Beta Beams: Neutrino Beams Mats Lindroos, Mauro Mezzetto,2009-07-24 The beta beam concept for the generation of electron neutrino beams was first proposed by Piero Zucchelli in 2002 The idea created quite a stir challenging the idea that intense neutrino beams only could be produced from the decay of pions or muons in classical neutrino beams facilities or in future neutrino factories The concept initially struggled to make an impact but the hard work by many machine physicists phenomenologists and theoreticians over the last five years has won the beta beam a well earned position as one of the frontrunners for a possible future world laboratory for high intensity neutrino oscillation physics This is the first complete monograph on the beta beam concept The book describes both technical aspects and experimental aspects of the beta beam providing i students and scientists with an insight into the possibilities offered by beta beams ii facility designers with a starting point for future studies and iii policy makers with a comprehensive picture of the limits and possibilities offered by a beta beam a *The Metal Wood* Jeremy Thomas Fuller,2025-07-08 Her crew betrayed her Her magic broke her Her city isn t ready for her return In the flying city of Newfris where the elite soar above the clouds and the forgotten toil beneath the streets Phoenix is more than just a killer she s a survivor As a killgirl for Her Majesty s Navy she s mastered the deadly art of forcefinding creating powerful energy bubbles that can trap or obliterate anyone in her way But when a mission goes horribly wrong Phoenix finds herself cast out hunted by enemies and betrayed by those she trusted most Now with only a ragtag crew of misfits by her side Phoenix must navigate a treacherous underworld of magic machines and buried secrets As she faces off against the ruthless Planners deadly assassins and the demons of her past Phoenix will discover the true cost of power and
