D.H. Lawrence and the Paradoxes of Psychic Life Barbara A. Schapiro,1999-08-12 Contributing to the debate about D H Lawrence s relationship with and fictional portrayal of women this book discusses how the dynamic tensions of his art dramatically reenact the competing forces of psychic and relational life In her examination of Sons and Lovers The Rainbow Women in Love and various short stories Schapiro discusses how Lawrence s best works reveal a continual struggle to recognize and be recognized by the other as an independent subject Drawing on Jessica Benjamin s psychoanalytic theory of intersubjectivity she also demonstrates how a breakdown of balanced subject subject relations in his texts gives rise to defensive polarities of gender and of domination and submission

BOOK JACKET *The Madness of Knowledge* Steven Connor,2021-07-21 Many human beings have considered the powers and the limits of human knowledge but few have wondered about the power that the idea of knowledge has over us Steven Connor s *The Madness of Knowledge* is the first book to investigate this emotional inner life of knowledge the lusts fantasies dreams and fears that the idea of knowing provokes There are in depth discussions of the imperious will to know of Freud s epistemophilia or love of knowledge and the curiously insistent links between madness magical thinking and the desire for knowledge Connor also probes secrets and revelations quarreling and the history of quizzes and general knowledge charlatanry and pretension both the violent disdain and the sanctification of the stupid as well as the emotional investment in the spaces and places of knowledge from the study to the library In an age of artificial intelligence alternative facts and mistrust of truth *The Madness of Knowledge* offers an opulent enlarging and sometimes unnerving psychopathology of intellectual life

A History of Women in Psychology and Neuroscience Dale DeBakcsy,2024-09-30 Since virtually its first moments as an academic science women have played a major role in the development of psychology gaining from the outset research opportunities and academic positions that had been denied them for centuries in other branches of scientific investigation Look wherever you will in any branch of psychology or neuroscience in the last century and a half and what you will find are a plethora of women whose discoveries fundamentally changed how we view the brain and its role in the formation of our perceptions and behaviors *A History of Women in Psychology and Neuroscience* tells the story of 267 women whose work opened new doors in humanity s ongoing attempt to learn about its own nature from Christine Ladd Franklin s late 19th century studies of how the brain perceives color to Virginia Johnson s

pioneering studies of the human sexual response and Augusta Dejerine Klumpke's early association of neurological conditions with their underlying brain regions to May Britt Moser's Nobel winning discovery a century later of the grid cells that allow us to mentally model our surroundings Here are the stories of when and how we learned how memories are formed what role an enriched environment plays in mental development why some individuals are better able to cope with chronic stress than others how societal stereotypes unconsciously feed into our daily interactions with other people what role evolution might have played in the formation of our social habits what light the practices of sign language might shed on our brain's basic capacity for language how children internalize the violence they experience from others and hundreds of other tales of the women who dug deep into the structures of the human mind to uncover layer by layer the answers to millennia old questions of what humans are and why they behave as they do

On Longing Susan Stewart, 1993 An analysis of the ways in which everyday objects are narrated to animate or realize certain versions of the world

Life to Those Shadows Noël Burch, 1990-11-21 Noel Burch's new book is a critique of the assumptions underlying classical approaches to film history the assumption that what we call the language of film was a natural organic development that it lay latent from the outset in the basic technology of the camera waiting for the prescient pioneers to bring it into being and the assumption that this language was a universal neutral medium innocent of any social or historical meaning in itself His major thesis is that on the contrary film language has a social and economic history that it evolved in the way it did because of when and where it was constructed in the capitalist and imperialist west between 1892 and 1929 The book examines the chronology of the emergence of what it defines as cinema's Institutional Mode of Representation and the socio historical circumstances in which this took place It examines the principles of visualisation camera placement and movement lighting editing mise en scene that film makers and audiences came to internalize over the first three decades Special emphasis is laid on the allimportant change that occurred in the imaginary placing of the spectator from a position of exteriority to the film image implicit in both film form and viewing conditions during the primitive era pre 1909 to the imaginary centering of the spectator subject completed only with the generalisation of lip synch sound after 1929 It is the contention of this book that this imaginary centering of a sensorily isolated spectator is the keystone of the cinematic illusion of reality still achieved today by the same means as it was sixty years ago

Gender and Nation in Meiji Japan Jason G.

Karlin,2014-04-30 Gender and Nation in Meiji Japan is a historical analysis of the discourses of nostalgia in late nineteenth and early twentieth century Japan Through an analysis of the experience of rapid social change in Japan s modernization it argues that fads ry k and the desires they express are central to understanding Japanese modernity conceptions of gender and discourses of nationalism In doing so the author uncovers the myth of eternal return that lurks below the surface of Japanese history as an expression of the desire to find meaning amid the chaos and alienation of modern times The Meiji period 1868 1912 was one of rapid change that hastened the process of forgetting The state s aggressive program of modernization required the repression of history and memory However repression merely produced new forms of desire seeking a return to the past with the result that competing or alternative conceptions of the nation haunted the history of modern Japan Rooted in the belief that the nation was a natural and organic entity that predated the rational modern state such conceptions often were responses to modernity that envisioned the nation in opposition to the modern state What these visions of the nation shared was the ironic desire to overcome the modern condition by seeking the timeless past While the condition of their repression was often linked to the modernizing policies of the Meiji state the means for imagining the nation in opposition to the state required the construction of new symbols that claimed the authority of history and appealed to a rearticulated tradition Through the idiom of gender and nation new reified representations of continuity timelessness and history were fashioned to compensate for the unmooring of inherited practices from the shared locales of everyday life This book examines the intellectual social and cultural factors that contributed to the rapid spread of Western tastes and styles along with the backlash against Westernization that was expressed as a longing for the past By focusing on the expressions of these desires in popular culture and media texts it reveals how the conflation of mother countryside everyday life and history structured representations to naturalize ideologies of gender and nationalism

Gender, Nation and State in Modern Japan Andrea Germer,Vera Mackie,Ulrike Wöhr,2014-07-25 Gender Nation and State in Modern Japan makes a unique contribution to the international literature on the formation of modern nation states in its focus on the gendering of

the modern Japanese nation state from the late nineteenth century to the present References to gender relations are deeply embedded in the historical concepts of nation and nationalism and in the related symbols metaphors and arguments Moreover the development of the binary opposition between masculinity and femininity and the development of the modern nation state are processes which occurred simultaneously They were the product of a shift from a stratified hereditary class society to a functionally differentiated social body This volume includes the work of an international group of scholars from Japan the United States Australia and Germany which in many cases appears in English for the first time It provides an interdisciplinary perspective on the formation of the modern Japanese nation state including comparative perspectives from research on the formation of the modern nation state in Europe thus bringing research on Japan into a transnational dialogue This volume will be of interest in the fields of modern Japanese history gender studies political science and comparative studies of nationalism

psychoanalysis in all its conceptual and clinical diversity This approach reflects the perspective of the two new co editors whose backgrounds in linguistics and social anthropology inform and enrich their clinical practice and the six new section editors who themselves reflect the diversity of backgrounds and thinking in contemporary American psychoanalysis The book begins with Freud and his circle and the origins of psychoanalysis and goes on to explore its development in the post Freud era This general introduction orients the reader and helps to contextualize the six sections that follow The most important tenets of psychoanalysis are defined and described in the Core Concepts section including theories of motivation unconscious processes transference and countertransference defense and resistance and gender and sexuality These eight chapters constitute an excellent introduction to the field of psychoanalysis The Schools of Thought section features chapters on the most influential theories from object relations to self psychology to attachment theory and relational psychoanalysis and includes the contributions of Klein and Bion and of Lacan Rather than making developmental theory a separate section as in the last edition developmental themes now permeate the Schools of Thought section and illuminate other theories and topics throughout the edition Taking a more clinical turn the Treatment and Technique section addresses critical subjects such as transference and countertransference theories of therapeutic action process interpretation and resistance termination and reanalysis combined psychoanalysis and psychopharmacotherapy child analysis ethics and the relationship between psychoanalysis and psychodynamic psychotherapy A substantive utterly current and meticulously referenced section on Research provides an in depth discussion of outcome process and developmental research The section entitled Psychoanalysis and Other Disciplines takes the reader on a fascinating tour through the many fields that psychoanalysis has enriched and been enriched by including the neurosciences philosophy anthropology race ethnicity literature visual arts film and music A comprehensive Glossary completes this indispensable text The Textbook of Psychoanalysis is the only comprehensive textbook of psychoanalysis available in the United States This masterful revision will both instruct and engage those who are learning psychoanalysis those who practice it and those who apply its theories to related disciplines Though always controversial this model of the human psyche still provides the best and most comprehensive insight into human nature
