which Apartamento will be re issuing later in 2021 Publisher website

Revolution in the Making Emily Rothrum, Elizabeth A. T. Smith, Anne Wagner, 2016 Half the World traces the ways in which women artists deftly transformed the language of sculpture to invent radically new forms and processes that privileged studio practice tactility and the artist's hand The volume seeks to identify the multiple strains of proto feminist practices characterized by abstraction and repetition which rejected the singularity of the masterwork and rearranged sculptural form to be contingent upon the way the body moved around it in space The catalogue begins in the immediate post war era with the first section spanning the late 1950s through the 1950s Featuring historically important predecessors including Ruth Asawa Lee Bontecou Louise Bourgeois Claire Falkenstein and Louise Nevelson this section examines abstraction based on the human figure and the influence of the unconscious The second section covers the decades of the 1960s and 1970s and includes Magdalena Abakanowicz Lynda Benglis Heidi Bucher Gego Franco Grossen Eva Hesse Sheila Hicks Marisa Merz Mira Schendel Michelle Stuart Hannah Wilke and Jackie Winsor a generation of post minimalist artists who ignited a revolution in their use of process oriented materials and methods In the 1980s and 1990s the period explored in the third section artists Phyllida Barlow Isa Genzken Cristina Iglesias Liz Larner Anna Maria Maiolino Senga Nengudi and Ursula von Rydingsvard moved beyond singular three dimensional objects toward architectonic works characterized by repetition structure and design The final section is comprised of post 2000 works by artists Karla Black Abigail DeVille Sonia Gomes Rachel Khedoori Lara Schmitz Shinique Smith and Jessica Stockholder artists who create installation based environments embracing domestic materials and craft as an embedded discourse

The Inhabitable Flesh of Architecture Marcos Cruz, 2017-03-02 Today's architecture has failed the body with its long heritage of purity of form and aesthetic of cleanliness A resurgence of interest in flesh especially in art has led to a politics of abjection completely changing traditional aesthetics and is now giving light to an alternative discussion about the body in architecture This book is dedicated to a future vision of the body in architecture questioning the contemporary relationship between our Human Flesh and the changing Architectural Flesh Through the analysis and design of a variety of buildings and projects Flesh is proposed as a concept that extends the meaning of skin one of architecture's most fundamental metaphors It seeks to challenge a common misunderstanding of skin as a flat and thin surface In a time when a pervasive discourse about the impact of digital technologies risks turning the architectural skin ever more disembodied this book argues for a thick embodied flesh by exploring architectural interfaces that are truly inhabitable Different concepts of Flesh are investigated not only concerning the architectural and aesthetic but also the biological aspects The latter is materialised in form of Synthetic Neoplasms which are proposed as new semi living entities rather than more commonly derived from scaled up analogies between biological systems and larger scale architectural constructs These neoplastic creations are identified as partly designed object and partly living material in which the line between the natural and the artificial is progressively blurred Hybrid technologies and interdisciplinary work methodologies are thus

required and lead to a revision of our current architectural practice
