Grounding in English and Arabic News Discourse Esam N. Khalil, 2000-01-01 Grounding in English and Arabic News Discourse explores the discourse notion of grounding viz the foreground background structure and examines it in the various structures that occur in short news texts A text level approach to grounding and the differentiation between several core concepts relating to the various textual and non textual structures distinguish the book from other approaches in the field A corpus based analysis focuses on sentence initial expressions and examines the grounding signalling function of several markers in both English and Arabic The analysis captures constraints on the occurrence of particular markers and the extensive illustrative examples explain the strategies that writers employ to cope with problems of recasting grounding values in news texts The author also shows how the failure to signal appropriate grounding values is likewise associated with the failure to deliver the appropriate type of text Grounding is a relatively unexplored area of investigation in Arabic text linguistics and the study identifies a series of previously unrecognized language features highlighting the discourse pragmatic function that syntax serves The book will be invaluable to researchers and students of discourse pragmatics contrastive rhetoric and communication It will also be of interest to all those involved in translation and intercultural studies
