Research Libraries, 1982      **Navies and Shipbuilding Industries** Michael Lindberg, Daniel Todd, 1996-08-23 The central theme running through this book is the mutual dependence of navies and shipbuilding industries Historically naval ambitions and the ambitions of industrialists converge and a symbiosis is born The technical competence of industry emerges as a key player in determining the effectiveness of navies That industrial capability for its part rests increasingly on the navy as chief customer because progressive specialization renders it more and more unsuited for any other use These trends are universal afflicting the relations of all major navies and their industrial suppliers since the dawn of the modern age They continue to complicate the running of navies today The book enlarges on this fundamental fact explaining why the symbiosis emerged and how it is manifested in the contemporary world      *Maine* David Clayton Smith, Edward O.
