Biotechnological and genomic approaches for enhancing agronomic performance of crops Sreepriya Pramod, Ramsey Steven Lewis, Reyazul Rouf Mir, Himabindu Kudapa, 2023-04-05 [Agricultural Research](#), 2010 [Ngecha](#) Carolyn P. Edwards, Beatrice Blyth Whiting, 2004-01-01 Ngecha is the monumental and intimate study of modernization and nationalization in rural Africa in the early years following Kenyan independence in 1963 as experienced by the people of Ngecha a village outside Nairobi From 1968 to 1973 Ngecha was a research site of the Child Development Research Unit a team that brought together Kenyan and non Kenyan social scientists under the leadership of John Whiting and Beatrice Blyth Whiting The study documents how families adapted to changing opportunities and conditions as their former colony became a modern nation and the key role that women played as agents of change as they became small scale cash crop farmers and entrepreneurs Mothers modified the culture of their parents to meet the evolving national economy and they participated in the shift from an agrarian to a wage economy in ways that transformed their workloads and perceptions of isolation and individualism within and between households thereby challenging traditional family based morals and obligations Their children in turn experienced evolving educational practices and achievement expectations The elders faced new situations as well as new modes of treatment Completing this valuable record of a nation in transition are the long term reassessments of the observations and conclusions of the research team and a description of Ngecha today as viewed by Kenyans who participated in the original study

 Technology for Crop Improvement** José Miguel Soriano,2021-01-15 Since the 1980s agriculture and plant breeding have
 changed with the development of molecular marker technology In recent decades different types of molecular markers have
 been used for different purposes mapping marker assisted selection characterization of genetic resources etc These have
 produced effective genotyping but the results have been costly and time consuming due to the small number of markers that
 could be tested simultaneously Recent advances in molecular marker technologies such as the development of high
 throughput genotyping platforms genotyping by sequencing and the release of the genome sequences of major crop plants
 have opened new possibilities for advancing crop improvement This Special Issue collects 16 research studies including the
 application of molecular markers in 11 crop species from the generation of linkage maps and diversity studies to the
 application of marker assisted selection and genomic prediction Sessional Papers Canada. Parliament,1901 Report of the

 Agriculture* Ram Lakhan Singh,Sukanta Mondal,2017-09-12 Biotechnology for Sustainable Agriculture Emerging Approaches
 and Strategies is an outstanding collection of current research that integrates basic and advanced concepts of agricultural
 biotechnology with future development prospects Using biotechnology with sustainable agriculture effectively contributes to
 gains in agricultural productivity enhanced food security reduced poverty and malnutrition and more ecologically sustainable
 means of food production Written by a panel of experts this book is unique in its coverage of the broad area of biotechnology
 for sustainable agriculture It includes intriguing topics and discussions of areas such as recombinant DNA technology and
 genetic engineering Identifies and explores biotechnological tools to enhance sustainability Encompasses plant and microbial
 biotechnology nanotechnology and genetic engineering Focuses on plant biotechnology and crop improvement to increase
 yield and resilience Summarizes the impact of climate change on agriculture fisheries and livestock **The Bavenda** Hugh

A. Stayt, 2018-09-03 Originally published in 1931 this book was the first detailed ethnographic study of the Bavenda people. It pays particular attention to the double system of kinship groups which is unusual among the Bantu peoples. Richly illustrated with over 60 black and white plates, this book discusses the history and geography of the Bavenda as well as social, economic, religious, political, and legal aspects of their life as well as medicine, magic, and folklore. *Genomics and Breeding for Climate-Resilient Crops* Chittaranjan Kole, 2013-06-18 Climate change is expected to have a drastic impact on agronomic conditions including temperature, precipitation, soil nutrients, and the incidence of disease pests, to name a few. To face this looming threat, significant progress in developing new breeding strategies has been made over the last few decades. The second volume of *Genomics and Breeding for Climate Resilient Crops* describes various genomic and breeding approaches for the genetic improvement of the major target traits. Topics covered include flowering time, root traits, cold, heat, and drought tolerance, water use efficiency, flooding and submergence tolerance, disease and insect resistance, nutrient use efficiency, nitrogen fixation, carbon sequestration, and greenhouse gas emissions. *Wisconsin Library Bulletin*, 1953

Drink, Power, and Society in the Andes Justin Jennings, Brenda J. Bowser, 2019-11-02 For more than two thousand years, drinking has played a critical role in Andean societies. This collection provides a unique look at the history, ethnography, and archaeology of one of the most important traditional indigenous commodities in Andean South America: fermented plant beverages collectively known as chicha. The authors investigate how these forms of alcohol have played a huge role in maintaining gender roles, kinship bonds, ethnic identities, exchange relationships, and status hierarchies. They also consider how shifts in alcohol production, exchange, and consumption have precipitated social change. Unique among foodways studies for its extensive temporal coverage, *Drink, Power, and Society in the Andes* also brings together scholars from diverse theoretical, methodological, and regional perspectives. A Second Look Andie Peterson, 2007-10-19 Four hundred twenty-five books are reviewed in this superb collection. *A Second Look: Native Americans in Children's Books* gives a thorough examination of the books as a guide for parents, teachers, librarians, and administrators interested in books for children. Anyone involved in selecting books will find this guide useful in working through the maze of available materials. Andie Peterson, one of the few women to be awarded an Eagle Feather, has provided a meaningful criteria to help in judging books. She outlines ways for objectively studying books to draw conclusions as to the suitability for the reader. She writes candidly about books filled with stereotypes, hurtful images, and damaging text and illustrations. She writes eloquent, glowing reviews of the books that are real treasures. She writes, "On a daily basis, children must face the hidden curriculum that lets them know where they fit in, whether they can achieve their goals, whether they even dare to dream. An overwhelming part of that hidden curriculum begins with books that are more narrative and illustrations; they are books that carry a message of politics and values. Andie advises that in selecting Native American books, the non-Native child must be considered also. She counsels that hurtful books set in motion attitudes of prejudice that persist for years. She states that she has reviewed books with older

copyrights because they are still on the shelves in libraries and available via the Internet She says reading the older books helps to understand how adults have formed ideas about Native people She says After all if its in a book in the library people believe it to be true Its time to disturb the peace and end the ritual of damage A Second Look Native Americans in Childrens Books By Andie Peterson **Plant Genetics and Molecular Biology** Rajeev K. Varshney, Manish K. Pandey, Annapurna Chitikineni, 2018-09-04 This book reviews the latest advances in multiple fields of plant biotechnology and the opportunities that plant genetics genomics and molecular biology have offered for agriculture improvement Advanced technologies can dramatically enhance our capacity in understanding the molecular basis of traits and utilizing the available resources for accelerated development of high yielding nutritious input use efficient and climate smart crop varieties In this book readers will discover the significant advances in plant genetics structural and functional genomics trait and gene discovery transcriptomics proteomics metabolomics epigenomics nanotechnology and analytical decision support tools in breeding This book appeals to researchers academics and other stakeholders of global agriculture
