

2 Policy Evaluation and Evaluation Research

DEFINITIONS, CONCEPTS, AND TYPES OF EVALUATION

Evaluation in the field of public policy may be defined, in very general terms, as an analytical tool and procedure meant to do two things. First, evaluation research, as an analytical tool, involves investigating a policy program to obtain all information pertinent to the assessment of its performance, both process and result; second, evaluation as a phase of the policy cycle more generally refers to the reporting of such information back to the policy-making process (see Wollmann 2003b, 4).

Yet, a bewildering array of concepts and terms has made its appearance in this field, especially given the recent “third wave” development of new vocabulary (such as management audit, policy audit, and performance monitoring). In light of a definition that focuses on the function of evaluation and, thus, looks beneath the surface of varied terminology, it becomes apparent that the different terms “cover more or less the same grounds” (Bemelmans-Videc 2002, 94). Thus, analytical procedures, which have come to be called “performance audit” would be included in our definition, except, however, “financial audit,” which checks the compliance of public spending with budgetary provisions and would not be counted as evaluation (see Sandahl 1992, 115).

TYPES OF EVALUATION: FUNCTIONS AND TIMING

In terms of the different temporal and functional linkages with the “policy cycle,” often the following distinctions are made (see Wollmann 2003b).

Ex-ante evaluation, preceding decision making, is meant to (hypothetically) anticipate and pre-assess the effects and consequences of planned or defined policies and actions in order to “feed” the information into the upcoming or ongoing decision-making process. If undertaken on alternative courses of policies and actions, ex-ante evaluation is an instrument of making the choice between alternative policy options (ideally) analytically more transparent, more foreseeable, and politically more debatable. It includes *implementation pre-assessment* is meant to analytically anticipate the course of policy implementation in focusing on its process, as well as *environmental impact assessment*, designed for anticipating or predicting the consequences which envisaged policies and measure may have on the environment.

Ongoing evaluation has the task of identifying the (interim) effects and results of policy programs and measures while, in the policy cycle, the implementation and realization thereof is still under way. The essential function of “ongoing” evaluation is to feed relevant information back into the implementation process at a point and stage when pertinent information can be used in order to adjust, correct or redirect the implementation process or even underlying key policy decisions. In a nearly synonymous usage, some speak of *accompanying evaluation* running parallel to the policy implementation process. Within “ongoing” or “accompanying” evaluation one can discern

[Educational Delusions?](#) Gary Orfield, Erica Frankenberg, 2013-01-25 The first major battle over school choice came out of struggles over equalizing and integrating schools in the civil rights era when it became apparent that choice could be either a serious barrier or a significant tool for reaching these goals The second large and continuing movement for choice was part of the very different anti government individualistic market based movement of a more conservative period in which many of the lessons of that earlier period were forgotten though choice was once again presented as the answer to racial inequality This book brings civil rights back into the center of the debate and tries to move from doctrine to empirical research in exploring the many forms of choice and their very different consequences for equity in U S schools Leading researchers conclude that although helping minority children remains a central justification for choice proponents ignoring the essential civil rights dimensions of choice plans risks compounding rather than remedying racial inequality
