Torn Between America and China Daniel Novotny, 2010 How can a developing democratic and predominantly Muslim country like Indonesia manage its foreign relations while facing a myriad of security concerns and dilemmas in the increasingly complex post Cold War international politics without compromising its national interests and sacrificing its independence Approaching this problem from the vantage point of the Indonesian foreign policy elite this book explores the elite s perceptions about other states and the manner in which these shape the decision making process and determine policy outcomes The combined qualitative and quantitative research strategy draws on a unique series of in depth interviews with 45 members of the Indonesian foreign policy elite that included the country s present and or former presidents cabinet ministers high ranking military officers and senior diplomats Among all state actors Indonesian relations with the United States and China are the highest concern of the elite The leaders believe that in the future Indonesia will increasingly have to manoeuvre between the two rival powers While the United States during George W Bush s presidency was seen as the main security threat to Indonesia China is considered the main malign factor in the long run with power capabilities that need to be constrained and counter balanced *Dialectic of the Chinese Revolution* Jiwei Ci, 1994 In this progression which the author describes as the unfolding of the hedonistic potential of utopianism Marxism became China s road to capitalism and consumerism

Superpower? Raghav Bahl, 2010-10-28 Is India ready for superpower status or too far behind China to ever catch up In his career as one of India s leading journalists and entrepreneurs Raghav Bahl has often faced this question and many others from bewildered visitors Why are Indian regulations so weak and confusing Why is your foreign investment policy so restrictive How come your hotels are world class but the roads leading to them are so potholed Why don t you lower your voice when you make fun of your politicians Why do you control the price of oil and cable TV Clearly there s a huge difference in how India and its arch rival China work on the ground China is spectacularly effective in building infrastructure and is now reinvesting almost half its GDP Meanwhile India is still a promising economy more than half its GDP is consumed by its billion plus people yet India has some unique advantages Half its population is under twenty five giving it a strong demographic edge 350 million Indians understand English making it the largest English speaking country in the world and it s the world s largest democracy In the race to superpower status who is more likely to win China s hare or India s tortoise

Bahl argues that the winner might not be determined by who is investing more and growing faster today but by something more intangible who has superior innovative skills and more entrepreneurial savvy He notes that China and India were both quick to recover from the financial crisis but China's rebound was accompanied by huge debt and deflation with weak demand India's turnaround was sturdier with lower debt and modest inflation So India's GDP grew twice as fast as China's for a few quarters the first time that had happened in nearly three decades And in contrast to China's Yuan which is pummeled for being artificially undervalued India's rupee largely floats against world currencies In the end it might come down to one deciding factor can India fix its governance before China repairs its politics With insights into the two countries histories politics economies and cultures this is a well written fully documented comprehensive account of the race to become the next global superpower For anyone looking to understand China India and the future of the world economy this is the book to read

Cambodia's China Strategy Chantorey Cheunboran, 2021-06-21 This book explores the tensions within Cambodia's foreign policy between a tight alignment with China on the one hand and Cambodia's commitment to the Association of the Southeast Asian Nations ASEAN as well as its delicate foreign policy diversification towards other major powers on the other hand It traces the long history of Cambodia's quest for survival from its bigger and historically antagonistic neighbours the Thai and the Vietnamese and its struggle for security and independence from the two neighbours and external major powers particularly the United States and China It discusses Cambodia's geopolitical predicaments deriving from its location of being sandwiched between powerful neighbours and limited strategic options available for the Kingdom The book also assesses recent developments in Cambodia's relations with its neighbours and their implications for Cambodia's increasingly tight alignment with China in recent years It considers the extent to which the ruling regime in Cambodia depends on strong relations with China for its legitimacy and survival and argues that there are risks and danger for Cambodia in moving towards an increasingly tight alignment with China
