Lamont,Jim Steinmeyer,2018-07-17 Pull back the curtain on the real history of magic and discover why magic really matters If you read a standard history of magic you learn that it begins in ancient Egypt with the resurrection of a goose in front of the Pharaoh You discover how magicians were tortured and killed during the age of witchcraft You are told how conjuring tricks were used to quell rebellious colonial natives The history of magic is full of such stories which turn out not to be true Behind the smoke and mirrors however lies the real story of magic It is a history of people from humble roots who made and lost fortunes and who deceived kings and queens In order to survive they concealed many secrets yet they revealed some and they stole others They engaged in deception exposure and betrayal in a quest to make the impossible happen They managed to survive in a world in which a series of technological wonders appeared which previous generations would have considered magical Even today when we now take the most sophisticated technology for granted we can still be astonished by tricks that were performed hundreds of years ago The Secret History of Magic reveals how this was done It is about why magic matters in a world that no longer seems to have a place for it but which desperately needs a sense of wonder      **Card**

The Psychology of Magic and the Magic of Psychology Amir Raz, Jay A. Olson, Gustav Kuhn, 2016-11-18

Magicians have dazzled audiences for many centuries; however, few researchers have studied how let alone why most tricks work. The psychology of magic is a nascent field of research that examines the underlying mechanisms that conjurers use to achieve enchanting phenomena including sensory illusions, misdirection of attention, and the appearance of mind control and nuanced persuasion. Most studies to date have focused on either the psychological principles involved in watching and performing magic or neuromagic, the neural correlates of such phenomena. Whereas performers sometimes question the contributions that modern science may offer to the advancement of the magical arts, the history of magic reveals that scientific discovery often charts new territories for magicians. In this research topic, we sketch out the symbiotic relationship between psychological science and the art of magic. On the one hand, magic can inform psychology with particular benefits for the cognitive, social, developmental, and transcultural components of behavioural science. Magicians have a large and robust set of effects that most researchers rarely exploit. Incorporating these effects into existing experimental even clinical paradigms paves the road to innovative trajectories in the study of human behaviour. For example, magic provides an elegant way to study the behaviour of participants who may believe they had made choices that they actually did not make. Moreover, magic fosters a more ecological approach to experimentation whereby scientists can probe participants in more natural environments compared to the traditional lab-based settings. Examining how magicians consistently influence spectators, for example, can elucidate important aspects in the study of persuasion, trust, decision making, and even processes spanning authorship and agency. Magic thus offers a largely underused armamentarium for the behavioural scientist and clinician. On the other hand, psychological science can advance the art of magic. The psychology of deception, a relatively understudied field, explores the intentional creation of false beliefs and how people often go wrong. Understanding how to methodically exploit the tenuous twilight zone of human vulnerabilities—perceptual, logical, emotional, and temporal—becomes all the more revealing when top-down influences including expectation, symbolic thinking, and framing join the fray. Over the years, science has permitted magicians to concoct increasingly effective routines and to elicit heightened feelings of wonder from audiences. Furthermore, on occasion, science leads to the creation of novel effects or

the refinement of existing ones based on systematic methods For example by simulating a specific card routine using a series of computer stimuli researchers have decomposed the effect and reconstructed it into a more effective routine Other magic effects depend on meaningful psychological knowledge such as which type of information is difficult to retain or what changes capture attention Behavioural scientists measure and study these factors By combining analytical findings with performer intuitions psychological science begets effective magic Whereas science strives on parsimony and independent replication of results magic thrives on reproducing the same effect with multiple methods to obscure parsimony and minimise detection This Research Topic explores the seemingly orthogonal approaches of scientists and magicians by highlighting the crosstalk as well as rapprochement between psychological science and the art of deception [Life Stories](#) David Remnick,2001-05-15 One of art s purest challenges is to translate a human being into words The New Yorker has met this challenge more successfully and more originally than any other modern American journal It has indelibly shaped the genre known as the Profile Starting with light fantastic evocations of glamorous and idiosyncratic figures of the twenties and thirties such as Henry Luce and Isadora Duncan and continuing to the present with complex pictures of such contemporaries as Mikhail Baryshnikov and Richard Pryor this collection of New Yorker Profiles presents readers with a portrait gallery of some of the most prominent figures of the twentieth century These Profiles are literary journalistic investigations into character and accomplishment motive and madness beauty and ugliness and are unrivalled in their range their variety of style and their embrace of humanity Including these twenty eight profiles Mr Hunter s Grave by Joseph Mitchell Secrets of the Magus by Mark Singer Isadora by Janet Flanner The Soloist by Joan Acocella Time Fortune Life Luce by Walcott Gibbs Nobody Better Better Than Nobody by Ian Frazier The Mountains of Pi by Richard Preston Covering the Cops by Calvin Trillin Travels in Georgia by John McPhee The Man Who Walks on Air by Calvin Tomkins A House on Gramercy Park by Geoffrey Hellman How Do You Like It Now Gentlemen by Lillian Ross The Education of a Prince by Alva Johnston White Like Me by Henry Louis Gates Jr Wunderkind by A J Liebling Fifteen Years of The Salto Mortale by Kenneth Tynan The Duke in His Domain by Truman Capote A Pryor Love by Hilton Als Gone for Good by Roger Angell Lady with a Pencil by Nancy Franklin Dealing with Roseanne by John Lahr The Coolhunt by Malcolm Gladwell Man Goes to See a Doctor by Adam Gopnik Show Dog by Susan Orlean Forty One False Starts by Janet Malcolm The Redemption by Nicholas Lemann Gore Without a Script by Nicholas Lemann Delta Nights by Bill Buford
