Rural Wealth Creation John L. Pender,Bruce A. Weber,Thomas G. Johnson,J. Matthew Fannin,2014-06-05 This book  
investigates the role of wealth in achieving sustainable rural economic development The authors define wealth as all assets  
net of liabilities that can contribute to well being and they provide examples of many forms of capital physical financial  
human natural social and others They propose a conceptual framework for rural wealth creation that considers how multiple  
forms of wealth provide opportunities for rural development and how development strategies affect the dynamics of wealth  
They also provide a new accounting framework for measuring wealth stocks and flows These conceptual frameworks are  
employed in case study chapters on measuring rural wealth and on rural wealth creation strategies Rural Wealth Creation  
makes numerous contributions to research on sustainable rural development Important distinctions are drawn to help guide  
wealth measurement such as the difference between the wealth located within a region and the wealth owned by residents of  
a region and privately owned versus publicly owned wealth Case study chapters illustrate these distinctions and demonstrate  
how different forms of wealth can be measured Several key hypotheses are proposed about the process of rural wealth  
creation and these are investigated by case study chapters assessing common rural development strategies such as  
promoting rural energy industries and amenity based development Based on these case studies a typology of rural wealth  
creation strategies is proposed and an approach to mapping the potential of such strategies in different contexts is

demonstrated This book will be relevant to students researchers and policy makers looking at rural community development sustainable economic development and wealth measurement
