room* is an original, unsparing book that Louise Glück calls a lesson in how to make something of where we find ourselves.
