R. Dubhashi, 1995 Non-discrimination and Equality in India Vidhu Verma, 2011-11-17 Social Justice is a concept familiar to most Indians but one whose meaning is not always understood as it signifies a variety of government strategies designed to enhance opportunities for underprivileged groups By tracing the trajectory of social justice from the colonial period to the present this book examines how it informs ideas practices and debates on discrimination and disadvantage today After outlining the historical context for reservations for scheduled castes and scheduled tribes that began under British colonial rule the book examines the legal and moral strands of demands raised by newer groups since 1990 In addition the book shows how the development of quota policies has been significantly influenced by the nature and operation of democracy in India It describes the recent proliferation of quota demands for reservations in higher education private sector and for women and religious minorities in legislative assemblies The book goes on to argue that while proliferation of demands address unequal incidence of poverty deprivation and inequalities across social groups and communities care has to be taken to ensure that existing justifications for quotas for discriminated groups due to caste hierarchies are not undermined Providing a rich historical background to the subject the book is a useful contribution to the study on the evolution of multiple conceptions of social justice in contemporary India *History Notes for Assistant Professor UGC NTA NET Exam* Mocktime Publication, 101-01-01 Syllabus 1 Food Science and Nutrition Fundamentals Exploring food science and nutrition the physical and chemical properties of food and methods for both objective and subjective quality evaluation of foods 2 Food Processing Preservation and Additives Understanding the effects of cooking and processing techniques on nutritional components and other physical parameters alongside food preservation principles and application food pigments and food additives 3 Food Safety Standards and Service Perspectives Covering food standards microbiological safety of food HACCP food packaging and the perspectives of food service including menu planning food cost analysis and new product development with a focus on nano technology 4 Institutional Food Service Management
