Sociologist Michelle Janning's *Love Letters Saving Romance in the Digital Age* offers a new twist on the study of love letters what people do with them and whether digital or paper format matters Through stories a rich review of past research and her own survey findings Janning uncovers whether and how people from different groups including gender and age approach their love letter curatorial practices in an era when digitization of communication is nearly ubiquitous She investigates the importance of space and time showing how our connection to the material world and our attraction to nostalgia matter in actions as seemingly small and private as saving storing stumbling upon or even burning a love letter Janning provides a framework for understanding why someone may prefer digital or paper love letters and what that preference says about a person's access and attachment to powerful cultural values such as individualization taking time in a hectic world longevity privacy and keeping cherished things in a safe place Ultimately Janning contends the cultural values that tell us how romantic love should be defined are more powerful than the format our love letters take

course the heartfelt declaration of love Was there a Golden Age of Letters Why is handwriting so important Can we ever regain the hallowed slowness of the pre Twitter era In answering these questions O Connell shows how a proper letter is an object to be cherished its crafting an act of exposure which gives shape and meaning to the chaos of life The nib touches the paper And instinctively I follow the old formula address in top right hand corner date just beneath it on the left hand side My writing looks weird I hand write so infrequently these days that I ve developed a graphic stammer my brain s way of registering its impatience and bemusement What are you doing Just send an email I haven t got all night
