Improving Survey Questions Floyd J. Fowler, 1995-07-21 Questions as Measures An Overview Designing Questions to

Gather Factual Data Questions to Measure Subjective States Some General Rules for Designing Good Survey Instruments Presurvey Evaluation of Questions Assessing the Validity of Survey Questions Question Design and Evaluation Issues in Perspective Encyclopedia of Survey Research Methods Paul J. Lavrakas, 2008-09-12 To the uninformed surveys appear to be an easy type of research to design and conduct but when students and professionals delve deeper they encounter the vast complexities that the range and practice of survey methods present To complicate matters technology has rapidly affected the way surveys can be conducted today surveys are conducted via cell phone the Internet email interactive voice response and other technology based modes Thus students researchers and professionals need both a comprehensive understanding of these complexities and a revised set of tools to meet the challenges In conjunction with top survey researchers around the world and with Nielsen Media Research serving as the corporate sponsor the Encyclopedia of Survey Research Methods presents state of the art information and methodological examples from the field of survey research Although there are other how to guides and references texts on survey research none is as comprehensive as this Encyclopedia and none presents the material in such a focused and approachable manner With more than 600 entries this resource uses a Total Survey Error perspective that considers all aspects of possible survey error from a cost benefit standpoint Key Features Covers all major facets of survey research methodology from selecting the sample design and the sampling frame designing and pretesting the questionnaire data collection and data coding to the thorny issues surrounding diminishing response rates confidentiality privacy informed consent and other ethical issues data weighting and data analyses Presents a Reader's Guide to organize entries around themes or specific topics and easily guide users to areas of interest Offers cross referenced terms a brief listing of Further Readings and stable Web site URLs following most entries The Encyclopedia of Survey Research Methods is specifically written to appeal to beginning intermediate and advanced students practitioners researchers consultants and consumers of survey based information Social and Behavioral Research and the Internet Marcel Das, Peter Ester, Lars Kaczmirek, 2018-10-24 Highlighting the progress made by researchers in using Web based surveys for data collection this timely volume summarizes the experiences of leading behavioral and social scientists from Europe and the US who collected data using the Internet Some chapters present theory methodology design and implementation while others focus on best practice examples and or issues such as data quality and understanding paradata A number of contributors applied innovative Web based research methods to the LISS panel of CentERdata collected from over 5 000 Dutch households Their findings are presented in the book Some of the data is available on the book website The book addresses practical issues such as data quality how to reach difficult target groups how to design a survey to maximize response and ethical issues that need to be considered Innovative applications such as the use of biomarkers and eye tracking techniques are also explored Part 1 provides an overview of Internet survey research including its methodologies strengths challenges and best practices Innovative ways to minimize sources of error are provided along with a review of mixed mode designs how to design a

scientifically sound longitudinal panel and avoid sampling problems and address ethical requirements in Web surveys Part 2 focuses on advanced applications including the impact of visual design on the interpretability of survey questions the impact survey usability has on respondents answers design features that increase interaction and how Internet surveys can be effectively used to study sensitive issues Part 3 addresses data quality sample selection measurement and non response error and new applications for collecting online data The issue of underrepresentation of certain groups in Internet research and the measures most effective at reducing it are also addressed The book concludes with a discussion of the importance of paradata and the Web data collection process in general followed by chapters with innovative experiments using eye tracking techniques and biomarker data This practical book appeals to practitioners from market survey research institutes and researchers in disciplines such as psychology education sociology political science health studies marketing economics and business who use the Internet for data collection but is also an ideal supplement for graduate and or upper level undergraduate courses on Internet research methods and or data collection taught in these fields
