Books in Print Supplement ,1982 *Subject Guide to Books in Print* ,1993 **The Publishers' Trade List Annual** ,1985 *The Ballad of the Lone Medievalist* Kisha G. Tracy,John P. Sexton,2018 Working medievalists are often the only scholar of the Middle Ages in a department a university or a hundred mile radius While working to build a body of focused scholarly work the lone medievalist is expected to be a generalist in the classroom and a contributing member of a campus community that rarely offers disciplinary community in return As a result overtasked and single medievalists often find it challenging to advocate for their work and field As other responsibilities and expectations crowd in we come to feel disconnected from the projects and subjects that sustain our intellectual passion An insidious isolation even from one another creeps in and soon even attending a conference of fellow medievalists can become a lonely experience Surrounded by scholars with greater institutional support lower teaching loads or more robust research agendas we may feel alienated from our work the work to which we've dedicated our careers The Lone Medievalist the collaborative community and the book is intended as an antidote to the problem of professional isolation It is offered in the spirit of common weal that marks the ideals if not always the realities of so many of the communities we study agricultural professional national notional and of course monastic The Ballad of the Lone Medievalist isn't only about scholarship or teaching or institutional life or the pursuit of new learning it's about all of them The essays in this volume address all aspects of the professional and intellectual life of medievalists Though many of us acknowledge and address the challenges in being Lone Medievalists these essays are not intended as voces clamantium they are offered to provide strategies camaraderie and an occasional bit of inspiration They are a call to action a sharing of hard won wisdom and a helping hand and above all a reminder that we are not alone

Chronology and Documentary Handbook of the State of Maine Robert I. Vexler,1978 A chronology of historical events from 1497 to 1975 with a directory of prominent citizens and copies of pertinent documents *Women and Military Service* Margaret Conrad Devilbiss,1990 **Nothing Happened** Susan A. Crane,2024-04-02 The past is what happened History is what we remember and write about that past the narratives we craft to make sense out of our memories and their sources But what does it mean to look at the past and to remember that nothing happened Why might we feel as if nothing is the way it was This book transforms these utterly ordinary observations and redefines Nothing as something we have known and can remember Nothing has been a catch all term for everything that is supposedly uninteresting or is just not there It will take some possibly considerable mental adjustment before we can see Nothing as Susan A Crane does here with a capital n But Nothing has actually been happening all along As Crane shows in her witty and provocative discussion Nothing is nothing less than fascinating When Nothing has changed but we think that it should have we might call that injustice when Nothing has happened over a long slow period of time we might call that boring Justice and boredom have histories So too does being relieved or disappointed when Nothing happens for instance when a forecasted end of the world does not occur

and millennial movements have to regroup By paying attention to how we understand Nothing to be happening in the present what it means to know Nothing or to do Nothing we can begin to ask how those experiences will be remembered Susan A Crane moves effortlessly between different modes of seeing Nothing drawing on visual analysis and cultural studies to suggest a new way of thinking about history By remembering how Nothing happened or how Nothing is the way it was or how Nothing has changed we can recover histories that were there all along **The Savage Mind** Claude

Lévi-Strauss,1999 *Drought* Justin Sheffield,Eric F. Wood,2012-11-12 Drought is one of the likely consequences of climate change in many regions of the world Together with an increased demand for water resources to supply the world s growing population it represents a potentially disastrous threat to water supplies agriculture and food production leading to famine and environmental degradation Yet predicting drought is fraught with difficulty The aim of this book is to provide a review of the historical occurrence of global drought particularly during the 20th century and assess the likely potential changes over the 21st century under climate change This includes documentation of the occurrence and impacts of major 20th century drought events and analysis of the contributing climatic and environmental factors that act to force prolong and dissipate drought Contemporary drought is placed in the context of climate variability since the last ice age including the many severe and lengthy drought events that contributed to the demise of great civilizations the disappearance of lakes and rivers and the conversion of forests to deserts The authors discuss the developing field of drought monitoring and seasonal forecasting and describe how this is vital for identifying emerging droughts and for providing timely warning to help reduce the impacts The book provides a broad overview of large scale drought from historic events such as the US Dust Bowl and African Sahel and places this in the context of climate variability and change The work is soundly based on detailed research that has looked at drought occurrence over the 20th century global drought monitoring modelling and seasonal prediction and future projections from climate models **Mapping Travel** Jordana Dym,2021-08-30 More often than not readers of travel

narratives can expect to find at least one map if not several showing as English privateer William Dampier wrote the Course of the Voyage that is where the author traveler went and implicitly a sense of what was seen and experienced Dampier used a now common cartographic strategy to tell the story from beginning to end as well as around significant places on the way by marking the journey with a pricked line Despite the lines popularity and present ubiquity the complex intellectual and material process of considering travel as a continuum rather than as a series of stops along the way and of plotting a journey onto a map have attracted relatively little academic attention Drawing on a thousand years of European travel writing and map making Jordana Dym suggests that after centuries of text based itineraries and on the spot directions guiding travelers and constituting their reports maps in the fifteenth century emerged as tools for Europeans to support and report the results of land and sea travel Called in subsequent centuries route maps itinerary maps and travel maps often interchangeably what Dym defines as journey maps added lines of travel to show where travelers had been Since their emergence most have taken

one of two forms itinerary maps which connected stages as points with a line and route maps which tracked unbroken lines between endpoints In the seventeenth century the conventions of journey mapping were codified and increasingly incorporated into travel writing and other genres that represented individual travel With each succeeding generation these linear journey maps have become increasingly common and complex responding to changes in forms of transportation such as air and motor car flight and print technology especially the advent of multi color printing This is their story How We Think N. Katherine Hayles, 2012-04-11 How do we think N Katherine Hayles poses this question at the beginning of this bracing exploration of the idea that we think through with and alongside media As the age of print passes and new technologies appear every day this proposition has become far more complicated particularly for the traditionally print based disciplines in the humanities and qualitative social sciences With a rift growing between digital scholarship and its print based counterpart Hayles argues for contemporary technogenesis the belief that humans and technics are coevolving and advocates for what she calls comparative media studies a new approach to locating digital work within print traditions and vice versa Hayles examines the evolution of the field from the traditional humanities and how the digital humanities are changing academic scholarship research teaching and publication She goes on to depict the neurological consequences of working in digital media where skimming and scanning or hyper reading and analysis through machine algorithms are forms of reading as valid as close reading once was Hayles contends that we must recognize all three types of reading and understand the limitations and possibilities of each In addition to illustrating what a comparative media perspective entails Hayles explores the technogenesis spiral in its full complexity She considers the effects of early databases such as telegraph code books and confronts our changing perceptions of time and space in the digital age illustrating this through three innovative digital productions Steve Tomasula s electronic novel TOC Steven Hall s The Raw Shark Texts and Mark Z Danielewski s Only Revolutions Deepening our understanding of the extraordinary transformative powers digital technologies have placed in the hands of humanists How We Think presents a cogent rationale for tackling the challenges facing the humanities today *Encyclopedia of Biology* Don Rittner, Timothy Lee McCabe, 2004-01 Contains approximately eight hundred alphabetical entries prose essays on important topics line illustrations and black and white photographs *Keeping the Wild* George Wuerthner, Eileen Crist, Tom Butler, 2014-05-06 Is it time to embrace the so called Anthropocene the age of human dominion and to abandon tried and true conservation tools such as parks and wilderness areas Is the future of Earth to be fully domesticated an engineered global garden managed by technocrats to serve humanity The schism between advocates of rewilding and those who accept and even celebrate a post wild world is arguably the hottest intellectual battle in contemporary conservation In *Keeping the Wild* a group of prominent scientists writers and conservation activists responds to the Anthropocene boosters who claim that wild nature is no more or in any case not much worth caring about that human caused extinction is acceptable and that novel ecosystems are an adequate replacement for natural landscapes

With rhetorical fists swinging the book's contributors argue that these new environmentalists embody the hubris of the managerial mindset and offer a conservation strategy that will fail to protect life in all its buzzing blossoming diversity. With essays from Eileen Crist, David Ehrenfeld, Dave Foreman, Lisi Krall, Harvey Locke, Curt Meine, Kathleen Dean Moore, Michael Soul, Terry Tempest Williams, and other leading thinkers, *Keeping the Wild* provides an introduction to this important debate and a critique of the Anthropocene boosters' attack on traditional conservation and unapologetic advocacy for wild nature.

Words Without Pictures Charlotte Cotton, Alex Klein, 2010. *Words Without Pictures* was originally conceived of by curator Charlotte Cotton as a means of creating spaces for thoughtful and urgent discourse around current issues in photography. Every month for a year beginning in November 2007, an artist, educator, critic, art historian, or curator was invited to contribute a short, unillustrated and opinionated essay about an aspect of photography that in his or her view was either emerging or in the process of being rephrased. Each piece was available on the *Words Without Pictures* website for one month and was accompanied by a discussion forum focused on its specific topic. Over the course of its month-long life, each essay received both invited and unsolicited responses from a wide range of interested parties: students, photographers active in the commercial sector, bloggers, critics, historians, artists of all kinds, educators, publishers, and photography enthusiasts alike, all coming together to consider the issues at hand. All of these essays, responses, and other provocations are gathered together in a volume designed by David Reinfurt of Dexter Sinister. Previously issued as a print-on-demand title, *Aperture* is pleased to present *Words Without Pictures* to the trade for the first time as part of the *Aperture Ideas* series.

African American Firsts Joan Potter, 2009. Excluded from history books, overlooked in classrooms, and neglected by the media, African Americans have long been denied an accurate picture of their contributions to America from colonial days to the present. But times have changed, and the record can now be set straight. From the inventors of the traffic light and the gas mask to winners of an Oscar and the Olympic gold, this authoritative resource reveals over 450 firsts by African Americans, wonderful accomplishments achieved despite poverty, discrimination, and racism.
