the question How did a magical spiritualist mesmerized Europe ever convince itself that it was disenchanted Josephson Storm traces the history of the myth of disenchantment in the births of philosophy anthropology sociology folklore psychoanalysis and religious studies Ironically the myth of mythless modernity formed at the very time that Britain France and Germany were in the midst of occult and spiritualist revivals Indeed Josephson Storm argues these disciplines founding figures were not only aware of but profoundly enmeshed in the occult milieu and it was specifically in response to this burgeoning culture of spirits and magic that they produced notions of a disenchanted world By providing a novel history of the human sciences and their connection to esotericism *The Myth of Disenchantment* dispatches with most widely held accounts of modernity and its break from the premodern past

*The Magic of Reality* Richard Dawkins, 2011-10-04 Magic takes many forms Supernatural magic is what our ancestors used in order to explain the world before they developed the scientific method The ancient Egyptians explained the night by suggesting the goddess Nut swallowed the sun The Vikings believed a rainbow was the gods bridge to earth The Japanese used to explain earthquakes by conjuring a gigantic catfish that carried the world on its back earthquakes occurred each time it flipped its tail These are magical extraordinary tales But there is another kind of magic and it lies in the exhilaration of discovering the real answers to these questions It is the magic of reality science Packed with clever thought experiments dazzling illustrations and jaw dropping facts The Magic of Reality explains a stunningly wide range of natural phenomena What is stuff made of How old is the universe Why do the continents look like disconnected pieces of a puzzle What causes tsunamis Why are there so many kinds of plants and animals Who was the first man or woman This is a page turning graphic detective story that not only mines all the sciences for its clues but primes the reader to think like a scientist as well Richard Dawkins the world s most famous evolutionary biologist and one of science education s most passionate advocates has spent his career elucidating the wonders of science for adult readers But now in a dramatic departure he has teamed up with acclaimed artist Dave McKean and used his unrivaled explanatory powers to share the magic of science with readers of all ages This is a treasure trove for anyone who has ever wondered how the world works Dawkins and McKean have created an illustrated guide to the secrets of our world and the universe beyond that will entertain and inform for years to come
