Voeks, 2010-01-01 Winner Hubert Herring Book Award Pacific Coast Council on Latin American Studies Candomblé an African religious and healing tradition that spread to Brazil during the slave trade relies heavily on the use of plants in its spiritual and medicinal practices When its African adherents were forcibly transplanted to the New World they faced the challenge not only of maintaining their culture and beliefs in the face of European domination but also of finding plants with similar properties to the ones they had used in Africa This book traces the origin, diffusion, medicinal use, and meaning of Candomblé's healing pharmacopoeia the sacred leaves Robert Voeks examines such topics as the biogeography of Africa and Brazil the transference and transformation of Candomblé as its adherents encountered both native South American belief systems and European Christianity and the African system of medicinal plant classification that allowed Candomblé to survive and even thrive in the New World This research casts new light on topics ranging from the creation of African American cultures to tropical rain forest healing floras

Technocrats and the Politics of Drought and Development in Twentieth-Century Brazil Eve E. Buckley, 2017-07-28 Eve E. Buckley's study of twentieth-century Brazil examines the nation's hard social realities through the history of science focusing on the use of technology and engineering as vexed instruments of reform and economic development Nowhere was the tension between technocratic optimism and entrenched inequality more evident than in the drought-ridden Northeast sertão plagued by chronic poverty, recurrent famine, and mass migrations Buckley reveals how the physicians, engineers, agronomists, and mid-level technocrats working for federal agencies to combat drought were pressured by politicians to seek out a technological magic bullet that would both end poverty and obviate the need for land redistribution to redress long-standing injustices
