A Text-Book of the History of Painting John Charles Van Dyke, 2016-08-08 The object of this series of text books is to provide concise teachable histories of art for class room use in schools and colleges The limited time given to the study of art in the average educational institution has not only dictated the condensed style of the volumes but has limited their scope of matter to the general features of art history Arch ological discussions on special subjects and sthetic theories have been avoided The main facts of history as settled by the best authorities are given If the reader choose to enter into particulars the bibliography cited at the head of each chapter will be found helpful Illustrations have been introduced as sight help to the text and to avoid repetition abbreviations have been used wherever practicable The enumeration of the principal extant works of an artist school or period and where they may be found which follows each chapter may be serviceable not only as a summary of individual or school achievement but for reference by travelling students in Europe This volume on painting the first of the series omits mention of such work in Arabic Indian Chinese and Persian art as may come properly under the head of Ornament a viii subject proposed for separate treatment hereafter In treating of individual painters it has been thought best to give a short critical estimate of the man and his rank among the painters of his time rather than the detailed facts of his life Students who wish accounts of the lives of the painters should use Vasari Larousse and the Encyclop dia Britannica in connection with this text book Acknowledgments are made to the respective publishers of Woltmann and Woermann s History of Painting and the fine series of art histories by Perrot and Chipiez for permission to reproduce some few illustrations from these publications

**History of Painting** John Charles Van Dyke, 2018-06-27 History of Painting John Charles Van Dyke The origin of painting is unknown The first important records of this art are met with in Egypt but before the Egyptian civilization the men of the early ages probably used color in ornamentation and decoration and they certainly scratched the outlines of men and animals upon bone and slate Traces of this rude primitive work still remain to us on the pottery weapons and stone implements of the cave dwellers But while indicating the awakening of intelligence in early man they can be reckoned with as art only in a slight arch ological way They show inclination rather than accomplishment a wish to ornament or to represent with only a crude knowledge of how to go about it We are delighted to publish this classic book as part of our extensive Classic Library collection Many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature and our view is that this is a significant literary work which deserves to be brought back into print after many decades The contents of the vast majority of titles in the Classic Library have been scanned from the original works To ensure a high quality product each title has been meticulously hand curated by our staff Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work We hope that you will enjoy this wonderful classic work and that for you it becomes an enriching experience
