for his teaching and consultation      **Somatics** Thomas Hanna, 2004-08-04 When our bodies start to feel stiff sore or tired we often say that we're getting old. But is that really the problem? In this groundbreaking work Thomas Hanna shows that much of the physical decline associated with aging is not inevitable but avoidable. Building on the work of Moshe Feldenkrais, Hanna's practical program for the mind and body proves once and for all that problems you've always thought of as the symptoms of age—stiffness, bad back, chronic pain, fatigue, and at times even high blood pressure—need never occur if you maintain conscious control of your nerves and muscles. He shows how the body can turn a habitual action into an involuntary destructive pattern called sensory motor amnesia and demonstrates a simple but effective method for conquering these habits with sensory motor awareness. With only a five-minute routine once a day you can maintain the pleasures of a limber healthy body indefinitely and escape the confines of age or injury. Practical and easy to use, *Somatics* is the essential guide to reversing the physical effects of aging or staving them off before they even begin.      Being Human at Work Richard Strozzi-Heckler, 2011-06-14 This anthology of interdisciplinary writings looks at the integration of mind, body, and spirit as it plays out in the workplace, whether in birth coaching, teaching, parents assisting the terminally ill, or working in the military, the classroom, or the corporation. These essays reveal what gets in the way of our humanity in the work world and how to rediscover that humanity. Written by leading professionals in business, education, medicine, technology, finance, psychology, and the military, this collection of essays explores how reconnecting with one's humanity can result in true leadership in any field.

**Your Body Speaks Its Mind** Stanley Keleman, 1981      **In an Unspoken Voice** Peter A. Levine, Ph.D., 2010-09-28 Unraveling trauma in the body, brain, and mind: a revolution in treatment. Now in 17 languages. In this culmination of his life's work, Peter A. Levine draws on his broad experience as a clinician, a student of comparative brain research, a stress scientist, and a keen observer of the naturalistic animal world to explain the nature and transformation of trauma in the body, brain, and psyche. *In an Unspoken Voice* is based on the idea that trauma is neither a disease nor a disorder but rather an injury caused by fright, helplessness, and loss that can be healed by engaging our innate capacity to self-regulate high states of arousal and intense emotions. Enriched with a coherent theoretical framework and compelling case examples, the book elegantly blends the latest findings in biology, neuroscience, and body-oriented psychotherapy to show that when we bring together animal instinct and reason, we can become more whole human beings.      **The Art of Somatic Coaching** Richard Strozzi-Heckler, 2014-02-11 The Art of Somatic Coaching introduces the concepts and principles of coaching with practices that include body awareness, bodywork, and mindfulness for both the coach and the client. Author and expert coach Richard Strozzi Heckler, PhD, explains that in order to achieve truly sustainable changes in individuals, teams, and organizations, it is necessary to implement body-oriented somatic practices in order to dissolve habits, behaviors, and interpretations of the world that are no longer relevant. He explains that these ways of being are integrated in the body at the level of the musculature, organs, and nervous system. By implementing a somatic approach, these patterns can be shifted in order for transformation to

occur Opening with a discussion of the roots of Somatic Coaching the book describes the emotional and physical cost of being distanced from our bodies Originating from the rationalistic idea that the mind and body are separate this sense of disconnection spurred the emergence of the field of somatics that views the body as not just a physiological entity but as the center of our lived experience in the world Out of this philosophy Somatic Coaching was developed as a way to cultivate the self through the body Methods in this book include Somatic awareness becoming aware of sensations Somatic opening includes bodywork to release held patterns in the body Somatic practices meditation movement and being present in everyday life The social context in which one is raised the supportive healing force of the outdoors and nature as well as acknowledgment of the spirit are also woven into the practice Through these practices a rhythm of unfolding occurs in what Strozzi Heckler describes as an Arc of Transformation moving in stages from conditioned tendencies to a new satisfying and fulfilling way of being that is fully embodied Contents Introduction Chapter One A Short Distance but a Big Cost Chapter Two Coaching Chapter Three Somatics and Somatic Coaching Chapter Four The Methodology Chapter Five The Rhythm of Action Chapter Six The Somatic Arc of Transformation
