## **Magnetic Los Angeles:**

**Magnetic Los Angeles** Greg Hise, 1997 The book has three aims First it places the history of city building in southern California in a national context Second it explains the changing form of American cities during the twentieth century using Los Angeles as a primary case study Where other accounts focus exclusively on housing and home building this book reveals a major rearrangement of urban functions and the concomitant dispersion of industry and commerce The third most ambitious intention is to uncover and interpret the imaginative structures residents and scholars have devised for understanding American cities and thereby contribute to a reframing of current debates in urban theory **Magnetic Los**

**Angeles** Greg Hise, 1999-08-20 Suburban development is often considered synonymous with enhanced personal mobility single family housing and life cycle homogeneity According to this view individual suburbs are residence only enclaves isolated commuter sheds for a managerial and mercantile elite Magnetic Los Angeles challenges this common vision of the expanding twentieth century city as the sprawling product of dispersion without planning lacking any discernable order

Land of Sunshine William Deverell, Greg Hise, 2006-06-30 Most people equate Los Angeles with smog sprawl forty suburbs in search of a city the great what not to do of twentieth century city building But there s much more to LA s story than this shallow stereotype History shows that Los Angeles was intensely ubiquitously planned The consequences of that planning the environmental history of urbanism is one place to turn for the more complex lessons LA has to offer Working forward from ancient times and ancient ecologies to the very recent past Land of Sunshine is a fascinating exploration of the environmental history of greater Los Angeles Rather than rehearsing a litany of errors or insults against nature rather than decrying the lost opportunities of roads not taken these essays by nineteen leading geologists ecologists and historians instead consider the changing dynamics both of the city and of nature In the nineteenth century for example density was considered an evil and reformers struggled mightily to move the working poor out to areas where better sanitation and flowers and parks made life seem worth the living We now call that vision sprawl and we struggle just as much to bring middle class people back into the core of American cities There s nothing natural or inevitable about such turns of events It s only by paying very close attention to the ways metropolitan nature has been constructed and construed that meaningful lessons can be drawn History matters So here are the plants and animals of the Los Angeles basin its rivers and watersheds Here are the landscapes of fact and fantasy the historical actors events and circumstances that have proved transformative over and over again The result is a nuanced and rich portrait of Los Angeles that will serve planners communities and environmentalists as they look to the past for clues if not blueprints for enhancing the quality and viability of cities

Levitt the man who made the suburban house a mass commodity Two material artifacts defined the middle class American lifestyle in the mid twentieth century the automobile which brought gas stations highways commercial strips and sprawl and the single family suburban home the repository of many families long term wealth While the man who did the most to make the automobile a mass commodity Henry Ford is well known few know the story of the man who did the same for the suburban house Edward Berenson describes the remarkable career of William Levitt who did more than anyone else to create the modern suburb In response to an unprecedented housing shortage as veterans returned home from World War II his Levittown developments provided inexpensive mass produced housing that was wildly popular prospective buyers would camp out in line for two days for the chance to put down a deposit on a Levitt house He was a celebrity a life changing hero to tens of thousands and the pitchman of a renewed American Dream But Levitt also shared Ford s dark side He refused to allow Black people to buy or rent in his developments and doggedly defended this practice against legal challenges Leading the way for other developers who emulated his actions he helped ensure that suburbs nationwide remained white enclaves These legacies are still with us Levitt made a major contribution to the stubborn wealth disparity between white families and Black families and his solution to the housing crisis of the 1940s the detached house and surrounding yard is a primary cause of the housing crisis today As a person Levitt was a strangely guileless and tragic figure He accumulated vast wealth but after losing control of his building company surrendered it all through foolish investments and a lavish lifestyle that included a Long Island mansion and a two hundred foot yacht Just weeks before his death as a charity patient in a hospital to which he had once given millions he was still imagining his great comeback
