Louis Pasteur The Man His Theories:

The Private Science of Louis Pasteur Gerald L. Geison, 2014-07-14 In *The Private Science of Louis Pasteur* Gerald Geison has written a controversial biography that finally penetrates the secrecy that has surrounded much of this legendary scientist's laboratory work. Geison uses Pasteur's laboratory notebooks made available only recently and his published papers to present a rich and full account of some of the most famous episodes in the history of science and their darker sides: for example, Pasteur's rush to develop the rabies vaccine and the human risks his haste entailed. The discrepancies between the public record and the private science of Louis Pasteur tell us as much about the man as they do about the highly competitive and political world he learned to master. Although experimental ingenuity served Pasteur well, he also owed much of his success to the polemical virtuosity and political savvy that won him unprecedented financial support from the French state during the late nineteenth century. But a close look at his greatest achievements raises ethical issues. In the case of Pasteur's widely publicized anthrax vaccine, Geison reveals its initial defects and how Pasteur, in order to avoid embarrassment, secretly incorporated a rival colleague's findings to make his version of the vaccine work. Pasteur's premature decision to apply his rabies treatment to his first animal bite victims raises even deeper questions and must be understood not only in terms of the ethics of human experimentation and scientific method but also in light of Pasteur's shift from a biological theory of immunity to a chemical theory similar to ones he had often disparaged when advanced by his competitors. Through his vivid reconstruction of the professional rivalries as well as the national adulation that surrounded Pasteur, Geison places him in his wider cultural context. In giving Pasteur the close scrutiny his fame and achievements deserve, Geison's book offers compelling reading for anyone interested in the social and ethical dimensions of science. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

The Life of Pasteur René Vallery-Radot, 1911 **The Genesis of Germs** Alan Gillen, 2007 As the world waits in fear, the CDC and world health organizations race to minimize the current pandemic, a looming threat that has forced international, federal, and local governments to deal with COVID-19 and other future epidemics and the widespread death and devastation which would follow. Will the world find the answers in time? Or will we see a deadly threat ravage populations as others have before? In 1918, with influenza; in the late 18th century, with yellow fever; or the horrific black death or bubonic plague in 1347 AD. Are these viruses examples of evolution? Did God make microbes by mistake? Are they accidents of evolution out of the primordial soup? These timely questions are examined throughout this book, from chapter 1. It seems that a new and more terrible disease is touted on the news almost daily. The spread of these scary diseases, from avian flu to

SARS to AIDS is a cause for concern and leads to questions such as Where did all these germs come from How do they fit into a biblical world view What kind of function did these microbes have before the Fall Does antibiotic resistance in bacteria prove evolution How can something so small have such a huge deadly impact on the world around us Professor Alan Gillen sheds light on these and many other questions in this revealing and detailed book He shows how these constantly mutating diseases are proof for devolution rather than evolution and how all of these germs fit into a biblical world view Dr Gillen shows how germs are symptomatic of the literal Fall and Curse of creation as a result of man's sin and the hope we have in the coming of Jesus Christ
