Magnificent West Grand Canyon:

The Magnificent West, Grand Canyon Milton Goldstein, 1980 **The Magnificent West, Grand Canyon** Milton Goldstein, 1973 **The Emerald Mile** Kevin Fedarko, 2013-05-07 From one of Outside magazine's Literary All Stars comes the thrilling true tale of the fastest boat ride ever through the Grand Canyon atop the legendary Colorado River flood of 1983 In the spring of 1983 massive flooding along the length of the Colorado River confronted a team of engineers at the Glen Canyon Dam with an unprecedented emergency that may have resulted in the most catastrophic dam failure in history In the midst of this crisis the decision to launch a small wooden dory named The Emerald Mile at the head of the Grand Canyon just fifteen miles downstream from the Glen Canyon Dam seemed not just odd but downright suicidal The Emerald Mile at one time slated to be destroyed was rescued and brought back to life by Kenton Grua the man at the oars who intended to use this flood as a kind of hydraulic sling shot The goal was to nail the all time record for the fastest boat ever propelled by oar by motor or by the grace of God himself through the heart of the Grand Canyon atop the Colorado River from Lee's Ferry to Lake Mead Did he survive Just barely Now this remarkable epic feat unfolds here in The Emerald Mile **The Magnificent West: Yosemite** Milton Goldstein, 1973 **Late Cenozoic Lava Dams in the Western Grand Canyon** William Kenneth Hamblin, 1994 The Late Cenozoic history of the western Grand Canyon is one of profound and rapid transformation The constantly changing morphology and dynamics of the canyon during this period have been recorded in spectacular geologic features such as frozen lava cascades and lava dams as well as volcanic cones necks and dikes All of these unique features which make the western part of the Grand Canyon strikingly different from other parts resulted from the interaction of basaltic lava flows and vigorous erosion by the Colorado River The volcanic phenomena in the Grand Canyon were created by eruptions of basaltic lava in the southernmost part of the Uinkaret volcanic field Some lava flows were extruded on the Uinkaret Plateau and cascaded over the outer rim of the Grand Canyon into Toroweap Valley and Whitmore Wash while others were extruded within the Grand Canyon itself and partly covered the Esplanade Platform The remaining flows cascaded over the rim of the canyon's inner gorge Red molten rock cascading into the canyon and forming lava dams must have presented a spectacular scene the likes of which have never been viewed by human beings Even more spectacular is how quickly these lava dams formed from small single flow dams that were created in only a few days to complex multiple flow dams that took several thousand years The dams were then destroyed when the water impounded behind them ultimately overflowed Although their construction and destruction occurred in a geologic instant these events were the most significant in the late Cenozoic history of the Grand Canyon Because of the largely inaccessible nature of the western part of the canyon the author and his field assistants researching this area had to be creative in their data gathering techniques For example they made photo mosaics of the entire canyon wall using a hand held aerial camera these mosaics served as cross sections on which all geological data were plotted In addition to photograph features hidden from view at river level they

utilized light aircraft and helicopters Finally a professional mountain climber collected samples from various units exposed high on vertical cliffs Memoir 183 is a compilation of this field work which took more than two decades to complete It contains numerous maps photographs and cross sections of frozen lava cascades and the remnants of a sequence of 13 major lava dams that once formed huge barriers to the Colorado River The volume also discusses the history of lakes that formed behind these lava dams and the associated sedimentary deposits that once partly filled the Grand Canyon The results of this study provide new insights into the rates at which the Colorado River is able to downcut its channel as well as the major factors that controlled erosion of the Grand Canyon Little Kid, Big City!: New York Beth Beckman,2021-02-02 If you could have an adventure in New York City where would you go Curious readers will find plenty to see learn and explore in this fun and illustrated pick your own path travel guide Would you walk the Brooklyn Bridge for a huge slice of pizza see the dazzling lights in Times Square or visit the whale at the Museum of Natural History Create your own itinerary choose which places to visit at the end of every page and follow along with an adventurous family as they explore New York Visit iconic sites like the Statue of Liberty the Empire State Building and the legendary Broadway theater district Grab a slice from New York s iconic pizzerias sample world famous bagels and try a taste of Harlem Soul food Discover off the beaten path destinations such as the Little Red Lighthouse the Underground Transit Museum and the Boardwalk of Coney Island Travel through the city that never sleeps by waterway ferry subway and the iconic yellow taxi Get to know the diversity of the city through visits to Chinatown Little Italy Queens and Harlem Featuring playful illustrations a diverse and lovable cast of characters an invaluable resources section and a fun foldout map this book is an ingenious way for kids to take the lead while planning a vacation or learning about one of the largest cities in the world Whether you re an armchair traveler or a real life tourist Little Kid Big City has everything you need to invent your own adventure Next stop Little Kid Big City London *Desert View Drive in Grand Canyon National Park* United States.
