Changing the Workplace Safety Culture Ron C. McKinnon, 2013-07-15 Despite the fact that workplaces have implemented and followed new safety innovations and approaches the majority of them have seen little if any significant progress in the reduction of accidental deaths and injuries Changing the Workplace Safety Culture demonstrates that changing the way an organization views and practices safety will impact the behavior of all employees including executive and line managers It delineates how safety culture change can be implemented and defines the roles of everyone in the safety culture including management employees and unions and their members Rather than focus on behavior based safety measures this book provides step by step procedures on how to establish a long lasting integrated safety management system in any organization It explores how to change the safety personality of an organization The author covers the management

principles and functions that need to be applied to bring about safety culture change and includes many real life examples He goes on to explain the activities needed to implement safety change and the benefits of getting others involved in the safety management system The only way to ensure that accidents and their consequences are tackled at the source is to identify and eliminate the workplace risks before rather than after the event To be truly effective safety activities must be integrated into the day to day business and become a way of life for management and employees of the organization This book provides a blueprint for creating an active safety culture that prevents accidents before they occur and becomes the key component in ongoing safety success

World Day for Safety and Health at Work 2023 Maria Malliarou, Antonio Caputi ,Luigi De Maria, 2024-07-29 The World Day for Safety and Health at Work takes place annually on the 28th of April to globally promote the prevention of accidents and diseases at work The International Labour Organisation ILO began to observe this day in 2003 to promote a safe and healthy work environment as a fundamental principle and right at work through collaboration and encouraging open social dialogue We have learned from past and ongoing crises such as the COVID 19 pandemic that workplaces can be of vital importance in the prevention and control of outbreaks During this unprecedented period it was demonstrated that effective participation and communication between governments employers and workers had an essential role in transforming occupational health and safety systems through implementing effective health and safety measures in the workplace to contain the spread of disease systems were built that not only safeguarded the health and safety of workers but protected and upheld the health of society at large In addition these measures allowed important services to continue in confidence with health and safety being at the forefront
