Religious Violence in the Ancient World Jitse H. F. Dijkstra, Christian Rudolf Raschle, 2020 A comparative examination and interpretation of religious violence in the Graeco Roman world and Late Antiquity *To Reach the Clouds* Philippe Petit, 2002-09-04 An artist of the air re creates his six year plot to pull off an act of incomparable beauty and imagination One late summer day a feat of unimaginable audacity was perpetrated on the twin towers of the World Trade Center The year was 1974 A hundred thousand people gathered on the ground to watch in awe as twenty four year old high wire artist Philippe Petit made eight crossings between the all but completed towers a quarter mile above the earth over the course of nearly an hour Petit s achievement made headlines around the world Yet few who saw or heard about it realized that it was the fulfillment of a dream he had nurtured for six years rekindling it each time it was in danger of expiring His accomplices were a motley crew of foreigners and Americans who under Petit s direction had conspired connived labored argued rehearsed and improvised to make possible an act of unsurpassed aerial artistry In this visually and verbally stunning book Petit tells for the first time the dramatic story of this history making walk from conception and clandestine planning to the performance and its aftermath The account draws on Petit s journals which capture everything from his budgets to his strategies for rigging a high wire in the dead of night between two of the most secure towers in the world It is animated by photographs taken by two of Petit s collaborators and by his own wonderfully evocative sketches and unquenchable humor The Many Faces of Strategic Voting John H Aldrich, André Blais, Laura B. Stephenson, 2019-02-28 Voters do not always choose their preferred candidate on election day Often they cast their ballots to prevent a particular outcome as when their own preferred candidate has no hope of winning and they want to prevent another undesirable candidate s victory or they vote to promote a single party majority in parliamentary systems when their own candidate is from a party that has no hope of winning In their thought provoking book *The Many Faces of Strategic Voting* Laura B Stephenson John H Aldrich and Andr Blais first provide a conceptual framework for understanding why people vote strategically and what the differences are between sincere and strategic voting behaviors Expert contributors then explore the many facets of strategic voting through case studies in Great Britain Spain Canada Japan Belgium Germany Switzerland and the European Union **The French Revolution** Hippolyte Taine, 1885 *Fifty Years in the Church of Rome* Charles Paschal Telesphore Chiniquy, 2022-06-02 This invaluable work presents a fresh perspective of the world of Roman Catholicism Charles Chiniquy wrote about his experiences growing up in the Catholic Church and transforming into the priesthood He shared how God led him to freedom from religion and after this liberation he entered into a close relationship with the Lord Market Failure, Government Failure, Leadership and Public Policy B. Dollery, J. Wallis, 1999-07-19 A global wave of reform is fundamentally reshaping the role of the state in national economies This book provides a fresh and accessible perspective on the political economy of this megatrend It traces the theoretical roots of the reforms to developments in public economics which emphasize problems of government rather than

market failure It then breaks new ground in developing an economic theory of leadership to explain how policy leadership networks can strive to influence the direction of reform processes

Challenges to The Second Law of Thermodynamics Vladislav Capek, Daniel P. Sheehan, 2006-03-30 The advance of scientific thought in ways resembles biological and geologic transformation long periods of gradual change punctuated by episodes of radical upheaval Twentieth century physics witnessed at least three major shifts relativity quantum mechanics and chaos theory as well many lesser ones Now so early in the 21st another shift appears imminent this one involving the second law of thermodynamics Over the last 20 years the absolute status of the second law has come under increased scrutiny more than during any other period its 180 year history Since the early 1980s roughly 50 papers representing over 20 challenges have appeared in the refereed scientific literature In July 2002 the first conference on its status was convened at the University of San Diego attended by 120 researchers from 25 countries QLSL2002 1 In 2003 the second edition of Leff and Rex's classic anthology on Maxwell demons appeared 2 further raising interest in this emerging field In 2004 the mainstream scientific journal Entropy published a special edition devoted to second law challenges 3 And in July 2004 an echo of QLSL2002 was held in Prague Czech Republic 4 Modern second law challenges began in the early 1980s with the theoretical proposals of Gordon and Denur Starting in the mid 1990s several proposals for experimentally testable challenges were advanced by Sheehan et al By the late 1990s and early 2000s a rapid succession of theoretical quantum mechanical challenges were being advanced by Capek et al

Caring Democracy Joan C. Tronto, 2013-04-12 A rethinking of American democracy that puts caring responsibilities at the center Americans now face a caring deficit there are simply too many demands on people's time for us to care adequately for our children elderly people and ourselves At the same time political involvement in the United States is at an all time low and although political life should help us to care better people see caring as unsupported by public life and deem the concerns of politics as remote from their lives Caring Democracy argues that we need to rethink American democracy as well as our fundamental values and commitments from a caring perspective What it means to be a citizen is to be someone who takes up the challenge how should we best allocate care responsibilities in society Joan Tronto argues that we need to look again at how gender race class and market forces misallocate caring responsibilities and think about freedom and equality from the standpoint of making caring more just The idea that production and economic life are the most important political and human concerns ignores the reality that caring for ourselves and others should be the highest value that shapes how we view the economy politics and institutions such as schools and the family Care is at the center of our human lives but Tronto argues it is currently too far removed from the concerns of politics Caring Democracy traces the reasons for this disconnection and argues for the need to make care not economics the central concern of democratic

Implementation of the European Convention on Human Rights and of the Judgments of the ECtHR in National Case-law Janneke Gerards, J. W. A. Fleuren, 2014 This book questions the correctness of these assumptions and aims for further study of them This is done by disentangling and illuminating the different elements underlying the interrelationship between the Court and the national courts The objective is to distinguish between the requirements set by the Court the constitutional powers and competences of national courts to interpret and apply international law in particular the Convention the way in which these courts actually use these competences to deal with the Court's interpretative approaches and the type of criticism that is levelled at the Court's case law These elements are studied from the perspective of the Court as well as from a national perspective in particular for Belgium France Germany the Netherlands Sweden and the United Kingdom Analysing these elements separately enables a fruitful assessment of their interrelationship and provides a sound basis for a constructive debate on the implementation of the Convention in national law which is based on solid constitutional foundations rather than assumptions and intuitions The current book is therefore of great interest to those who are interested in debates on the interrelationship between the Court and the states scholars as well as judges policy makers and politicians but also to those who take a more general interest in constitutional implementation mechanisms judicial powers and judicial argumentation

Suggestion and Suggestibility Vladimir A. Gheorghiu, Petra Netter, Hans J. Eysenck, Robert Rosenthal, 2012-12-06 This book contains the proceedings of the First International Symposium on Suggestion and Suggestibility held at the University of Giessen in the Federal Republic of Germany July 7-11 1987 upon the initiative of and organized by Dr V A Gheorghiu and Dr P Netter I regret that for personal reasons I was unable to accept his kind invitation to attend for Dr Gheorghiu and I are old friends I am pleased however to have this opportunity to call attention to the significance of this volume Most of the chapters were presented in approximately their present form at the symposium though some have been extensively revised for publication It was a wise choice to divide the papers into four major sections

I Theoretical and Historical Perspectives II Assessment and Individual Differences of Suggestibility III Psychophysiological Aspects of Suggestibility and IV Social and Cognitive Aspects of Suggestive Processes each with a summarizing commentary In view of the variety and difficulty of the individual papers it is a help to have the integration provided by these commentaries on Part I by Sheehan Chap 7 on Part II by Lundy Chap 13 on Part III by Edmonston Chap 19 and on Part IV by Fiedler Chap 30

Recent Advances in Psychiatry from Psycho-Neuro-Immunology Research: Autoimmunencephalitis, Autoimmune-Encephalopathy, Mild Encephalitis Karl Bechter, David Brown, Souhel Najjar, 2019-08-12 Growing evidence derived from cerebrospinal fluid CSF neuropathological imaging genetic and epidemiological studies link neuroinflammation and immune dysregulation to a subset of individuals with a variety of severe mental disorders SMDs including affective and non affective psychotic disorders Further the recent discoveries of neuronal surface antibodies NSAs in autoimmune encephalitis AE presenting with diverse neuropsychiatric disorders such as psychosis and cognitive decline among many others provides further support to the notion that CNS autoimmunity and neuroinflammation can contribute to the neurobiology of psychiatric disturbances Further these immune mechanisms may contribute to a subset of patients currently diagnosed as having treatment resistant SMDs such as schizophrenia and major depressive disorder Additionally mounting data indicate that various infections can serve as an immunological trigger of aberrant immune responses presumably by causing release of excess neural antigen thereby giving rise to NSAs or aberrant immune cellular responses to give rise to primary or secondary psychiatric disorders such as schizophrenia and those associated with AE respectively Collectively these findings support the mild encephalitis hypothesis of SMD The significant overlap among AE associated psychosis systemic autoimmune disorder associated psychosis and psychotic disorders associated with pathological processes involving inflammation and immune dysregulation has also prompted some authors to adopt the term autoimmune psychosis AP This term reflects that this psychosis subtype is mechanistically linked to complex neuroimmune and inflammatory signalling abnormalities that can be responsive to early immunomodulatory treatment It also suggests that a subset of AP might represent an incomplete or forme fruste subtype of AE presenting with dominant or pure psychiatric symptoms mimicking primary psychiatric illnesses Because data indicate that delayed diagnosis and treatment may lead to permanent sequelae early recognition of AP utilizing neurodiagnostic workup e g CSF analysis neuroimaging and EEG and its early treatment with appropriate immunotherapy are paramount to a meaningful recovery This eBook will provide an overview of the current knowledge and research areas from epidemiology risk factors and diagnosis to the management of these conditions in this rapidly emerging field helping to bridge the gaps in knowledge that currently exist in the disciplines of Psychiatry Neurology and Neuroimmunology

Beyond Uneconomic Growth Joshua Farley, Deepak Malghan, 2016 Daly's contributions to the still emergent field of ecological economics are constant references for our peers throughout the developing world as well as in the North His courageous tilting at the windmills of mainstream economic nonsense inspire us to continue questioning in

whose interests do we continue on a perpetual search for unlimited material satisfaction Daly's conception is not only of a world restricted by biophysical limits but also one in which poverty and deprivation are commonplace and where Sisyphean efforts to maintain accelerated economic growth only exacerbate inequitable distribution His vision of sustainable economic welfare shed light on other aspects of our existence which make it worth living Thanks to Farley Rees El Serafy Goodland and other fellow travelers we are bestowed with an excellent collection synthesizing Daly's contributions to our work which will inspire our youth and their children long after we too depart Peter H May President Brazilian Society for Ecological Economics ECOECO Contributed by several eminent thinkers the chapters in this book herald the paradigm shift that is needed to save the scientific framework of economics In spite of the conceptual inconsistencies GDP continues to be accepted by the nation states as the singular parameter to comprehensively describe the health of their economy What gets easily hidden behind Market Failures is actually the success of cost shifting on the heads of the ignorant and marginalized people as price for economic growth The chapters eloquently establish the need for moving beyond the religious faith on a paradigm that is facing fundamental conceptual challenges but has not addressed them with due seriousness What is a greater contribution of this collection is the identification of the gaps in knowledge of economics that need to be filled up to arrive at some basic articulations of the new paradigm that can throw some light on what is ecologically and socially Sustainable Development Jayanta Bandyopadhyay Past President The Indian Society for Ecological Economics The title Beyond Uneconomic Growth captures both the core of Herman Daly's key message and the linguistic mastery that makes his texts so enjoyable to read The book forms a great tribute to the work of Herman Daly by gathering a distinguished set of contributors covering a wide variety of the topics that Daly has dealt with and pointing in new directions Inge R pke Aalborg University Denmark This engaging book brings together leading ecological economists to collectively present a definitive case for looking beyond economic growth as the sole panacea for the world's ecological predicament Grounded in physics ecology and the science of human behavior contributors show how economic growth itself has become uneconomic and adds to a ravaging of both social and ecological cohesion Guided by a clear moral vision that prioritizes sustainability and justice over profit the authors provide a blueprint for an economy that replaces quantitative growth with qualitative improvement to enhance human welfare while restoring degraded ecosystems They present solutions for many of today's challenges ranging from global climate change and biodiversity loss to natural resource depletion This interdisciplinary work not only relates ecological economics theory to the most urgent predicaments of the contemporary world but also pays tribute to the work of Herman Daly a leading pioneer of modern ecological economics Researchers and faculty studying and teaching ecological economics and environmental studies will find value in this unprecedented book It will also be of interest to practitioners working to solve a variety of global environmental issues
