The exhibition catalogue will be arranged in a broadly chronological way to tell the story of photography and its relationship with abstraction from around 1915 to the present day and will include historic works in a variety of media from painting and sculpture to montage and kinetic installations. Beginning with the works of cubism and vorticism, the catalogue then highlights the key contributions of Bauhaus, constructivist and surrealist artists of the 1920s and 1930s. It then moves into the subjective photography of the 1940s and 1950s, exploring the global scope of this movement through works by artists from Latin America and Asia, before considering the impacts of photography of abstract expressionism on art and minimalism in Europe and the US. Bringing together iconic as well as rarely seen works, *Photography and Abstract Art* explores the development of photography in relation to abstract art, tracing the key moments of innovation in new techniques and practice.
