Main Source Learning From Television News:

Interpreting Television News Gabi Schaap, 2009-12-15 Television news range among the most extensively investigated topics in communication studies The book contributes to television news research by focusing on whether and how news viewers who watch the same news program form similar or different interpretations The author develops a novel concept of interpretation based on cognitive complexity research He strongly argues that qualitative and quantitative research methods work best if they complement one another

The Main Source John P. Robinson, Mark R. Levy, 1986 The authors effectively challenge the myth that the public gets or thinks it gets most of its news from television In a wide ranging study with European and US data of what the public actually learns from the news media they conclude that television is not the public's main source for news The Main Source shows that public understanding of news information is considerably higher than previous research has found but that television news presentation could be far more effective These results are based on innovative survey techniques for the naturalistic study of news awareness comprehensive detailed content analyses and an important new synthesis of 20 years research The book breaks new ground in effects research and in consideration of news media policy It raises significant questions about the current state of communication theory shows how journalistic practice could be changed to improve public understanding of the news and links its findings to a reconsideration of normative theories of public communication

The Future of News Philip S. Cook, Douglas Gomery, Lawrence W. Lichty, 1992-04 Analyzing these and other trends The Future of News offers a thoughtful and provocative preview of the media's role in the coming century

Commercial Culture Leo Bogart, 2017-09-29 American mass media are the world's most diverse rich and free Their dazzling resources variety and influence arouse envy in other countries Their failures are commonly excused on the grounds that they are creatures of the market that they give people what they want Commercial Culture focuses not on the glories of the media but on what is wrong with them and why and how they may be made better This powerful critique of American mass communication highlights four trends that sound an urgent call for reform the blurring of distinctions among traditional media and between individual and mass communication the increasing concentration of media control in a disturbingly small number of powerful organizations the shift from advertisers to consumers as the source of media revenues and the growing confusion of information and entertainment of the real and the imaginary The future direction of the media Leo Bogart contends should not be left to market forces alone He shows how the public's appetite for media differs from other demands the market is left to satisfy because of how profoundly the media shape the public's character and values Bogart concludes that a world of new communications technology requires a coherent national media policy respectful of the American tradition of free expression and subject to vigorous public scrutiny and debate Commercial Culture is a comprehensive analysis of the media as they evolve in a technological age It will appeal to general readers interested in mass communications as well as professionals and scholars studying American mass media

The Politics of Garbage Lawrence S. Luton, 2010-11-23 Increased environmental awareness more demands on local governments a newly invigorated citizen activism and a decaying and overburdened infrastructure have made taking care of our garbage one of the major policy making challenges facing local communities Luton uses the case study of Spokane WA to analyze the public administration and socio political context of solid waste policy making Luton's thorough exploration of Spokane's experience as opens a window onto contemporary issues of solid waste management as well as the complex social and political environment in which public administrators must operate His integration of systems theory in the analysis adds to the book's value as a teaching tool for courses on policy making urban planning public administration and the environment He examines the complex combination of ecological political social and relational dynamics that affect such policies providing insight into inter governmental public policy making

News Narratives and News Framing Karen S. Johnson-Cartee, 2005 News Narratives and News Framing is a revealing look at how the media's construction of news affects our political economic and social realities In this introduction to the theory behind news framing Karen Johnson Cartee pulls together elements from communication journalism politics and sociology to create a picture of how news forms these realities for the public With its comprehensive reference section and suggestions on how to influence the news agenda this is a beneficial resource for students in political communication media

criticism and communication theory Visit our website for sample chapters Political Communication Richard M. Perloff,2013-10-18 In this political communication text Richard M Perloff examines the various ways in which messages are constructed and communicated from public officials and politicians through the mass media to the ultimate receivers the people With a focus on the history of political communication he provides an overview of the most significant issues in the study of politics and the media In addition to synthesizing facts and theories and highlighting the scholarly contributions made to the understanding of political communication effects Political Communication addresses such factors as the rhetorical accomplishments of American presidents the ongoing tangles between the press and the presidency and the historical roots of politics as it is practiced and studied today It also addresses major issues about the press and politics that continually resurface such as question of press bias and the use and manipulation of media by politicians to accomplish national goals As a comprehensive and engaging introduction to contemporary political communication this volume provides all readers with a historical perspective on American politics and press and offers a unique appreciation of the strengths and virtues of political communication in America **The Comprehension and Miscomprehension of Print Communication** Jacob Jacoby,Wayne D. Hoyer,2013-11-26 First Published in 1987 To writers and visualizers this study sets a range of expectations for comprehension and miscomprehension pointing the finger of caution that even what seems the simplest of language can be misunderstood but also calling forth their best efforts because this benchmark study shows that some communications can be much more successful than others and there is usually room for improvement To advertisers the study says that perhaps we often take comprehension too much for granted being satisfied when consumers respond with something in the general area of our message rather than in the precise area of what is meant To academicians the study gives reliable reference points for thought and dialogue among themselves and the advertising and publishing communities It underlines what intuitive editors and writers have always known but have not always practiced that words and ideas are fragile handle with care if you hope to deliver them intact from one mind to another **News of the World** Klaus Bruhn Jensen,2003-12-16 This is the first in depth study of how television viewers around the world respond to the ever increasing mass of information available from news programmes Based on individual and household interviews in seven countries including India Mexico Italy and Denmark the contributors examine the flow of news information across national and international borders **The BBC and the Public** Barrie Gunter,2024-10-23 This book examines the relationship between the public and the BBC in terms of public use of the BBC and their attitudes towards it These audience research measures are being used as metrics to assess the value of the BBC to the UK public Some of the attitudinal measures address perceptions of the BBC s outputs and some examine public views about the way the BBC is funded and managed The book has been written at a time when the BBC reached its centenary and also the mid point of its latest Royal Charter period At the time of writing the government had begun a mid term review of its performance as judged by its attainment of objectives

set out in that Charter The Secretary of State for Digital Culture Media and Sport at the time of the mid term review had spoken and written openly about abolishing the TV licence fee and the introduction of a new funding model for the BBC that would be implemented in its new Royal Charter due to be enacted in 2027 Against this backdrop this book examines public opinion about the funding of the BBC and then looks at changing media consumption habits and how these have affected patronage of the BBC s outputs Ultimately a decision must be taken about the kind of national broadcaster the UK both is government and its citizens would like to keep in the future Changing the funding model without first defining what the BBC should do and how it should be structured and resourced to do it could result in a messy solution that satisfies and benefits no one
