Magical Thought In Creative Writing The Distinctive Roles Of Fantasy And Imagination In Fiction:

Magical Thought in Creative Writing Anne Wilson, 1983 **Teaching Children's Fiction** C. Butler, 2006-03-20 This book combines the work of nine leading teachers and scholars of children's literature from Europe and North America. They explore the various disciplines and perspectives that have contributed to the study of children's literature, giving practical classroom suggestions. Contains an up-to-date resources section.

Considering Children's Literature Andrea Schwenke Wyle, Teya Rosenberg, 2008-02-21 The study of children's literature is not just about children and the books said to be for them; it is also about the societies and cultures from which the literature comes and the assumptions and ideas we hold about children and childhood. For adults reading children's literature is ultimately both an act of nostalgia and of self-examination. When we consider children's literature, we must include ourselves in the equation. What kinds of readers are we? How do we relate to books and stories? To what degree should we impose our experience upon others? Reading children's literature actively can lead to all kinds of remarkable and sometimes unsettling revelations about ourselves and our society.

from the Introduction *Considering Children's Literature* is a collection of previously published essays on a variety of topics that inform the study of children's literature. Exploring issues such as censorship, the canon, the meanings of fairy tales, and the adaptation of children's literature into film, the essays in this anthology are as diverse as they are illuminating. Along with authors like Natalie Babbitt and Margaret Mahy, teachers, scholars, and publishers of children's books are also contributors.

Accessible and comprehensive, this book will appeal to anyone interested in children's literature.

Picturing the Page Megan Swift, 2020-05-12 Based on sources from rare book libraries in Russia and around the world, *Picturing the Page* offers a vivid exploration of illustrated children's literature and reading under Lenin and Stalin, a period when mass publishing for children and universal public education became available for the first time in Russia. By analysing the illustrations in fairy tales, classic adult literature reformatted for children, and war-time picture books, Megan Swift elucidates the vital and multifaceted function of illustrated children's literature in repurposing the past. *Picturing the Page* demonstrates that while the texts of the past remained fixed, illustrations could slip between the pages to mediate and annotate that past as well as connect with anti-religious, patriotic, and other campaigns that were central to Soviet children's culture after the 1917 Revolution.

Borderline Peter Kenneth Chadwick, 1992 *Borderline* provides a study of the disturbed mind. Professional psychologist Peter Chadwick draws upon his own personal experience of madness to provide an exploration of the psychology of paranoia and schizophrenia. The book goes beyond a narrowly focused analytical approach to examine schizophrenia from as many perspectives as possible. Using participant observation, introspection, case study, and experimental methods, Chadwick shows how paranoid and delusional thinking are only exaggerations of processes to be found in normal cognition. Impressed by the similarities between the thinking of mystics and psychotics, he argues that some forms of madness are closely related to profound mystical experience and intuition, but that these are expressed in a distorted form in the psychotic mind. He

explores the many positive characteristics and capabilities of paranoid patients providing a sympathetic account which balances the negative constructions usually put on paranoia in the research literature Borderline provides many novel insights into madness and raises important questions as to how psychosis and psychotics are to be evaluated psychotherapists and students of religion and psychology

Entranced by Story Hugh Crago, 2014-04-24 We live in a world of stories yet few of us pause to ask what stories actually are why we consume them so avidly and what they do for story makers and their audiences This book focuses on the experiences that good stories generate feelings of purposeful involvement elevation temporary loss of self vicarious emotion and relief of tension The author examines what drives writers to create stories and why readers fall under their spell why some children grow up to be writers and how the capacity for creating and comprehending stories develops from infancy right through into old age Entranced by Story applies recent research on brain function to literary examples ranging from the Iliad and Wuthering Heights to Harold and the Purple Crayon providing a groundbreaking exploration of the biological and neurological basis of the literary experience Blending research theory and biographical anecdote the author shows how it is the unique structure of the human brain with its layering of sophisticated cognitive capacities upon archaic emotion driven functions which best explains the mystery of story

Comedy, Fantasy and Colonialism Graeme Harper, 2002-08-01 Drawing together for the first time original work from international specialists this book assesses the role and character of comedy and fantasy in colonial societies from India to Ireland Australia to Cuba Africa to North America There are cross cultural comparisons and consideration of both imperial responses and colonized resistance The book deals with oral as well as written traditions the history of comic and fantastic discourse visual theatrical and literary representations as well as historical and cultural accounts
