Hawker, 1992 In this magnificent book Oliver Schuchard provides more than sixty five exquisite black and white photographs spanning his thirty eight years of photography In addition he explains the aesthetic rationale and techniques he used in order to produce these photographs emphasizing the profound differences between yet necessary interdependence of craft and content Although Schuchard believes that craft is important he maintains that the idea behind the photograph and the emotional content of the image are equally vital and are in fact functions of one another The author also shares components of his life experience that he believes helped shape his development as an artist and a teacher He chose the splendid photographs included in this book from among nearly 5 000 negatives that had been exposed all over the world from Missouri to Maine California Alaska Colorado France Newfoundland and Hawaii among many other locations Approximately 250 negatives survived the initial review and each of those was printed before a final decision was made on which photographs were to be featured in the book The final choices are representative of Schuchard's work and serve to

substantiate his belief that craft concept and self must be fully understood and carefully melded for a good photograph to occur This amazing work by award winning photographer Oliver Schuchard will be treasured by professional and amateur photographers alike as well as by anyone who simply enjoys superb photography Publishers website
